The Fiscal Survey of States is published twice annually by the National Association of State Budget Officers (NASBO) and the National Governors Association (NGA). The series was started in 1977. The survey presents aggregate and individual data on the states' general-fund receipts, expenditures, and balances. Although not the totality of state spending, these funds are used to finance most broad-based state services and are the most important elements in determining the fiscal health of the states. A separate survey that includes total state spending also is conducted annually.

The field survey on which this report is based was conducted by NASBO in August through November 2000. The surveys were completed by governors' state budget officers in the fifty states and Puerto Rico.

Each edition of *The Fiscal Survey of States* features a state policy and/or budget issue. This edition features information technology expenditures in the New Economy.

Fiscal 1999 data represent actual figures, fiscal 2000 figures are preliminary actual, and fiscal 2001 data reflect enacted budgets.

In forty-six states, the fiscal year begins in July and ends in June. The exceptions are Alabama and Michigan, with an October to September fiscal year; New York, with an April to March fiscal year; and Texas, with a September to August fiscal year. In addition, 20 states are on a biennial budget cycle.

NASBO staff members Greg Von Behren and Nick Samuels compiled the data and prepared the text for the report. NGA staff member Kathy Skidmore-Williams provided production and editorial assistance. Dotty Esher of State Services Organization provided typesetting services.

NASBO Executive Director
1951-2000

Executive Summary

Although the national economy remains relatively strong, signs on the horizon indicate that the state budget outlook may deteriorate during the next few years. Specifically, a moderate slowdown in state revenue growth and escalating state health care costs will cause many state budgets to tighten. With state health care spending accounting for 27 percent of all state expenditures, the resurgence of health care cost pressures significantly affect states' fiscal health.

This edition of *The Fiscal Survey of States* reflects actual fiscal 1999, preliminary actual fiscal 2000 and enacted fiscal 2001 figures. While the data show positive fiscal health for states during this time period, the tightening of budgets will become more apparent when governors present their fiscal 2002 and fiscal 2003 budget recommendations over the next months.

State Spending

General fund spending increases are 7.2 percent for fiscal 2001 and 7.2 percent for fiscal 2000. These figures include one-time spending from surplus funds, transfers into budget stabilization funds and other reserve funds, and payments to local governments to reduce property taxes.

Only one state reduced its fiscal 2000 enacted budget, by a total of \$65.5 million—two states less than the previous year. This number is anticipated to increase as more states are forced to make adjustments to their fiscal 2001 budgets.

Within the framework of the Temporary Assistance for Needy Families program, states are focusing on providing supportive services for families to achieve self-sufficiency. Most states are not adjusting benefit levels, but states that are adjusting cash assistance payments are, for the most part, increasing benefits, carrying over the trend from the past three years. For example, nine of the ten states that adjusted cash assistance payments for fiscal 2001 increased benefit levels. In the previous two years, all seven states making changes increased benefit levels in fiscal 2000 and six out of seven states making changes for fiscal 1999 increased benefit levels.

Over one-half of the states enacted changes affecting local governments. Aid to local governments

takes many forms, such as direct aid, substitution of state revenues for local revenues and assumption of local services. State aid to reduce local property taxes totals approximately \$1.9 billion in fiscal 2001 budgets. Increases in aid to local governments are concentrated in the areas of revenue sharing, social services, public safety, libraries, education, and property tax relief.

Almost all states granted employee compensation increases for fiscal 2001, with an average across-the-board increase of approximately 3.1 percent. In addition, eligible employees received additional amounts for merit pay, movements along pay scales, and other forms of compensation. Some states also are reclassifying certain positions and/or using bonuses for recruiting positions that are in short supply.

State Revenue Actions

Net tax and fee changes will decrease fiscal 2001 revenues by \$5.8 billion. Fiscal 2001 represents the seventh consecutive year that states reduced taxes and fees, totaling \$33 billion over the seven-year period. Most of the fiscal 2001 tax reductions focus on reducing the sales, personal income and corporate income taxes.

After states enacted a \$7-billion tax reduction in fiscal 1999, more recent decreases have been more modest; the amount for fiscal 2001 is only slightly larger than the \$5.2-billion tax cut enacted in fiscal 2000. The change may be because states have been on a tax-cutting trend since fiscal 1995 and investment in areas such as education and infrastructure may be viewed as a significant use of dollars that had been used for tax cuts in previous years. Other findings include the following:

Fiscal 2000 net tax collections are 3.9 percent higher than the estimates originally used in adopting state budgets.

For fiscal 2001, sales, personal income, and corporate income tax collections are projected to be nearly 3.4 percent above last year's collections.

Year-End Balances

Year-end balances are at 8.4 percent, 8.3 percent, and 6.2 percent in fiscal 1999, fiscal 2000, and fiscal 2001, respectively. Although balances are at healthy levels, the amount for fiscal 2001 represents a one-third reduction from the 9.2 percent that states experienced in fiscal 1998, the height of recent state balances.

States recognize that an economic downturn can reduce balances dramatically, so they normally develop their fiscal plans with projected reserves. These reserves may be in the form of a budget stabilization fund, a required ending balance, a rainy day fund or any combination thereof. During the past several years, states have been building up rainy day fund balances and ending balances that will help prevent major disruptions in services to citizens to the extent that the economy slows from its current rapid pace of economic growth.

Recent Fiscal Deterioration

Since this comprehensive survey of state fiscal profiles was completed, anectodal evidence has emerged that actual revenues are coming in below forecasts for an increasing number of states. To determine the extent of the revenue shortfall, NASBO conducted an adhoc survey of state budget officers to determine the extent of the change. Twenty-nine states responded and findings of this survey show:

Revenue growth for the next fiscal year is likely to fall below current-year levels for about one-half of the states with an average reduction of about 1 percent.

Medicaid growth, which represents about 20 percent of the average state budget, is exceeding current-year budgets in more than half of the states. Medicaid expenditures may well experience double-digit growth in the future.

The combination of these two trends will reduce the ability of governors to meet their high-priority needs while continuing to balance their budgets. About eight to ten states are reporting that they will be forced to reduce their previously enacted appropriations for 2001.

Chapter four contains more detail on this emerging downturn.

State Spending on Information Technology (IT)

As IT spending continues to grow in state budgets and chief information officers begin to assume management responsibilities for IT investments across IT agencies, states are beginning to track overall IT spending. For the first time, states were asked to provide information on total budget outlays for information technology (IT). Thirty states provided figures indicating average per state expenditures of \$185 million annually, ranging from an average low of \$2.8 million to an average high of \$621 million.

State Expenditure Developments

CHAPTER ONE

Budget Management in Fiscal 2000

Only one state—Kansas—reduced its fiscal 2000 enacted budget, by a total of \$65.5 million (see Table 1). This number contrasts sharply with the 20 or more states that reduced their enacted budgets during fiscal 1990 to fiscal 1993, the peak period for midyear budget adjustments. During the past five years, 13 or fewer states had to reduce their enacted budgets.

State Spending for Fiscal 2001

Although this report captures only state general fund spending, NASBO's annual State Expenditure Report encompasses spending from all funding sources and provides details on the components of state spending. According to the June 2000 edition, total state spending is estimated at \$962 billion for fiscal 2000, with the general fund accounting for approximately 47 percent of the total. The components of total state spending are as follows: elementary and secondary education at 22.1 percent, Medicaid at 19.6 percent, higher education at 10.4 percent, transportation at 8.7 percent, corrections at 3.7 percent, public assistance at 2.5 percent, and all other expenditures at 33.1 percent (numbers may not add due to rounding).

Within the general fund, the components of state spending are elementary and secondary education at 34.9 percent, Medicaid at 14.6 percent, higher education at 13.1 percent, corrections at 6.8 percent, public assistance at 2.7 percent, transportation at 0.7 percent, and all other expenditures at 27.1 percent (numbers may not add due to rounding). Although elementary and secondary education continues to dominate state spending, Medicaid since fiscal 1993

has become the second largest component of state spending both from state general funds and from all spending sources. In addition to Medicaid, state spending on other health services accounts for another 6.1 percent of general fund spending. As health costs spiral upward, this large component of state spending will increase pressure on state budgets.

The increase in states' general fund spending for fiscal 2001 is 7.2 percent above fiscal 2000. Even with a strong economy, states have been relatively cautious in their spending, averaging 6.6 percent over the last five years. The most significant spending increase occurred in elementary and secondary education, growing by about 7.3 percent over the past five years.

State spending in fiscal 2000 is 7.2 percent above fiscal 1999 (see Table 2 and Figure 1). In more than half of the states, expenditure growth is above 5 percent in fiscal 2000 and 2001 (see Table 3 and Appendix Table A-4).

Cash Assistance Under the Temporary Assistance for Needy Families Program (TANF). For fiscal 2001. 40 states maintain the same cash assistance benefit levels that were in effect in fiscal 2000. Of the 10 states that adjusted cash assistance benefit levels, all but one increased benefit levels (see Table 4). Most state welfare reform centers on restructuring the program rather than adjusting cash assistance payments. Since enactment of the 1996 welfare reform law, caseloads have declined substantially in nearly every state.

Between August 1996, when welfare reform began, and December 1999, welfare rolls dropped 49 percent nationwide, with 36 states experiencing caseload declines of more than 40 percent. The percentage of the

1981	16.3	6.1		
1980	10.0	-0.6		
1979	10.1	1.5		
19792001 average	6.9%	2.3%		

NOTE: The state and local government implicit price deflator as cited by the Bureau of Economic Analysis on October 30, 2000, is used for state expenditures in determining real changes. Fiscal 2000 figures are based on the change from fiscal 1999 actuals to fiscal 2000 preliminary actuals. Fiscal 2001 figures are based on the change from fiscal 2000 preliminary actuals to fiscal 2001 appropriated.

SOURCE: National Association of State Budget Officers.

U.S. population receiving TANF was 2.3 percent in December 1999, a decline of more than 55 percent from the number receiving welfare in fiscal 1994. Funding levels, however, remain relatively constant because the block grant nature of the TANF program guarantees certain levels of federal funding. As the need for cash assistance expenditures declines, states are free to use the TANF funds for other services to assist families in making the transition from welfare to work and assist low-income families in general.

Medicaid. Between 1990 and 1992, state Medicaid spending increased at a 27.1-percent annual growth rate, with expenditures rising from \$73.7 billion to \$119.9 billion in just two years; it slowed to 9.7 percent per year on average between 1993 and 1996. Between 1997 and 1998, it averaged only 4

Number of States

Spending Growth	Fiscal 2000 (Preliminary Actual)	Fiscal 2001 (Appropriated)
Negative growth	4	3
0.0% to 4.9%	18	19
5.0% to 9.9%	22	20
10% or more	7	7

NOTE: Average spending growth for fiscal 2000 (preliminary actual) is 7.2 percent; average spending growth for fiscal 2001 (appropriated) is 7.2 percent.

SOURCE: National Association of State Budget Officers.

percent. Growth has escalated more recently, with Medicaid spending increasing by 6.5 percent in 1999 and 9.1 percent in fiscal 2000. The Congressional Budget Office (CBO) is projecting further increases, averaging 8.7 percent a year through 2010. According to Moody's Investor Service, primary cost drivers in states' Medicaid expenditures include increased spending on prescription drugs—the fastest growing component of health care spending in general---and noninstitutional long-term care. Increased usage combined with rising prices will lead to increased spending. CBO suggests that several factors could maintain spending above 8 percent in the long run. Cost containment efforts for the Medicare program could result in new Medicaid spending and the number of disabled people receiving long-term care services may increase due to judicial interpretations of the Americans with Disabilities Act. To keep managed care plans in the Medicaid market, states may feel pressured to increase their capitation rates, thus diminishing the savings accrued by managed care. Also, outreach efforts for State Children's Health Insurance Program resulted in higher Medicaid use among children.

Aid to Local Governments. More than half the states' budget changes affected local governments. Most of these changes increased aid to education and provided property tax relief (see Table 5).

Aid to local governments takes many forms, such as direct aid, substitution of state revenues for local revenues, and assumption of local services. For example. Montana increased aid to local government by \$42 million to offset the effects of statewide property tax reductions in fiscal 2001; South Dakota is moving to fund property tax relief at 30 percent of the total

Enacted Cost-of-Living Changes for Cash Assistance Benefit Levels under the **Temporary Assistance for Needy Families Block Grant, Fiscal 2001**

SOURCE: National Association of State Budget Officers.

NOTES TO TABLE 4

Colorado The cash benefit level is set by each county, within state guidelines.

Michigan The 3-percent increase only applies to cases where families are not expected to work due to disability, age or other crisis. Additionally,

grants were increased by approximately \$78 per month (a 39-percent increase) for the approximately 6,000 kinship care cases in which care for children is being provided by extended family members. In addition to the TANF increase, Family Independence Program annual clothing allowance is increased from \$50 per child in fiscal 2000 to

\$75 per child in fiscal 2001.

New Mexico There has been no cost-of-living adjustment actually enacted by the legislature. However, the structure of the appropriation has

adversely affected the cash assistance funding. The funding has been effectively reduced by 24.3 percent from fiscal 2000 to

fiscal 2001.

Ohio There was no grant increase for state fiscal

2001, but there was a 3-percent increase the previous year, effective January 1, 2000.

In 1999 the legislature provided for a 7-percent increase in the TANF cash benefit for Texas

a family of three (i.e., caretaker and two dependents), effective in fiscal 2000 and continuing through fiscal 2001 and beyond.

West Virginia The Department of Health and Human Resources is in the process of increasing cash assistance payments in all categories by \$100 (not a percentage) over a 17-month

period. The dates and amount of increase are as follows: February 1999: \$25.00; July 1999: \$25; December 1999: \$25; and July 2000:

FIGURE 1

Annual Percentage Budget Increases, Fiscal 1979 to Fiscal 2001

TABLE 5

Enacted Changes in Aid to Local Governments, Fiscal 2001

Alaska An endowment to help equalize power rates between urban and rural communities was created. Also, new three-year labor contracts with bargaining units were negotiated.

Act 1044 of 1999 requires counties to pay one-twelth of 80 percent salary/matching for deputy prosecuting attorneys Arkansas from state funds. Act 1185 of 1999 requires counties to appraise all market value real estate once every three years

using turnback funds designated for a specific purpose.

The state will grant a total of \$212 million in discretionary funding to local governments in fiscal 2000-2001. In fiscal 1999-2000, \$150 million was provided. Mandate funding in local government financing in budget act of 2000 of \$7.1 California million. The final legislative changes are not complete as of September 5, 2000, therefore legislative effects are

unknown at this time.

Over the last two years the severance tax exemptions on oil, gas, coal and metals have been increased through legislation, but revenues to the Energy/Mineral Impact program have so far not been negatively affected due to increasing levels of production and commodity prices. Eventually business cycles will affect revenues, which are dominated by oil and gas. The gaming commission reduced tax rates, but revenues to the program have actually increased somewhat. Similarly, waste tire revenues have not been affected even though the surrender charge was reduced from \$1.00 to 75 cents in the last session because 50 cents of the charge still comes to the program that the Department of Local Affairs administers. The personal property tax exemption was increased by the legislature, but the state is backfilling local government losses. Colorado

The state has increased aid to municipalities by \$116 million, a 5.5-percent increase. This includes a one-time state surplus distribution of \$34 million. Enacted changes at the state level for fiscal 2001 that affect local governments' financial operations are minimal. Three small mandates were adopted that will have a slight effect on the spending Connecticut

of local governments and four minor mandates were reduced or eliminated.

The source of county revenue sharing was changed from the intangible tax to the sales tax. In addition, the dollar amount was reduced by \$43.3 million, a 12.4-percent reduction. In addition to the revenue sharing reduction, local Florida

governments are expected to lose \$7 million due to various sales tax exemptions.

Georgia The state reimbursed local governments \$166 million for the amount of homeowners' tax relief given when the homestead expemption was increased to \$4,000. This change contributed to the state's total spending increase.

> Local government aid was reduced by \$6.2 million (6.5 percent); mental health grants by \$2.3 million (7.2 percent); and K-12 education by \$44 million (2 percent). Community college assistance was increased to \$43.2 million (70.2

percent).

The 2000-2002 biennial budget allocated nearly \$157 million for water projects throughout the state, with \$50 million devoted to a new "2020 Account," so named after the Governor's goal of delivering potable water to all Kentuckians by 2020. A total of \$293 million was budgeted for community development projects throughout all 120 counties. The increase in aid to local governments is capital in nature. Beyond the initial capital investment, the increase in the operating budget is due to the new debt service associated with the bonded portion of the projects.

Louisiana The tobacco tax distribution was cut by \$12 million. Miscellaneous aid to local governments was cut by \$3 million.

Appropriation of \$3.6 million to offset the impact of disproportionate tax burden. Funds to be distributed through the

current municipal revenue sharing system.

The Governor's Teacher Salary Challenge Program establishes a two-year program of teacher salary grants equal to 1 percent of salaries, contingent on local school systems providing a 4-percent cost-of-living increase to teachers. The estimated cost is \$35 million in fiscal 2001 and \$71.6 million in fiscal 2002. Also provided is a two-year grant for intervention strategies to improve outcomes for students who are not performing at grade level. The fiscal 2001 grant is \$12 million, with \$19.5 million mandated for fiscal 2002. The state provided an \$8-million grant to Baltimore City to partially fund elements of the city's Remedy Plan—a 16-percent increase over fiscal 2000. In fiscal 2002, \$8 million is mandated. Other increased grants include \$5.6 million for technology in public schools and the Maryland Technology Academy, \$3 million for school readiness and \$4.5 million for teacher professional development (\$2.5 million to expand mentoring programs and \$2 million for a teacher certification accreditation system).

Funding more than doubled for the Regional Library Resource Centers from \$1.70 per resident for fiscal 2001 to \$3.50 per resident in fiscal 2002, with additional 50 cent increases per resident for each of fiscal 2003 (\$4.00) and 2004 (\$4.50). The funding remains at \$4.50 thereafter.

A one-time grant of \$1.3 million to Baltimore City was made for the State's Attorney's Office and \$200,000 to local law enforcement agencies for domestic violence units. A one-time grant of \$500,000 was also made to Baltimore City for lead paint abatement.

Ten counties and Baltimore City received \$15.3 million to offset lost local revenues resulting from the electric and gas utility tax reform enacted at the 1999 legislative session. The grant doubles to \$30.6 million for fiscal 2002 and thereafter.

Kansas

Kentucky

Maine

Maryland

Massachusetts

Funding increased in fiscal 2001 from fiscal 2000 levels for: an education reform initiative, first enacted in fiscal 1993, to improve the quality of K-12 education, by \$187 million (6.8 percent); K-12 school building assistance by \$50.2 million (19 percent); a program to reimburse communities that encompasses certain state-owned tax-exempt properties for forgone tax revenues by \$3 million (20 percent); regional school transportation reimbursement by \$8.1 million (20 percent); and police career incentives (to encourage the pursuit of college degrees) by \$4.5 million (19 percent).

The fiscal 2001 "excess" lottery distribution to cities and towns is budgeted at \$60 million, or 9 percent more than was budgeted for fiscal 2000, although the actual distribution will be determined after the close of the fiscal year. The lottery distribution generally is estimated conservatively in the annual general appropriations act. If net lottery revenue at fiscal year end exceeds the preliminary estimate, the excess is also distributed to the cities and towns. For fiscal 2000, the additional year-end distribution was \$85.5 million, or 11.3 percent of the fiscal year's total distribution.

A new program in fiscal 2001 to reduce class size in grades K-3 was funded at \$18 million. Local property tax exemptions for severely disabled veterans, which are locally granted and state reimbursable, have been extended to surviving spouses.

Michigan

New population estimates from the U.S. 2000 Census will affect the distribution of the state's \$1.6-billion revenue sharing program to more than 1,800 local units. A portion of revenue sharing is distributed on a per capita basis. In addition, an 8-percent cap on funding increases will be lifted for local units with a population change greater than 10 percent.

Fiscal 2001 is also the third year of a ten-year phase-in formula shift. Funding shifts from formulas primarily based upon local millages to formulas based primarily upon taxable values.

Missouri

The reimbursement for county juvenile personnel costs was increased by \$6 million, or 112 percent. The state has also begun to reimburse local election authorities for certain costs pertaining to local elections, totalling \$1.1 million in fiscal 2001.

Minnesota

Increased agricultural education credit aid \$10.3 million (20 percent) in fiscal 2002 and \$11.6 million (25 percent) in fiscal 2003. Increased the payment to counties in lieu of property taxes for public lands \$2.6 million (40 percent) in fiscal 2002 and \$2.9 million (42 percent) in fiscal 2003. Legislation passed in 2000 requires counties to restructure how they make payments for child support and maintenance. It also increased county responsibilities in sex offender registration. The costs are under study.

Montana

State payments to local governments increased by \$42 million to offset the effects of statewide property tax reductions in fiscal 2001. State aid to schools increased by \$10 million to reduce the local cost of basic entitlements. Additionally, the state reimbursed local governments \$80.1 million to cover the costs of state tax reductions leading to local revenue losses from property taxes and vehicle fees.

Nebraska

As a property tax reduction item, general fund support for community colleges was increased by \$30 million. General fund aid to school districts was reduced by \$29 million due to increases in other funding sources.

New Jersev

Consolidated municipal property tax relief aid (CMPTRA) increased by \$19.2 million or 2.5 percent. Growth was tied to growth in cap on municipal spending. \$17.5 million, which was allocated for the regional efficiency aid program, was disbursed to municipalities that entered into share service agreements with other towns. These funds provide for a guaranteed reduction in local tax levies. Since no funds were expended for this purpose in fiscal 2000, this represents a 100-percent increase.

New Hampshire

The state assumed the cost of an adequate education from local governments by decision of the state supreme court. The state increased taxes to fund \$400 million for local education as well as \$400 million in statewide property taxes.

New Mexico

Enacted changes to the local property tax structure may affect the revenue flow to local governments. Effective January 1, 2001, New Mexico residential properties may not increase in valuation more than 3 percent per year and in some cases no more than 5 percent on an annual basis. A low-income elderly property tax freeze will take effect January 1, 2001. A Grenada veteran's property tax exemption, certain disabled veterans' property tax exemptions and a one-time disabled veterans property tax rebate were created. A gross receipts tax deduction for sales of tangible personal property to state-chartered credit unions was created. The negative effect to local governments is approximately \$53 million. Enacted changes to the Law Enforcement Protection Fund provides for an increase in the distribution to those local governments that operate a police/sheriff's department, effective July 1, 2000. For fiscal 2001, this results in a \$1.4-million increase in revenue to local governments.

New York

The fiscal 2001 enacted budget will result in net benefits of nearly \$1.3 billion for all classes of local governments (counties, cities, towns, villages and school districts) compared to fiscal 2000. Under this plan, counties (inlcuding New York City) will realize savings of \$673 million. School districts (excluding New York City), towns and villages will receive a net benefit of \$96 million. Welfare reform and children and family services actions will generate \$318 million in savings for local governments. Unrestricted aid to counties, cities, towns and villages totals \$927.7 million—a 12-percent increase over the prior year. The enacted budget does not inlcude any unfunded mandates for local governments. The fiscal 2001 enacted budget also continues a state-funded multiyear cut in local school property taxes and the New York City personal income tax. In fiscal 2001, more than 3 million taxpayers will realize an estimated \$1.6 billion in school property tax savings. New York City residents will receive approximately \$380 million in local income tax relief.

Oregon

The legislature provided an additional \$5 million in general funds directly to counties to aid in the assessment and taxation of property. The legislature also changed the taxation method of forestlands. This will have a net positive effect on local governments (including schools) of approximately \$4 million during the 1999-2001 biennium.

The Education Empowerment Act provided \$25 million to 11 empowerment districts for development of education Pennsylvania improvement plans to increase school district performance. Within three years, if performance is not improved, the state may appoint a control board to govern the school district.

Rhode Island Total aid to local governments increased 25.8 percent from enacted fiscal 2000 to enacted fiscal 2001. State law requires local governments to perform property revaluations on a specified schedule. The state will reimburse communities for a portion of the cost of these revaluations. The fiscal 2001 budget included an increase in the level of state reimbursement. The fiscal 2000 budget also included a plan to eliminate local property taxes on motor vehicles by fiscal 2005, with the state reimbursing local communities for the lost local property tax revenue. The fiscal 2002

budget extended this timeframe to fiscal 2007 and revised the annual exemption amounts.

The homestead exemption for homeowners more than 65 years old was increased from \$20,000 to \$50,000. State South Carolina

appropriated \$37.5 million to reimburse counties for this exemption.

South Dakota Property tax relief is paid through state aid to education. The state will move from 25-percent to 30-percent property tax relief in calendar year 2001. This will increase the state's commitment by \$10.2 million in fiscal 2001 and \$20.4 million in fiscal 2002 for a total yearly commitment of \$122.4 million.

The state provided school districts \$1.35 billion in additional biennial funds to be used for local property tax relief. Texas The state also budgeted \$496 million in biennial sales and franchise tax reduction measures (including exemptions for over-the-counter drugs and Internet access, and partial exemptions for data processing and information services).

Legislation also provided for a sales tax holiday prior to the beginning of the school year. The exemptions are mandatory for local units of government (totaling \$67.7 million in reduced local sales tax revenue), although the application of the tax holiday to local sales tax add-ons is optional.

Utah

Funding for planning grants to local governments was cut by \$35,000, or 12 percent. An additional \$3.5 million or 18 percent was appropriated to pay counties to house state prisoners. These funds will provide for additional services and an increase in the number of state inmates housed at county jails. The legislature approved a 5.5-percent weighted pupil unit increase in state funding allocated to school districts. This provided an additional \$86.9 million for public education. An additional \$10.4 million was provided for textbooks and supplies, plus another \$5.9 million for other school district programs. The legislature appropriated \$300,000 to provide nurse practitioners in local children's justice centers, \$75,000 for a special investigator to help rural communities deal with difficult cases that protect children, and \$1.2 million for legal research and litigation to resolve ownership for small backways and byways in rural areas. An additional \$100,000 in one-time funds were appropriated for rural growth management. Funding for state health grants to counties was reduced by \$118,100, or 2.4 percent.

\$80 million in state funding was provided for public transportation systems to assist in the continuation of services following the passage of voter-approved Initiative 695, which repealed the motor vehicle excise tax (a primary fund source for this activity at the local level). \$90.5 million was provided for cities and counties to backfill funding lost as a result of the initiative to continue funding for public health and safety programs. exemptions for computer equipment, general local support and payments for municipal services to state facilities.

cost from the current 25 percent amount, and Washington provided \$80 million in state funding for public transportation systems following the passage of a voter-approved initiative that repealed the motor vehicle excise tax, which is a local primary fund source for this activity.

In seven states, funding to reduce local property taxes is a significant feature of state aid to local government, totaling approximately \$1.9 billion for fiscal 2001. The amounts in these states range from less

than 1 percent to more than 20 percent of the total general fund increase in the state budgets.

Employee Compensation. Most states granted employee compensation increases for fiscal 2001, with an average across-the-board increase of approximately 3.1 percent. Eligible employees may receive additional amounts for merit pay, movement along pay scales, and other forms of compensation (see Table A-5).

CHAPTER TWO

Overview

Enacted fiscal 2001 tax and fee changes will result in net decreases to state revenues of \$5.8 billion, the seventh consecutive year of net tax reductions (see Tables 6 and 7 and Figure 2). Signaling the continued general fiscal health of the states, these decreases continue the recent trend of tax reduction, although they are only slightly larger than states' tax cuts in fiscal 2000. In contrast, net state tax reductions occurred only twice in the 1980s, totaling \$3.1 billion.

Fiscal 2001 enacted tax reductions occurred in personal income (\$2.6 billion), other taxes (\$1.4 billion), sales (\$934.2 million), corporate income (\$708.9 million), motor fuels (\$104.1 million), fees (\$56.1 million), and alcohol taxes (\$41.3 million). Minnesota enacted the largest net tax reduction in

SOURCES: Advisory Commission on Intergovernmental Relations, *Significant Features of Fiscal Federalism*, 1985-86 edition, page 77, based on data from the Tax Foundation and the National Conference of State Legislatures. Fiscal 1988-2001 data provided by the National Association of State Budget Officers.

fiscal 2001 (\$922 million), followed by New York (\$898.7), Pennsylvania (\$758 million), Ohio (\$639.7 million), California (\$501 million) and Florida (\$449.6 million).

States' net increases to cigarette and tobacco taxes total \$41.6 million.

Collections in Fiscal 2000

State tax collections continue to reflect sustained economic growth. Indeed, only four states report lower-than-projected sales, personal income and corporate income tax collections, which represent more than half of state general fund revenues. The strongest growth continues to be in personal income taxes: in fiscal 2000, collections surpassed states' original expectations by 5.4 percent. Sales tax collections were 2.7 percent larger than original estimates (see Appendix Table A-7). The exception continues to be corporate income tax collections. Although net fiscal 2000 collections are 1.9 percent higher than original estimates, 18 states made downward adjustments to their original calculations.

Projected Collections for Fiscal 2001

Fiscal 2001 sales, personal income and corporate income net tax collections are projected to top fiscal 2000 amounts by 3.4 percent (see Appendix Table A-8). Sales tax receipts are estimated to increase by 2.9 percent and personal income taxes by 4.8 percent over fiscal 2000 levels. By contrast, corporate income tax collections are predicted to decrease by 2.8 percent. Twenty states adopted fiscal 2001 budgets anticipating a decline in corporate income tax collections from the previous year, compared with four states in which fiscal 2001 sales tax collections are expected to decline and six states where personal income tax collections are anticipated to shrink.

Revenue Changes for Fiscal 2001

Thirty-six states and Puerto Rico enacted net revenue changes for fiscal 2001 that will decrease revenues by \$5.8 billion (see Table 7).

Fiscal 2001 revenue actions are highlighted below and are detailed in Appendix Table A-9. In some

states, these changes include phased-in tax cuts, such as in Illinois, Massachusetts, New York, and South Carolina. In other states, revenue actions reflect onetime changes, such as a sales tax rebate in Minnesota and a statutorily mandated use of surplus funds to reduce personal income taxes in Ohio.

This survey differentiates between tax and fee increases and decreases (shown in Table 7 and Appendix Table A-9) and revenue measures (shown in Appendix Table A-10). Tax and fee changes reflect revisions in current law that affect taxpayer liability. Revenue measures include deferrals of tax increases or decreases that do not affect taxpayer liability. An example of a revenue measure is the extension of a tax credit that occurs each year.

Sales Taxes. Sixteen states enacted sales tax changes for fiscal 2001, resulting in a net decrease of \$934.2 million. Most of this amount reflects onetime actions that will not affect revenues in future years, including Minnesota's sales tax rebate of \$637.7 million, and a six-month suspension of the sales tax on motor fuels in Illinois, totaling \$150 million.

Two states enacted sales tax increases. Louisiana established a 1-percent tax on food and utilities resulting in a net increase of nearly \$110 million. Kentucky extended its sales tax to interstate long distance charges, realizing a net gain of almost \$24 million.

Personal Income Taxes. Twenty-one states enacted changes to personal income taxes, resulting in a net revenue decrease of over \$2.6 billion in fiscal 2001. Just less than one-quarter of this figure reflects Ohio's statutorily required use of surplus funds for a one-time rate reduction, leading to a net decrease of \$610.4 million. States currently without broad-based personal income taxes are Alaska, Florida, Nevada, New Hampshire, South Dakota, Tennessee, Texas, Washington and Wyoming.

California enacted the most significant personal income tax cuts, creating credits for child care, teachers, providers of long-term care to the elderly and employer-provided graduate study expenses, leading to a net reduction of \$465 million. Massachusetts has begun a three-year phase-in of a reduction in personal income tax rates that, combined with other changes, will lead to a net reduction of \$327 million in fiscal 2001. Minnesota also lowered rates and expanded a series of credits; its fiscal 2001 net personal income tax reduction totals \$237 million. An expansion of the school property tax and rent credits will lead to a \$319 million reduction in Wisconsin. Illinois' final year phase-in of an increase in the personal exemption and a tuition tax credit totals a \$190-million net decrease.

Three states enacted net personal income tax increases. These include Louisiana (which suspended the education credit and limited itemized deductions, resulting in an \$85.2 million increase), Ken-

NOTE: *See Appendix Table A-9 for details on specific revenue changes. **See Notes to Table A-7.

Massachusetts

Although Massachusetts operates under an annual budget and the fiscal year extends from July 1 through June 30, the 2000 legislative session generally encompasses calendar years 1999 and 2000. All but one of the tax changes were approved in the fiscal 2000 budget adopted November 1999. A deduction for charitable contributions was approved in the fiscal 2001 budget adopted July 2000.

Texas

Texas operates under a biennial budget, enacted into law in odd numbered years. Texas' last session was in 1999. There is no session in 2000.

tucky (\$1 million) and South Carolina (\$2.8 million).

Corporate Income Taxes. Eleven states enacted corporate income tax changes, resulting in a net decrease of \$708.9 million. In the course of utility deregulation, New York cut its corporate franchise, corporation and utilities taxes by \$549.3 million. Investment, brownfields and high-tech tax credits in Michigan will result in a net decrease of \$52.5 million. California established credits for research and for land donated for conservation resulting in a net reduction of \$31 million. Illinois continues a phasein of a single sales factor allocation and created an insurance tax offset, lowering corporate income tax collections by \$40 million. Hawaii enacted a credit for hotel construction and remodeling leading to a \$24.8-million decrease. New Hampshire raised corporate income tax rates from 7 percent to 8 percent, resulting in a \$22-million increase.

Cigarette, Tobacco, and Alcohol Taxes. As states continue to receive payments from the Tobacco Master Settlement Agreement, three have enacted changes to cigarette and other tobacco taxes in fiscal 2001. New Hampshire increased its per pack tax on cigarettes by 15 cents, resulting in a \$28-million increase. Louisiana raised its tax by 4 cents per pack and extended its tax on smokeless tobacco to 20 percent. The net revenue increase is \$14.7 million. Oregon prolonged its sunset on the cigarette tax, resulting in a revenue decrease of \$1.1 million.

Only one state enacted changes to alcoholic beverage taxes. Florida reduced its alcoholic beverage surcharge by half and established an exemption for

charitable organizations, resulting in a \$40.3-million decrease.

Motor Fuel Taxes. While high petroleum prices during the summer led several states to suspend the assorted taxes placed on motor fuels, only two have enacted changes that will affect fiscal 2001 revenues. Connecticut reduced its gas tax from 32 cents to 25 cents per gallon. The net tax reduction is \$104.1 million. Kentucky exempted certain special fuels used for nonhighway purposes, resulting in a \$5.1-million decrease.

Other Taxes and Fees. Revenues generated from other taxes, including personal property taxes, usually cover the costs for licensing and regulation enforcement, promote environmental conservation, and generate revenues for health care. Fees are often associated with motor vehicles and other types of licensing. Oklahoma adjusted how its motor vehicles excise tax is calculated and changed the basis on which vehicle registration fees are assessed, resulting in a \$10.1-million net tax decrease.

Pennsylvania enacted a substantial homeowner's property tax rebate in fiscal 2001, resulting in a \$330-million revenue decrease. It also lowered capital stock and franchise taxes by \$303.4 million and reduced the inheritance tax, a \$78-million decrease. Florida continued to reduce the millage for its intangibles tax, leading to a fiscal 2001 tax decrease of \$210.2 million. The state also eliminated auto emissions testing, accounting for a \$51.9-million reduction.

Total Balances

CHAPTER THREE

Sustained levels of economic growth have allowed states to increase their reserves. As a result, fiscal 2001 is the eighth consecutive year that ending balances exceed 5 percent of states' annual expenditures. These balances for fiscal 2001 are \$29.4 billion, or 6.2 percent of expenditures (see Table 8). Compared to similar figures from ten years ago, states are fiscally healthy, although fiscal 2001 balances as a percentage of expenditures are lower than they have been in the past six years. In fact, the figure of 6.2 percent for fiscal 2001 represents a decline of one-third from the peak of state balances, which was 9.2 percent of expenditures in fiscal 1998. These balances reflect the persistence of the economic expansion and emphasize the need for states to accumulate balances during healthy economic times.

TABLE 8 Total Year-End Balances, Fiscal 1979 to Fiscal 2001

		Total Balance
Fiscal	Total Balance	(Percentage of
Year	(Billions)	Expenditures)
2001*	\$29.4	6.2%
2000*	41.3	8.3
1999	39.3	8.4
1998	35.4	9.2
1997	30.7	7.9
1996	25.1	6.8
1995	20.6	5.8
1994	16.9	5.1
1993	13.0	4.2
1992	5.3	1.8
1991	3.1	1.1
1990	9.4	3.4
1989	12.5	4.8
1988	9.8	4.2
1987	6.7	3.1
1986	7.2	3.5
1985	9.7	5.2
1984	6.4	3.8
1983	2.3	1.5
1982	4.5	2.9
1981	6.5	4.4
1980	11.8	9.0
1979	11.2	8.7

NOTE: Figures for fiscal 2000 are preliminary actuals; figures for fiscal 2001 are based on appropriations.

SOURCE: National Association of State Budget Officers.

Balances as a percentage of expenditures in fiscal 1999 and fiscal 2000 are among the strongest in the past 22 years (see Figure 3). Total balances reflect the funds states may use to respond to unforeseen circumstances after budget obligations have been met. Both ending balances and the amounts in budget stabilization funds are included in total balance figures (see Appendix Tables A-1, A-2, A-3, and A-11). Based on fiscal 2000 total balances of \$41.3 billion, two-thirds of the states estimate balances as a percentage of expenditures to be 5 percent or more; the average is 8.3 percent. Eighteen of those states estimate total balances to be 10 percent or greater---a healthy buffer in case of an economic downturn or other uncertainties (see Table 8, 9, A-11, and Figure 4).

Since the recession of the early 1990s, states have worked to build their rainy day fund balances and ending balances to safeguard against disruption of services should economic growth slow. The fiscal downturn during those years and during a similar period in the early 1980s caused state balances to fall rapidly. During the one-year period from 1980 to 1981, for example, balances plunged from 9 percent of expenditures to 4.4 percent, forcing states to cut budgets and raise taxes. During the early 1990s, states found themselves lacking balances adequate to manage a fiscal slowdown once again. Before the economy slowed in 1989, state balances equaled 4.8 percent of expenditures. Within two years, balances hit bottom, totaling only 1.1 percent of expenditures in 1991. In fiscal 1992, 35 states were forced to cut current-year

TABLE 9 Total Year-End Balances as a Percentage of Expenditures, Fiscal 1999 to Fiscal 2001

			4.00
Percentage of	Fiscal 1999	(Preliminary	Fiscal 2001
Expenditures	(Actual)	Actual)	(Appropriated)
Less than 1.0%	1	1	1
1.0% to 2.9%	4	5	8
3.0% to 4.9%	6	7	10
5.0% or more	40	36	29

Number of States

NOTE: The average for fiscal 1999 (actual) was 8.4 percent; the average for fiscal 2000 (preliminary actual) is 8.3 percent; and the average for fiscal 2001 (appropriated) is 6.2 percent.

FIGURE 3

FIGURE 4
Total Year-End Balances as a Percentage of Expenditures, Fiscal 2000
SOURCE: National Association of State Budget Officers.

budgets. The following year, 23 states were obliged to take that action again, causing uncertainty both for citizens receiving necessary services and for the governments delivering them. To stem these losses, states raised \$25 billion in new revenues during the same two-year period. Remembering how swiftly that economic decline transpired, states have prepared themselves cautiously to handle the next slowdown.

State balances peaked in fiscal 1998, at 9.2 percent of expenditures. Balances have begun to decline gradually since then, the result of recent tax cuts, increases in state service obligations (particularly for education and health care), and an overall levelingoff of the economy. Demonstrating the combined effect of those factors, fiscal 2001 year-end fund balances as a percentage of expenditures are the lowest since fiscal 1994. Although expenditure growth from fiscal 2000 to fiscal 2001 remained steady, it is still high at 7.2 percent. Indeed, spending increases in fiscal years 1999, 2000 and 2001 outpace every fiscal year in the last 12. For more detail on state expenditures and the factors driving them, see Chapter One.

All but four states have budget stabilization funds, which may be budget reserve funds, revenue-shortfall accounts or cash-flow accounts. About three-fifths of the states have limits on the size of their budget reserve funds, ranging from 3 percent to 10 percent of appropriations. Ordinarily, funds above those limits remain in a state's ending balance.

Changes to Budgeting and Financial **Management Practices**

States continued to make changes to their budgeting and financial management systems in the 2000 legislative session. Among the most common was implementation of integrated financial management systems that track accounting, payroll and human resources functions. More states also are initiating performance or program budgeting systems, continuing the trend of "managing for results." One state, Illinois, used tobacco settlement proceeds to establish a budget stabilization fund. For details on these changes, see Table 10.

Changes to Budgeting and Financial Management Practices

NEW ENGLAND	
Connecticut	Initiated a hiring freeze statewide. Excludes refill of positions critical to public health, welfare and safety or essentia to the management of state responsibilities. As an enhancement to program measures, historically required in the budget document, for the fiscal year 2001-2003 biennium, each agency will be required to have at least one performance measure. Earmarked \$7.5 million in surplus dollars to finance the replacement of core financial and human resources systems targeted under Phase I of the project.
Maine	Full implementation of performance budgeting for fiscal years 2002-2003 biennium based on the prototype submitted to the legislature.
Massachusetts	Financing of the authority that operates mass transit facilities in eastern Massachusetts, the Massachusetts Bay Transportation Authority (MBTA), has materially changed. Historically, the Commonwealth provided debt-service guarantees, substantial contract assistance on MBTA's outstanding bonds and payment of its net cost of service in arrears. Effective fiscal 2001, the Commonwealth's obligation is generally limited to 1 percentage point of the state's 5-percent sales tax, which is dedicated to funding MBTA operations under a trust fund mechanism.
New Hampshire	The state is piloting a performance-based budgeting system.
Vermont	Continued planning and implementation of a new financial management system, including an integrated accounting/performance budgeting capability; implementing financials for fiscal 2002; and budgeting for the preparation of the fiscal 2003 budget.
MID-ATLANTIC	
Maryland	The state continues implementation of the Managing for Results program and of new software for an automated budget system.
New Jersey	Although no changes have been made, New Jersey released a request for proposals in August 2000 for an integrated financial and administrative suite that will integrate human resources, payroll and financial systems.
Pennsylvania	Acquisition of a new integrated management system for accounting, budgeting, payroll, personnel and procurement
GREAT LAKES	
Illinois	All proposed new initiatives in the upcoming budget must first be presented to and approved by the Office of Performance Review within the Governor's Office. Also, a Budget Stabilization Fund was created using tobacconsettlement funds.
Ohio	The Department of Human Services and the Bureau of Employment Services merged into a new agency, the Department of Job and Family Services, on July 1, 2000.
PLAINS	
Kansas	Kansas is conducting a needs assessment and fit analysis.
Missouri	As part of the change to the new human resources system, state employees will be paid on a bimonthly lag payrol rather than on a once-a-month anticipatory payroll.
Nebraska	A \$1-million appropriation from the state general fund and a \$1.5-million appropriation from cigarette tax receipts for the next phase of the new financial management system.
SOUTHEAST	
Alabama	Phasing in performance-based budgeting.
Arkansas	The state is beginning a phase-in of a performance-based accountability system. It is also implementing an integrated information system to include activities-based costing with expenditures tied to measurable performance outputs.
Florida	Legislation passed creating a State Technology Office (STO) and chief information officer, centralizing the management of information technology (IT) resources for state agencies. The STO responsibilities include advising and assisting state agencies in the integration of IT systems and services; oversight of state agency IT purchases to ensure suitable agency integration; ensuring fiscal responsibility and accountability relating to IT resources; and facilitation of IT education and training.
	Legislation also passed creating a new public-private partnership known as Workforce Florida, Inc., which will be responsible for developing and overseeing the implementation of consolidated workforce policy and planning

overseeing the implementation of consolidated workforce policy and planning responsible for developing and overse strategies at the state and local levels.

The legislature passed a bill that will require all state agencies to develop zero-based budgets at least once every

Statutory revisions were made to eliminate the strategic planning process and to replace it with a long-range program planning process. The changes also increased flexibility for agencies in managing their budgets and created a new process for zero-based budgeting.

The legislature authorized the implementation of the first phase of an integrated financial management system to improve interoperability of the state's accounting, payroll, personnel and budgeting systems. The overall goal of the integrated financial management system initiative is to use integrated state-of-the-art technology to reduce government's inefficiency in this area by replacing the old legacy systems.

A reserve policy has been established in the state's pension fund, the vesting period for retirement has been lowered and a defined contribution (DC) plan has been authorized. The defined benefit (DB) plan remains in effect with employees having a choice between DC and DB plans. Certain other benefits were also improved. The DC plan goes into effect July 1, 2002.

TABLE 10 (continued)

Georgia

The state has created a technology authority. There continues to be an ongoing external performance audit of state agencies. All state agencies now use PeopleSoft.

Kentucky

During the 2000 regular session, the Kentucky General Assembly directed the executive branch to develop a more formal process of managing for results. Direction is provided to the Office of the State Budget Director to implement a statewide strategic planning process resulting in four-year strategic plans for each cabinet agency. These plans are to be submitted with agency budget requests for the 2002-2004 biennium. In addition, the Office of the State Budget Director is directed to develop a pilot performance budgeting process in which three to six agencies will be required to submit budget requests under the existing budget framework as well as under the pilot performance budgeting framework.

The state just completed its first year of implementation of a new integrated financial, procurement and materials management system. One component of that implementation was a new budget system. All agencies, the Kentucky Office of State Budget Director and the legislative branch during the 2000-2002 biennial budget process used the budget system.

SOUTHWEST

Arizona

Arizona has just completed phase two of a three-phase, six-year migration to program budgeting. The automated budgeting system was modified to reflect this.

New Mexico

Beginning in fiscal 2001, the state expanded its revenue chart of accounts. The biggest changes in budget processes result from the implementation of the Accountability in Government Act (AGA). This act provides for performance-based program budgeting. Appropriations and budgets will change from an incremental system of budgeting by categories within divisions of agencies to one based on outcome measures—setting and achieving targets to meet program purposes. The intent is that budgets will be established with fewer categories and more flexibility relative to the authority to transfer budget between programs and/or categories.

ROCKY MOUNTAIN

Montana

The Department of Administration is developing an alternative state employee pay and classification system for selected groups of employees. The state also implemented an automated budgeting system in 1998. New financial and human resource systems were implemented in fiscal 2000.

Wyoming

The executive and legislative branches conducted a joint interim study of expenditures/revenues.

FAR WEST

California

The Department of Child Support Services was established to administer the child support enforcement program, previously administered by the Department of Social Services. As a related matter, the Franchise Tax Board took over development of the statewide automated child support system from the Health and Human Services Agency Data Center

California has implemented the requirements of the federal Workforce Investment Act (WIA) of 1998, which repealed the Job Training Partnership Act (JTPA) and established new requirements for employment and training programs for adults, disadvantaged youth and dislocated workers. As required under WIA, the Governor has established the California Workforce Investment Board (CWIB) to replace the State Job Training Coordinating Council, which gave policy direction for the JTPA program. The CWIB will provide policy guidance for the state's implementation of WIA and work closely with the Local Workforce Investment Areas, which the CWIB has designated, in statewide implementation of WIA.

State transportation finance was augmented by a \$6.9 billion-diversion of funds from the general fund: \$5.4 billion for specific projects (will leverage other state, local, federal and private funds) and \$1.5 billion to augment public transit, formula allocations for state and local capital projects, and local streets and roads maintenance. The plan is funded over six years.

Nevada

An initiative of the Governor, a long-range revenue and expenditure forecast was done after the close of the legislative session. Agencies did much of the input of their budget requests into the budget system in summer 2000, more than a year after the legislative session.

Oregon

Legislation passed that requires the Governor to present 10-percent reductions in all funds based upon cost benefits.

TERRITORY

Puerto Rico

An early retirement window for state employees was created.

CHAPTER FOUR

Though strong economic times have allowed states to build up balances, cut taxes, and make significant investments in education and infrastructure, recent indicators reflect a major turning point. The state fiscal outlook has become more clouded due to slowing revenue growth and the resurgence of Medicaid growth. Overall, this economic slowdown could be cause for concern, as it will restrict governors from using budgets to pursue their top policy priorities.

Findings in an ad-hoc survey just completed by NASBO show weakening in the fiscal outlook for both the current and next fiscal year for most states. Though states have experienced strong revenue growth over the last several years with budgets not affected by universal cost drivers, the moderate slowdown in state revenue growth and escalating state Medicaid costs will force many states to adjust budgets.

NASBO found the following trends for fiscal 2001 and 2002:

About one-half of the states assume general fund revenue growth for fiscal 2002 will be lower than current year estimates. On average, the decline in estimated revenue is approximately 1 percent, although several states indicate a much steeper decline from fiscal 2001 to fiscal 2002.

Revenue sources most likely to generate lower revenue in fiscal 2002 include individual income taxes, corporate income taxes and sales taxes.

About one-half of the states estimate that Medicaid spending will exceed current projections. The most cited reasons for this are renewed caseload growth, significant increases in prescription drug costs, long-term care, and a general increase in medical costs.

A modest number of states are being forced to reduce current year appropriations and make other adjustments to maintain balanced budgets.

The strong economy of the past several years has allowed states to invest more in areas such as elementary and secondary education. Spending in these areas grew by 9.1 percent from fiscal 1999 to fiscal 2000. Elementary, secondary, and higher education investments consumed close to one-third of spending

from all funding sources and almost one-half of general fund spending. States not only increased investments in education and general infrastructure, but they cut taxes by \$27.3 billion from fiscal 1995 to fiscal 2000.

Growth in Medicaid Spending. The NASBO survey results found that Medicaid expenditures are, once again, absorbing greater amounts of state resources. Overall total state health care spending accounts for about 27 percent of total state spending. Of this, Medicaid itself accounts for nearly 20 percent of total state spending. Factors affecting Medicaid and total state health care spending include:

increases in pharmaceutical prices and utilization;

increases in enrollment due to outreach efforts in states' children's health insurance programs (SCHIP);

federal law requirements requiring standardization of reporting;

court decisions affecting the costs for the disabled population.

Other Major Trends. While the economy is expected to continue to witness real economic growth of about 3 percent, this is a significant reduction from the recent past growth of more than 5 percent.

Fiscal 2000 net tax collections were 3.2 percent higher than the estimates originally used in adopting state budgets. For fiscal 2001, sales, personal, and corporate income tax collections were projected to be nearly 4.2 percent above last year's collections. However, this estimate may be too optimistic. Less stock market capital gains, slower growth in corporate profits, and a pullback by consumers will all impact state revenues as the economy slows. These will likely impact all state revenue sources—sales taxes, personal income taxes, and corporate profit taxes.

States have built balances including rainy-day funds and ending balances during the strong economic times. Balances grew from 1.1 percent of expenditures in fiscal 1991 to 9.2 percent in fiscal 1998. Projections show balances will be 6.2 percent in fiscal 2001.

Special Feature: State Spending on Information Technology (IT)

State uses of information technology have been rapidly increasing over the past five years across a broad range of applications that allow states to automate processing systems and provide information and services via the Internet. Information technology (IT) spending has risen rapidly as a percentage of state budgets represented primarily through agency appropriations. As IT spending continues to grow in state budgets and chief information officers begin to assume management responsibilities for IT investments across state agencies, states are beginning to track overall IT spending.

For the first time, states were asked to provide information on total budget outlays for IT (see Table 11). Thirty states provided figures indicating average per state expenditures of \$185 million annually, ranging from an average low of \$2.8 million to an average high of \$621 million.

Other responding states indicated a broad range of IT priorities and approaches to investing.

Twenty-nine states are partnering with the private sector through a series of agreements and mechanisms that leverage state investments in infrastructure and IT services, particularly those that focus on improved citizen access and service.

Thirty-one states are providing postsecondary distance learning opportunities including accredited college courses via the Internet or other interactive venues.

Thirty states have implemented information technology solutions for streamlining business permitting, licensing, regulation and reporting that include online transactions, integrated one-stop business assistance and access to supportive resources.

NOTES TO TABLE 11

Arizona The manner in which the Arizona legislature appropriates funds does not allow for the identification of all dollars designated for information technology (IT).

California These figures are from an annual survey conducted in January and February 2000 of state departments and do not include telecommunications expenses related to IT. Figures also exclude IT expenses for certain state departments that did not respond to the survey. At least 90 percent of the departments that make significant investments in IT

are included in the totals.

Florida currently does not have a mechanism for tracking IT expenditures. However, the Florida legislature recently passed a bill (Chapter 2000-164, Laws of Florida) that implemented the "Uniform Electronic Transaction Act." This bill created the State Technology Office (STO) to be headed by a chief information officer appointed by the Governor, centralizing the management of IT resources for state agencies. The STO will coordinate the purchase, lease, and Florida use of all IT services for state agencies; will be responsible for integrating the IT systems and services of state agencies; and will be responsible for the inventory, purchasing, and fiscal accountability for all state agency IT resources. As a result of this act, Florida will be able to more accurately identify and monitor all IT expenditures

during the coming year.

Idaho Numbers represent actual expenditures for the categories of operating expenditures and capital outlay. State does not collect personnel cost data for IT staff. Idaho does not appropriate at this level of detail, so no numbers are

available for fiscal 2001 for any expenditure category.

The stated amounts are from a new annual survey conducted by the Illinois Technology Office begun in April 2000. The amounts include IT services, hardware, software, IT training, telecom costs associated with data transfer only, and IT professional services/consultants. These amounts do not include education. Illinois

Montana Approximately \$50 million per year in 2000 and 2001 for new initiatives. Doesn't include base budget spending.

New York At this time, New York does not have an accurate accounting of its IT expenditures. The state budget and state

comptroller's accounting system are not set up to track specific IT-related expenditures. However, the Office for Technology has been given a statutory mandate to conduct a statewide technology inventory and will be conducting

this inventory over the coming months.

These figures include only appropriations that are specifically identifiable as IT-related expenses. They include Rhode Island

expenditures for hardware, software, telecommunications, computer supplies and agency expenditures for the state's central IT rotary (enterprise) fund. These figures do not include expenditures for direct staff assigned to IT, except for the central IT rotary personnel, nor for contractors or consultants hired for specific IT projects. These expenses are not easily segregated from the overall expenditures for these categories so they have not been

included.

Washington Data processing costs only.

West Virginia IT is embedded in each state agency's appropriations so this information is not available.

NOTES: NA indicates data are not available. *In these states, the ending balance includes the balance in the budget stabilization fund. **See Notes to Table A-1.

NOTES TO TABLE A-1

For all states, unless otherwise noted, transfers into budget stabilization funds are counted as expenditures and transfers from budget stabilization funds are counted as revenues.

Revenue adjustments reflect constitutional budget reserve draw. Alaska

Revenue adjustments reflect a transfer to the highway users tax fund. These monies can be diverted for general fund Colorado

appropriations if necessary.

Connecticut Figures include federal reimbursements such as Medicaid.

Delaware Ending balance does not include continuing appropriations or encumbrances.

Idaho Revenue adjustments include a \$2-million transfer to the Permanent Building Fund, \$805,000 to the Fire Suppression

Fund, and \$281,900 in other fund transfers.

The beginning balance includes the amount (in this year, \$240 million) set aside from the general fund into the tuition reserve account to cover the first distribution of K-12 funding in the new fiscal year. Expenditure adjustments reflect Indiana

one-time expenditures for pensions; highway, street and road construction and repair; funding of local auto excise tax and property tax cuts; some capital projects; and contingencies for the Year 2000 computer hardware and software

upgrade and replacement effort.

Kansas Revenues are adjusted for released encumbrances. Kansas does not have a separate rainy day fund. However, state

statute requires that the Governor's recommended budget and the final approved budget maintain an ending balance

of at least 7.5 percent of expenditures.

Revenue adjustments represent appropriation balances carried over from the prior fiscal year. Expenditure Kentucky

adjustments represent appropriation balances forwarded to the next fiscal year.

Louisiana Revenue adjustments reflect carry-forward balances. The Lottery Proceeds Fund is included in the general fund for

reporting purposes because those funds are available for general purposes.

Revenue adjustments reflect \$-59.0 million in legislative and statutorily authorized transfers. Expenditure adjustments Maine

reflect \$-106.3 million in prior year transactions and balances.

Maryland Revenue adjustments reflect transfers from the rainy day fund.

"General fund" is the aggregate of the general, highway and local aid funds. Massachusetts uses its three major funds Massachusetts

in the manner most states (which typically have far fewer dedicated, minor funds) use just their general fund. "Undesignated balance" is statutorily defined as the carry-forward of 0.5 percent of the preceding fiscal year's tax revenues to the current fiscal year. Expenditures are adjusted for lapsed and continued appropriations and for certain

statutorily required year-end transfers.

Michigan Revenue adjustments reflect transfers and restatements to the beginning fund balance. Expenditure adjustments

reflect the statutorily mandated transfer of the unreserved fund balance to the rainy day fund.

Revenues reflect a \$1.29-billion sales tax rebate subtracted from revenues. Ending balances reflect a cash flow Minnesota

account of \$350 million, a budget reserve of \$622 million, a property tax reform account of \$328 million and other

reserves of \$242.4 million.

Nebraska Revenue adjustments are transfers between the general fund and other funds. Expenditure adjustments are

carryovers from prior years.

Revenue adjustments reflect bond refinancing. Expenditure adjustments reflect reversions and adjustment to the fund Nevada

Ohio

New Hampshire Revenue adjustments reflect a \$124.8-million transfer to the local education betterment fund and a \$5.3-million

transfer to the health care transitions fund.

New York The ending balance includes \$473 million in tax stabilization reserve funds (rainy day funds) and \$107 million in

reserve funds for litigation risks. In addition to general fund reserves, \$1.8 billion was reserved for the Governor's

statewide property tax relief program.

Revenue adjustments reflect reserves authorized for repairs and renovations of \$145 million, clean water North Carolina

management of \$47.4 million and the disproportionate share reserve of \$35.4 million. Expenditure adjustments reflect \$150 million for the repairs and renovations reserve, \$31 million for clean water management and \$37 million for

capital improvement.

The expenditure adjustment of \$17 million reflects money transferred to the budget stabilization fund in the 1997-1999 biennium and subsequently transferred to the Bank of North Dakota. Contingency funds of \$40 million are available North Dakota

from the Bank of North Dakota should a revenue shortfall occur in the 1999-2001 biennium.

Federal reimbursements for Medicaid and other human services programs and TANF federal block grant funds are rederal reimbursements for Medicaid and other numan services programs and TANF rederal block grant funds are included in the general revenue fund. Beginning balances are undesignated, unreserved funds. The actual cash balances would be higher by the amount reserved for encumbrances and designated transfers from the general revenue fund, including transfers to the budget stabilization fund. Expenditures for fiscal 1999 do not include encumbrances outstanding at the end of the year. Ohio reports expenditures based on disbursements for the general revenue fund. Expenditure adjustments reflect a transfer to the income tax reduction fund of \$293.3 million, a transfer to the budget stabilization fund of \$46.4 million, a transfer to the school building assistance fund of \$325.7 million, a transfer to SchoolNet Plus of \$85.4 million, a transfer for Interactive Video Distance Learning of \$4.6 million and other miscellaneous transfers-out, totaling \$239.3 million. These transfers-out are adjusted for a net change in encumbrances from fiscal 1998 levels of \$-28.9 million.

Oklahoma Revenue adjustments are transfers to or from the general revenue cash-flow reserve fund.

Oregon Due to differences in the accrual versus cash methods of accounting, the beginning balance has been adjusted to

agree with the September 1999 revenue forecast.

NOTES TO TABLE A-1 (continued)

Revenue adjustments include changes to the beginning balance of \$65,000 and lapses from prior-year appropriations of \$118.2 million. Expenditures reflect the total amount appropriated. Expenditure adjustments include the addition of current-year lapses of \$104.2 million and the transfer to the rainy day fund of \$255.4 million, which actually occurs in the following year. The rainy day fund equals a year-end balance of \$685.5 million plus that year's transfer of \$255.4 million from the general fund, which actually occurs during the following year. Pennsylvania

Rhode Island The general fund reflects general revenue receipts and expenditures only. Total revenues are net of transfers to the

budget reserve fund.

South Dakota Revenue adjustments include transfers from the budget reserve fund and obligated cash carried forward. Expenditure adjustments include transfers to the budget reserve fund, property tax reduction fund and other funds. Expenditures

also include future obligations of cash.

Tennessee The beginning balance includes \$203.5 million reserved to fund appropriations and \$44 million unreserved. Revenue adjustments reflect a \$51.6-million transfer from the debt service fund for unexpended appropriations and a

\$156.9-million reduction in unexpended revenues reserved for future dedicated expenditures. Expenditure adjustments reflect a \$25.6-million transfer to the rainy day fund. The ending balance includes \$61.4 million reserved

to fund appropriations and \$28.1 million unreserved.

Utah Revenue adjustments reflect a net budget carry-forward of \$16.5 million, transfers of \$4.8 million, a transfer to the

rainy day fund of \$-0.7 million and other adjustments of \$0.1 million.

Vermont

Revenue adjustments reflect direct applications and transfers in and property tax transfers out. Expenditure adjustments reflect transfers to the budget stabilization reserve, education fund reserve, debt service reserve, general fund surplus reserve and human services caseload reserve. Expenditure adjustments also reflect transfers from the

GAAP deficit offset reserve and the transportation fund. Numbers may not add due to rounding.

Revenue adjustments reflect dollars above the I-601 Expenditure Limit that are transferred to the Emergency Reserve Washington

Account.

The beginning balance reflects \$92.5 million in reappropriations, \$3.2 million in surplus appropriations and a \$29.5-million unappropriated surplus balance. Revenue adjustments reflect \$0.2 million in prior-year redeposits, a West Virginia

\$7.5-million transfer from the rainy day fund, a \$14.5-million transfer from the income tax refund reserve and a \$1.3-million transfer from special révenúe. Expenditures reflect \$2.5 billion in regular appropriations, \$50.8 million in reappropriations, \$11.5 million in surplus appropriations and \$23.7 million in prior-year expenditures. Expenditure

adjustments reflect a transfer to the rainy day fund.

Wisconsin Revenue adjustments include designated balances carried forward from fiscal 1998 of \$55.8 million. Expenditure

adjustments include designations for continuing balances for fiscal 2000 totaling \$11.1 million.

Wyoming Revenue adjustments reflect interfund transfers from the budget reserve account, the legislative royalty account, and

the statutory reserve account.

NOTES: NA indicates data are not available. *In these states, the ending balance includes the balance in the budget stabilization fund. **See Notes to Table A-2.

NOTES TO TABLE A-2

Maine

For all states, unless otherwise noted, transfers into budget stabilization funds are counted as expenditures and transfers from budget stabilization funds are counted as revenues.

Revenue adjustments reflect constitutional budget reserve draw. Alaska

Colorado Revenue adjustments reflect a transfer to the highway users tax fund. These monies can be diverted for general fund

appropriations if necessary.

Connecticut Figures include federal reimbursements such as Medicaid.

Delaware Ending balance does not include continuing appropriations or encumbrances.

Revenue adjustments include a \$10-million transfer to the School Safety and Health Revolving Loan Fund, \$2.5 million to the Permanent Building Fund, \$1.8 million to the Fire Suppression Fund and \$594,500 in other fund transfers. Idaho

Expenditure adjustments reflect one-time expenditures for pensions; highway, street and road construction and repair; Indiana

funding of local auto excise tax and property tax cuts; some capital projects; contingencies for the Year 2000 computer hardware and software upgrade and replacement effort; and extraordinary funding for higher education information

technology.

Kansas Revenues are adjusted for released encumbrances. Kansas does not have a separate rainy day fund. However, state

statute requires that the Governor's recommended budget and the final approved budget maintain an ending balance

of at least 7.5 percent of expenditures.

Revenue adjustments represent appropriation balances carried over from the prior fiscal year. Revenues include Kentucky

\$142.2 million in tobacco settlement phase-one payments. Expenditure adjustments represent appropriation balances

forwarded to the next fiscal year.

Louisiana Revenue adjustments reflect carry-forward balances. The Lottery Proceeds Fund is included in the general fund for reporting purposes because lottery proceeds funds are available for general purposes.

Revenue adjustments reflect \$-14.8 million in legislative and statutorily authorized transfers. Expenditure adjustments

reflect \$-8.4 million in prior year transactions and balances.

Maryland Revenue adjustments reflect transfers from the rainy day fund.

"General fund" is the aggregate of the general, highway and local aid funds. Massachusetts uses its three major funds Massachusetts

in the manner most states (which typically have far fewer dedicated minor funds) use just their general fund. "Undesignated balance" is statutorily defined as the carry-forward of 0.5 percent of the preceding fiscal year's tax revenues to the current fiscal year. Expenditures are adjusted for lapsed and continued appropriations and for certain

statutorily required year-end transfers.

Revenue adjustments include decreases reflected in tax law changes in fiscal 1999 and prior years, tax law and recommended changes in fiscal 2000, and increases reflected in other adjustments. Expenditure adjustments reflect Michigan

enacted supplemental appropriations and the statutorily mandated transfer of the unreserved fund balance to the

rainy day fund.

Revenues include a \$647.4-million sales tax rebate subtracted from revenues. Ending balances reflect a cash flow account of \$350 million, a budget reserve of \$622 million and other reserves of \$144.7 million. Minnesota

Mississippi Fifty percent of the prior-year ending balance is directed by statute to the education enhancement fund.

Revenue adjustments represent residual equity transfers and adjustments made after the close of books for fiscal 2000 to correct recording errors. Expenditure adjustments represent changes in reserves for long-term advances and Montana

encumbrances.

Nebraska Revenue adjustments are transfers between the general fund and other funds. Expenditure adjustments are

carryovers from prior years.

Nevada Expenditure adjustments reflect reversions and adjustments to the fund balance.

New York The ending balance includes \$547 million in tax stabilization reserve funds (rainy day funds), \$107 million in reserve funds for litigation risks, and \$250 million in debt reduction reserve funds. In addition to general fund reserves, \$1.8

billion was reserved for the Governor's statewide property tax relief program.

Revenue adjustments include a reserved fund balance of \$150 million for repairs and renovations, \$31.1 million for North Carolina the clean water management trust fund, \$286 million transferred from the rainy day fund for Hurricane Floyd disaster relief and \$200 million for intangible tax settlement. Expenditure adjustments include \$1 million allocated to the rainy

day fund and \$2.9 million allocated to the repairs and renovations reserve from the end-of-year unreserved credit

balance, \$240 million allocated to an intangible tax reserve, \$1.2 million allocated to disproportionate share receipt reserve and \$1.1 million remaining in the clean water management trust fund reserve.

Ohio

Federal reimbursements for Medicaid and other human services programs and TANF federal block grant funds are included in the general revenue fund. Beginning balances are undesignated, unreserved fund balances. The actual cash balances would be higher by the amount reserved for encumbrances and designated transfers from the general revenue fund, including transfers to the budget stabilization fund. Expenditures for fiscal 2000 do not include encumbrances outstanding at the end of the year. Ohio reports expenditures based on disbursements for the general revenue fund. Expenditure adjustments reflect a transfer to the budget stabilization fund of \$49.2 million, miscellaneous transfers-out of \$58.1 million and a \$610.5-million transfer to the income tax reduction fund. These transfers-out are adjusted for a net change in encumbrances from fiscal 1999 levels of \$-114.6 million.

Oklahoma Revenue adjustments are transfers to or from the general revenue cash-flow reserve fund and transfers to the rainy

day fund.

Oregon Expenditures includes preliminary actual paid amounts.

NOTES TO TABLE A-2 (continued)

Vermont

Revenue adjustments include lapses from prior-year appropriations of \$124.3 million. Expenditures reflect the total amount appropriated. Expenditure adjustments include the addition of current-year lapses of \$131 million and the transfer to the rainy day fund of \$107.7 million, which actually occurs in the following year. The rainy day fund equals the year-end balance of \$989.7 million plus that year's transfer of \$107.7 million from the general fund, which actually seem that the following year. Pennsylvania

occurs during the following year.

Rhode Island The general fund reflects general revenue receipts and expenditures only. Total revenues are net of transfers to the

budget reserve fund.

South Dakota Revenue adjustments include transfers from the budget reserve fund and obligated cash carried forward. Expenditure adjustments include transfers to the budget reserve fund, property tax reduction fund and other funds. Expenditures

also include future obligations of cash.

Tennessee Revenue adjustments reflect a \$35-million transfer from the debt service fund for unexpended appropriations and a \$15-million transfer from Tennessee Housing Development Agency earmarked tax revenue. Expenditure adjustments reflect a \$38.1-million transfer to the rainy day fund. The ending balance is reserved to fund appropriations.

Revenue adjustments reflect a net budget carry-forward of \$-29.0 million, transfers of \$0.9 million, a transfer to the Utah

rainy day fund of \$-9.2 million and other transfers of \$2 million.

Revenue adjustments reflect direct applications and transfers in. Expenditure adjustments reflect transfers to the budget stabilization reserve, general fund surplus reserve, Medicaid reimbursement administrative fund, Vermont Health Access Plan trust fund, human services caseload reserve and transfers from the general fund surplus reserve

for school construction

Revenue adjustments reflect dollars above the Initiative 601 expenditure limit that are transferred to the emergency Washington

reserve account.

The beginning balance reflects \$103.4 million in reappropriations, \$14.6 million in surplus appropriations and a \$38-million unappropriated surplus balance. Revenue adjustments reflect \$0.2 million in prior-year redeposits and a West Virginia

\$7.2-million transfer from special revenue. Expenditures reflect \$2.5 billion in regular appropriations, \$47.7 million in reappropriations, \$11.8 million in surplus appropriations and \$23 million in prior-year expenditures. Expenditure

adjustments reflect a transfer to the rainy day fund.

Wisconsin Revenue adjustments include \$64-million from the computer escrow fund, \$66.1 million from other funds and \$11.5

million from prior-year designation of continuing balances. Expenditure adjustments include \$36.6 million in designations for biennial appropriations not spent but carried forward to fiscal 2001.

Revenue adjustments reflect interfund transfers from the budget reserve account, the legislative royalty account and Wyoming

the statutory reserve account.

NOTES: NA indicates data are not available. *In these states, the ending balance includes the balance in the budget stabilization fund. **See Notes to Table A-3.

NOTES TO TABLE A-3

Kentucky

For all states, unless otherwise noted, transfers into budget stabilization funds are counted as expenditures and transfers from budget stabilization funds are counted as revenues.

Revenue adjustments reflect constitutional budget reserve draw. Alaska

Revenue adjustments reflect a transfer to the highway users tax fund. These monies can be diverted for general fund appropriations if necessary. Colorado

Figures include federal reimbursements such as Medicaid. Connecticut

Ending balance does not include continuing appropriations or encumbrances. Delaware

Revenue adjustments include a \$17.1-million transfer to the budget stabilization fund. Idaho

Indiana Expenditure adjustments reflect one-time expenditures for pensions; highway, street and road construction and repair;

funding of local auto excise tax and property tax cuts; some capital projects; contingencies for the Year 2000 computer hardware and software upgrade and replacement effort; and extraordinary funding for higher education information

Kansas Kansas does not have a separate rainy day fund. However, state statute requires that the Governor's recommended

budget and the final approved budget maintain an ending balance of at least 7.5 percent of expenditures.

Revenue adjustments represent appropriation balances carried over from the prior fiscal year. Revenues include \$101.1 million in tobacco settlement phase-one payments. Expenditure adjustments represent appropriation balances

forwarded to the next fiscal year.

Lottery Proceeds Fund is included in the general fund for reporting purposes because lottery proceeds funds are available for general purposes. Louisiana

Revenue adjustments reflect \$-1.9 million in legislative and statutorily authorized transfers. Maine

Massachusetts

"General fund" is the aggregate of the general, highway and local aid funds. Massachusetts uses its three major funds in the manner most states (which typically have far fewer dedicated minor funds) use just their general fund. "Undesignated balance" is statutorily defined as the carry-forward of 0.5 percent of the preceding fiscal year's tax revenues to the current fiscal year. Expenditures are adjusted for estimated lapsed appropriations.

Revenue adjustments include decreases reflected in tax law changes in fiscal 1999 and prior years, tax law and recommended changes in fiscal 2000 and increases reflected in other adjustments. Michigan

Ending balances reflect a cash flow account of \$350 million, a budget reserve of \$622 million and other reserves of \$145.3 million. Minnesota

Fifty percent of the prior-year ending balance is directed by statute to the education enhancement fund. Mississippi

Amounts are based on legislative actions after the May 2000 special legislative session. Revenue adjustments represent residual equity transfers. Montana

Revenue adjustments are transfers between the general fund and other funds. Expenditure adjustments are carryovers from prior years and a small estimate of deficit needs (\$5 million). Nebraska

Revenue adjustments reflect changes in sales tax commissions and the repeal of the permanent net proceeds fund. Expenditure adjustments reflect anticipated reversions. Nevada

Revenue adjustments reflect the planned deposit of an additional \$75 million into the state's tax stabilization reserve fund (rainy day fund). The ending balance includes \$547 million in tax stabilization reserve funds (rainy day funds) and \$150 million in reserve funds for litigation risks. In addition to general fund reserves, \$1.2 billion is reserved for the Governor's statewide property tax relief program and \$250 million for debt reduction in fiscal 2002. New York

The expenditure adjustment includes emergency spending appropriated in the 1999-2001 biennium, but actually expended in the 1997-1999 biennium, and a contingency appropriation that will not be spent. North Dakota

Ohio

Federal reimbursements for Medicaid and other human services programs and TANF federal block grant funds are included in the general revenue fund. Beginning balances are undesignated, unreserved fund balances. The actual cash balances would be higher by the amount reserved for encumbrances and designated transfers from the general revenue fund, including transfers to the budget stabilization fund. Expenditures for fiscal 2001 do not include encumbrances outstanding at the end of the year. Ohio reports expenditures based on disbursements for the general revenue fund. Expenditure adjustments reflect a transfer to the budget stabilization fund of \$44.1 million, miscellaneous transfers-out of \$97.2 million and a transfer of \$166.1 million to the income tax reduction fund.

Oklahoma Revenue adjustments are transfers to or from the general revenue cash-flow reserve fund.

Expenditures are calculated using the budget adjustments report through June 2000. Some fund estimates are through Oregon

Expenditures reflect the total amounts appropriated. Expenditure adjustments include the projected transfer to the rainy day fund of \$2.2 million, which actually occurs in the following year. The rainy day fund equals year-end balance of \$1.097 billion, plus this year's transfer of \$2.2 million from the general fund, which actually occurs during the following fiscal year. Pennsylvania

The general fund reflects general revenue receipts and expenditures only. Total revenues are net of transfers to the budget reserve fund. Figures also include reappropriations recommended by the Governor. Rhode Island

Figures do not include tobacco settlement funds. Supplemental appropriation bills are pending the Governor's South Carolina

signature.

Revenue adjustments include transfers from the budget reserve fund and obligated cash carried forward. Expenditure adjustments include transfers to the budget reserve fund, property tax reduction fund and other funds. Expenditures South Dakota

also include future obligations of cash.

NOTES TO TABLE A-3 (continued)

Expenditure adjustments reflect a \$12.9-million transfer to the rainy day fund. The ending balance is unreserved. Tennessee

Operates under a biennial budget. Revenue and spending are projected for a two-year period. Texas

Revenue adjustments reflect a net budget carry-forward of \$57.9 million, transfers of \$3.8 million and other minor transfers of \$2.1 million. Utah

Vermont Revenue adjustments reflect direct applications and transfers in. Expenditure adjustments reflect transfers to the

budget stabilization reserve, school construction reserve, general fund surplus reserve, housing and conservation

trust fund and transfers from the general fund surplus reserve for school construction.

West Virginia

The beginning balance reflects \$110.2 million in reappropriations, \$4 million in surplus appropriations and a \$33.9-million unappropriated surplus balance. Revenue adjustments reflect \$0.2 million in prior year redeposits. Expenditures reflect \$2.7 billion in regular appropriations, \$110.2 million in reappropriations, \$4 million in surplus appropriations and \$26.2 million in prior-year expenditures. Expenditure adjustments reflect a transfer to the rainy

day fund.

Wyoming Revenue adjustments reflect interfund transfers from the budget reserve account, the legislative royalty account, and

the local government capital construction account.

NOTES: *Fiscal 2000 reflects changes from fiscal 1999 expenditures (actual) to fiscal 2000 expenditures (preliminary actual). Fiscal 2001 reflects changes from fiscal 2000 expenditures (preliminary actual) to fiscal 2001 expenditures (appropriated). **See Notes to Table A-4.

Michigan

The general fund percentage changes for each year do not include the expenditure each year do not include the expenditure adjustments reported on Tables A-1 and A-2. Those include enacted supplemental appropriations and deposits to the rainy day fund. With these added expenditures, fiscal 1999 total spending is \$9,666 million and fiscal 2000 total spending is \$9,653 million, resulting in expenditure changes from fiscal 1999 and fiscal 2000 of -0.1 percent and 0.9 percent, respectively. percent, respectively.

TABLE A-5

State Employment Compensation Changes, Fiscal 2001

Region and State	Across- the-Board	Merit	Other	Notes
NEW ENGLAND				
Connecticut	3.5%			The wage pattern includes a 3.5-percent general wage increase plus an annual increment for applicable employees.
Maine		1.4%	6.0%	The 6 percent for other consists of 2 percent for the whole year and a 4 percent step increase for half of the year. Merit is a weighted average. Employees who reach the top step do not receive further merit increases.
Massachusetts			*	Collective bargaining agreements covering more than 90 percent of classified employees, excluding those in higher education, provide for fiscal 2001 across-the-board increases of 2.5 percent to 3 percent in addition to various bonuses and other economic benefits. Most classified employees are eligible for annual step increases that are tied to performance evaluations.
New Hampshire	3.0%			
Rhode Island			1.7%	A cost-of-living adjustment is presently under negotiation. "Other" reflects an increase from revised fiscal 2000 figures and primarily represents step and longevity increases on salary costs, as prescribed by the state's classification system.
Vermont	3.0%		2.0%	An across-the-board increase of 3 percent is effective July 2000. Per the state employee contract, annually about 56 percent of employees receive step increases, in aggregate worth about 2 percent of statewide salary costs.
MID-ATLANTIC				
Delaware	3.0%			Employees are eligible for a state match of up to \$10 per pay period for employee contributions to the deferred compensation program after six months of participation, effective January 1, 2001.
Maryland	4.0%			All employees who perform up to standards receive a 2-percent or 4-percent increase on anniversary date depending on time in grade. Pay-for-performance bonuses are available on a case-by-case basis: \$1,000 for outstanding performance and \$500 for exceeding standards.
New Jersey	3.5%	1.5%		A 3.5-percent across-the-board increase was given to members of the Communications Workers of America, the largest state employees union. Union employees are also eligible for incremental step or anniversary increases ranging from 3.7 percent to 5 percent of salary, depending on the step in the range, for eight years in a given range, up to a maximum of that range. Because not all employees receive increments, the aggregate effect is 1.5 percent.
New York	3.0%			The next across-the-board salary increase of 3.5 percent is scheduled for April 1, 2001.
Pennsylvania	3.0%		2.2%	Most employees receive a 3-percent across-the-board increase effective July 1, 2000. Those employees not at the maximum step will receive a 2.2-percent longevity increase in January 2001.
GREAT LAKES				
Illinois				Non-union employees received a merit increase, which on average is expected to total 4 percent. Union employees received a step increase that equates to an average increase of 0.5 percent and a cost-of-living adjustment increase equal to the greater of \$100 per month or 3.5 percent.
Indiana	5.0%			
Michigan	2.0%			In addition to the 2-percent base pay increase, a one-time lump sum payment of \$375 per employee was made in October 2000.
Ohio	3.0%		2.5%	About one-half of all employees will receive a step increase of 4 percent to 5 percent. Employees with five or more years of service will receive an additional 0.5 percent times the number of years in service, up to a maximum of 20 years.
Wisconsin	3.7%		2.9%	Compensation increases vary by bargaining unit. Generally, the approved fiscal 2001 across-the-board increases equal 3.7 percent. "Other" reflects market adjustments awarded to select classifications. In fiscal 2001, market adjustments affect about 30 percent of the non-faculty/academic workforce, or about 16,000 employees. The percentage shown is for the total state workforce.

State Employment Compensation Changes, Fiscal 2001

Region/State	Across- the-Board	Merit	Other	Notes
PLAINS				
Iowa	3.0%	1.2%		
Kansas			2.5%	The 2.5-percent increase reflected in ôOtherö is for step movement on the pay matrix.
Minnesota	3.0%	3.5%	3.3%	Across-the-board increases average 3 percent; the merit increase applies to only 4 percent of workforce. "Other" is an annual step increase that employees receive according to bargaining unit and contract agreements. The step increases average 3.25 percent and apply to only two-thirds of employees who are not at the top of their range. Total is 5 percent when all factors are averaged in.
Missouri			2.0%	The compensation increase was given on a flat-dollar basis. The plan provides a \$50 per month increase beginning July 1, 2000. An additional \$35 per month increase is scheduled to take place January 1, 2001. "Other" reflects a one-step (average 2-percent) increase given on July 1, 2000. An additional roughly 2-percent increase was given July 1, 2000, for selected classes of social service workers, some nursing assistants in veterans homes and the state water patrol. The highway patrol received a substantial repositioning targeting entry-level troopers for an increase of about 15 percent and other ranks at between 6 percent and 8 percent.
Nebraska				Collective bargaining unit members received 2 percent on July 1, 2000, and movement to the next step on January 1, 2001. Nonmembers received 2 percent on July 1, 2000, and between 0 percent and 4 percent on January 1, 2001, based on performance.
North Dakota	3.0%			Across-the-board reflects a \$35 increase with the remainder based on merit and equity.
South Dakota	3.0%		2.5%	The 2.5-percent increase in "Other" represents the movement to job worth for employees who are under the midpoint of their job classifications.
SOUTHEAST				
Alabama	2.0%	5.0%		Merit raises are based on employee performance whether employee status in classification permits such raise and may range from 0 percent to 5 percent based on evaluation. "Other" consists of longevity pay ranges from \$300 to \$600 per employee based on number of years of state service.
Arkansas	2.8%		5.5%	"Other" reflects a career ladder incentive program with a 5.5 percent maximum for each eligible employee meeting competency-based criteria.
Florida	2.5%	*	*	The legislature provided an overall 2.5-percent across-the-board salary increase for state employees, and a 2-percent merit increase for law enforcement positions. Other special salary increases were provided for various employee groups, including attorneys, professional health care workers, and correctional officers.
Georgia		3.2%		Also improved salaries for selected classes.
Kentucky	5.0%			In addition to a 5-percent per year across-the-board increase, the Governor plans to raise the compensation of lower-paid state employees to a more equitable and competitive level. The plan raises the minimum pay for those jobs most out of line with the market. It creates a new salary schedule with a 10-percent difference in the entry-level wage of each pay grade. The plan also raises the entry-level wage of all pay grades an average of 7.4 percent for both years of the biennium.
Louisiana		4.0%		Classified employees receive an annual 4-percent merit increase, if warranted, until they reach their maximum salary level for their classification. Approximately 20 percent of the classified employees are at their maximum salary.
North Carolina	2.2%	2.0%		A \$500 lump-sum bonus will be awarded to state employees who were in service as of April 1, 2000, and who continue employment through October 1, 2000.
South Carolina	2.5%	1.0%		An across-the-board increase is effective July 1, 2000. Merit increases are effective on an employee's performance review date.
Tennessee	3.5%		1.8%	"Other" reflects the \$24.8-million total appropriation. Minimum and maximum salary rates increased by 1 percent at a cost of \$4 million. Specific classes upgraded at cost of \$20.8 million.
Virginia		3.3%		Employees receiving a "meets expectations" on their latest performance evaluations received a 3.25-percent increase on November 25, 2000.
West Virginia	*			Across-the-board reflects a \$756 increase for all state employees.

State Employment Compensation Changes, Fiscal 2001

Region/State	Across- the-Board	Merit	Other	Notes	
SOUTHWEST					
Arizona		2.0%	*	The legislature appropriated \$3.659 million for special market adjustments. The purpose of the funding is to address job classifications that show significant disparity from the equivalent classification in the market.	
New Mexico	1.8%	1.3%		The across-the-board increase reflects restructuring of pay ranges.	
Oklahoma	*			All state employees will receive an annual \$2,000 pay raise on October 1, 2000.	
Texas	4.2%	*	*	Texas provided all state employees a \$100 per month salary increase effective September 1, 1999 (i.e., fiscal 2000). This produced an estimate average increase of 4.24 percent, based on the average salary of a statemployee. A separate increase was not provided for in fiscal 200 although the fiscal 2000 increase continued through fiscal 2001. Statewick merit increases for fiscal 2001 are not available on a prospective basi Finally, Texas provided a \$3,000 recruitment/retention bonus for loworkers; however, statewide figures for fiscal 2001 are not available on prospective basis.	
ROCKY MOUNTAIN					
Colorado	3.8%			Classified employees receive a 5-percent anniversary increase, while 2.2 percent is budgeted for exempt employees. Anniversary increases are salary increases based on the advancement of permanent employees to the next salary step in the salary classification system. There are seven steps for each salary greade. Employees advance through these steps each year on the anniversary of their hire date. Employees can only move from step six to step seven after five years. Once in step seven, an employee will not receive an anniversary increase. The 3.8-percent across-the-board increase is the statewide average salary survey. The salary survey is the amount needed to cover the cost of salary increases based on a survey of job and wage classifications. Employees actually receive a percentage based on their classification.	
Idaho		3.5%			
Montana	3.0%			The state contribution for employee health insurance increases to \$15 per employee per month effective January 1, 2000, and by another \$10 per employee per month effective January 1, 2001.	
Utah	4.0%		1.1%		
Wyoming			*	\$2.6 million in general funds were appropriated for a \$25 increase in the employer contribution to employees' health insurance. \$18.2 million in general funds were appropriated for market pay increases. About 50 percent of employees received raises. The legislature authorized a \$10 increase in longevity payments, which were \$30 per month for each five years of service.	

State Employment Compensation Changes, Fiscal 2001

Region/State	Across- the-Board	Merit	Other	Notes
FAR WEST				
Alaska		3.0%	3.0%	The agreement covers classified and exempt executive branch employees, most of whom will receive merit increases. All employees receive one-time lump sum payments of \$1,200 prorated based on their 12-month full-time equivalent status, and all receive health insurance increase. The total of lump sum and health insurance is 3 percent of all personal services excluding the legislature, court system, and university.
California	4.0%			The state reached two-year agreements with all 21 bargaining units, representing approximately 164,000 state employees. The agreements, which will expire June 2001, provided a 4-percent general salary increase on July 1, 1999, special salary adjustments to various classifications, and an additional 4-percent general salary increase on August 31, 2000. Approximately 35,000 excluded (nonrepresented) employees also received a 4-percent general salary increase on July 1, 1999, and an additional 4-percent general salary increase on August 31, 2000. Merit salary increases of 5 percent are available to employees performing successfully and within an established salary range. Once an employee reaches the maximum within an established salary range for a position, additional merit adjustments are not possible.
Hawaii	*			For some bargaining units, an arbitration decision was no increase in fiscal 2001. Negotiations are continuing for other bargaining units.
Nevada	2.0%	2.0%		A 4-percent increase for merit was allocated, awarded to approximatly 50 percent of all employees. The average increase was 2 percent.
Oregon	2.0%	*		Merit increases average about 5 percent. About one-half of the state workforce is expected to receive merit increases.
Washington	3.0%			
TERRITORIES				
Puerto Rico	*			A salary raise of \$100 for state government employees and \$125 for all state police officers is effective January 1, 2001. Under the new teaching profession's law, the Department of Education will receive \$54 million for raises for teachers who fulfill the requirements it establishes.

NOTES: NA indicates data are not available.

^{*}See Notes to Table A-6.

^{**}Unless otherwise noted, fiscal 1999 reflects actual figures, fiscal 2000 reflects preliminary actual figures, and fiscal 2001 reflects appropriated figures.

NOTES TO TABLE A-6

Arizona All figures are appropriated. All figures are appropriated. Delaware

Figures reflect budgeted funds only. They are exclusive of an approximate average of 13,200 full-time equivalent (FTEs) funded from capital projects funds, various direct federal grants, expendable trusts and other nonappropriated funds, of which more than half are employed in public higher education and of 500-2,000 seasonal FTEs. Massachusetts

Nevada Fiscal 2000 figures reflect the authorized amount and the state's industrial insurance system. Fiscal 2001 figures are

authorized.

New Hampshire Figures include higher education faculty for vocational schools only.

New Jersey

Figures reflect full-time employees, not equivalents and include county courts. Approximately 650 employees will be added in fiscal 2001 primarily for the state police, juvenile services and corrections. The welfare system is administered at the county level, but the New Jersey Division of Family Development oversees and supervises the

welfare system.

New York Figures reflect end-of-year counts for annual and nonannual FTEs in the executive, legislative and judicial branches.

New York's welfare system is state-supervised but locally administered.

Rather than filled positions, the number represents the total authorized salaried complement on a FTE basis. The Pennsylvania

2000-2001 complement represents the authorization of 85,480 at the beginning of the current fiscal year, less reductions in state mental hospitals of 255 and in state mental retardation centers of 654 anticipated by June 30,

2001.

NOTES: NA indicates data are not available because, in most cases, these states do not have this type of tax. *See Notes to Table A-7.

**Unless otherwise noted, original estimates reflect the figures used when the fiscal 2000 budget was adopted, and current estimates

reflect preliminary actual tax collections.

***KEY: L=Revenues lower than estimates. H=Revenues higher than estimates. T=Revenues on target.

NOTES TO TABLE A-7

Michigan

Michigan does not have a corporate income tax but instead uses a value-added type tax known as the single business tax. Michigan voted to cut the rate of the single business tax after the May 2000 Consensus Revenue Estimating Conference.

Texas

Texas operates under a biennial budget. Revenue and spending are projected for a two-year period. Figures reflect the two-year estimate of tax revenue at the time the General Appropriations Act was certified. Sales tax collections include general and limited sales and use taxes as well as motor vehicle sales and rental taxes. Texas does not have a personal income tax. Franchise taxes comprise tax collections shown under corporate income taxes. Current estimates reflect the biennial amount adjusted for higher-than-anticipated sales tax revenue realized during fiscal 2000.

NOTES: NA indicates data are not available since, in most cases, these states do not have this type of tax.

^{*}See Notes to Table A-8.

**Unless otherwise noted, fiscal 2000 figures reflect preliminary actual tax collection estimates as shown in Table A-7, and fiscal 2001 figures reflect the estimates used in enacted budgets.

NOTES TO TABLE A-8

Massachusetts

Effective in fiscal 2001, one percentage point, or 20 percent, of most sales taxes are dedicated to support the operations of the authority that finances and operates mass transit facilities in eastern Massachusetts. Although these revenues are not budgetary receipts, the estimated \$645 million for fiscal 2001 is included here to facilitate

comparison across fiscal years.

Michigan does not have a corporate income tax but instead uses a value-added type tax known as the single business tax. Michigan voted to cut the rate of the single business tax after the May 2000 Consensus Revenue Estimating Conference. Michigan

Texas operates under a biennial budget. Revenue and spending are projected for a two-year period. Figures reflect the biennial amount adjusted for higher-than-anticipated sales tax revenue realized during fiscal 2000. Sales tax Texas

collections include general and limited sales and use taxes as well as motor vehicle sales and rental taxes. Texas does not have a personal income tax. Franchise taxes comprise tax collections shown under corporate income taxes. Projections reflect the biennial amount adjusted for higher-than-anticipated sales tax revenue realized during fiscal

TABLE A-9

State	Tax Change Description	Effective Date	Fiscal 2001 Revenue Changes (\$ in Millions)
	SALES TAXES		(ψ)
California	Creates a sales tax exemption for rural investment.	1/01	-5.0
Colorado	Reduces rates from 3 percent to 2.9 percent.	1/01	-37.2
	Exempts agricultural items from the sales and use tax.	7/00	-3.0
Connecticut	Increases the clothing exemption from \$50 to \$75.	7/00	-31.0
	Exempts college text books.	7/00	-3.5
	Establishes a sales tax holiday for items costing less than \$300.	7/00	-2.0
Florida	Creates a one-time sales tax holiday on clothing items costing less than \$100.	7/00	-41.2
	Creates exemptions related to entertainment facilities.	7/00	-12.7
	Creates an exemption for motion picture and video equipment.	7/00	-1.7
	Reduces the tax rate by 0.5 percent on selected agricultural equipment.	1/01	-1.7
	Creates a 25-percent exemption for research and development for defense and space technology.	7/00	-1.9
	Creates an exemption for 501(c)(3) organizations.	1/01	-10.1
	Creates miscellaneous exemptions with less than \$1 million in effect each.	7/00	-6.3
Hawaii	Provides pyramiding relief to amusement services and from the public services company tax.	1/00	-2.0
Illinois	Suspends the state sales tax on motor fuel for six months.	7/00	-150.0
Iowa	Establishes a sales tax holiday.	7/00	-3.0
Kansas	Exempts all sales of machinery and equipment used in the state as "integral or essential part of an integrated production operation by a manufacturing or processing plant or facility." Sales of installation, maintenance, and repair services performed on such machinery and equipment, including repair and replacement parts, are exempt.	7/00	-4.4
Kentucky	Extends the sales tax to interstate long distance.	1/01	23.6
Louisiana	Creates a 1-percent tax on food and utilities.	7/00	109.9
Maine	Repeal of the tax on snack foods.	1/01	-7.5
Maryland	Creates a tax-free week for sales of clothing and footwear items with taxable prices under \$100 in August 2001. The cost in fiscal 2002 is expected to be \$6.7 million.		
Michigan	Cuts the electricity tax rate.	6/00	-5.0
	Creates an airplane and parts exemption.	6/00	-2.4
	Eliminates end user line charges.	7/00	-16.8
Minnesota	Sales tax rebate for fiscal 2000.	6/00	-637.7
	Miscellaneous exemptions.	various	-2.8
New York	Creates various exemptions.	9/00	-23.2
Pennsylvania	Exempts the tax on fertilizer processing.	7/00	-2.7
	Exempts the tax on building maintenance.	7/00	-3.1
	Exempts the tax on pre-built housing.	7/00	-5.2
	Exempts the tax on home sewing patterns and fabric.		-0.2
	Allow bad debt credit.		-7.9
	Creates a sales tax holiday on computers.	8/00	-8.3
South Carolina	Creates a sales tax holiday.	8/00	-3.6
	Phases-in the elimination of the sales tax on food.	1/01	-24.6
Total Revenue C	Changes—Sales Taxes		\$-934.2

State	Tax Change Description	Effective Date	Fiscal 2001 Revenue Changes (\$ in Millions)
	<u> </u>	Bato	(ψ π πποπο)
Arkansas	PERSONAL INCOME TAXES Creates a 30-percent exclusion of capital gains realizations.	1/99	-15.0
California	Creates a refundable child care credit.	1/00	-195.0
Gamornia	Creates a personal income tax credit for teachers.	1/00	-218.0
	Creates a credit for long-term care providers for the elderly and disabled.	11/00	-43.0
	Creates an exclusion for employer-provided graduate student expenses.	1/00	-9.0
Colorado	Reduces rates from 4.75 percent to 4.63 percent.	1/00	-114.0
Colorado	Creates a tax exclusion for prepaid tuition payments.	1/01	-0.6
	Refunds the conservation easement credit.	1/01	-0.6
	Creates an exclusion from resident individual personal income taxes	1/01	-0.5
	Coloradoans absent for active military duty outside the U.S.		
Idaho	Initiates a one-year, 0.1-percent cut in the tax rate, eliminates the marriage tax penalty, adjusts tax brackets for inflation and increases the health insurance deduction for the self-employed.	1/00	-26.9
Illinois	Creates a final phase-in of the personal exemption increase and a tuition tax credit.		-190.0
Iowa	Creates a credit for historic preservation, research and career education.	7/00	-8.4
Louisiana	Limits itemized deductions and suspends the education credit.	1/00	85.2
Kentucky	Conforms with the Internal Revenue Code.	7/01	1.0
Maine	A \$6,000 exemption on public and private pensions, an earned income tax credit, and an increase in personal exemption (1/99).	1/00	-23.1
Maryland	Accelerates the refundable earned income credit percentage from 12.5 percent to 15 percent.	1/00	-13.0
	Liberalizes the child/dependent care tax credit.	1/01	-2.9
	Creates a tax credit for premiums paid for long-term care insurance.	1/00	-3.0
	Creates a research and development tax credit.	1/00	-6.0
Massachusetts	Begins a three-year phase-in of income tax deductions from 5.9 percent to 5.75 percent.	1/00	-166.0
