

The National School Health Data Set: Every Student Counts! Process for Affiliate Leaders

Local

- Encourage local school nurses (SN) to collect and use data; including *Every Student Counts!*.
- Encourage local SN to share their successes in using data and ask questions about concerns.
- Share infographics and data templates with SNs.

Affiliate/ State

- Support conference announcements and session(s)/trainings on data. Including data governance at the state and local level.
- Provide venues, other forums for affiliate members to share their experiences, and strategies for sharing data (i.e. listservs, roundtables, posters, or data special interest groups).
- Work with other SN leaders to identify all SNs public and private in your state.
- Include *Every Student Counts!* State Data Coordinator position on board to lead data effort.
- Create a culture of data driven practice to support advocacy and decision making (i.e. data themed conference and activities, identify advocacy issue supported by grassroots data to change policy or promote legislation).
 - *Identify data superusers.*
 - *Create a page on your website that includes your state level data resources.*
- Outreach to state departments of health and education, children's hospitals, and other partners (i.e. universities or non-profits) on data collaboration efforts; including creating an infrastructure for data collection.
 - *Know state level laws regarding data governance and sharing.*
- Set self-improvement goals focused on capacity building and advocacy.
- Share report of state level *Every Student Counts!* data with SNs.

National

- Inform NASN of key *Every Student Counts!* data points that influence policy change.
- Provide feedback and recommendations on what is working and areas for improvements.

Data increases knowledge and changes attitude.

“Reform can be accomplished only when attitudes are changed.”

–Lillian Wald, founder of school nursing
