

<b>Health Condition</b>	<b>RN/Student Ratio</b>	<b>Definition of Health Condition</b>	<b>Example of Health Condition</b>	<b>Requirements of the RN</b>
General Student Population Health Conditions	1:750	Students with intermittent acute illness/injury events & normal growth & development Students have physical &/or social emotional conditions that are currently uncomplicated &/or predictable	Injuries, Uncomplicated Asthma, Seizures that are stable, Allergies-with or without Epi-pen Some bleeding disorders Some Neurological conditions, Orthopedic conditions Heart conditions	Assessment by RN; referral for medical evaluation & treatment; health education; facilitate access to resources. Student monitoring, for biweekly to annually. Provides direction & training for emergency response at least annually.
Medically Complex	1:225	Students have a complex &/or social-emotional condition that requires daily treatments and close monitoring by a professional RN. Potential for Delegation of Nursing Task	All of the above with increased severity PLUS- Cancer conditions Diabetes I & II	RN available on a daily basis & gives oral/written instructions for care & treatment of the student, including transportation during the school day.
Medically Fragile	1:125	Students face daily the possibility of a life-threatening emergency requiring the skill and judgment of a professional nurse. Potential for Delegation of Nursing Task by an RN only	All of the above-PLUS Ex: Seizure w/Diastst & breathing impairment, Poorly managed diabetes, CP, GI tube, Port-A-Cath, etc	Full-time RN/LPM in the building/or on school campuses' (if more than one building closely adjoining another building)
Nursing Dependent	1:1	Students require 24 hours/day 1:1 skilled nursing assessment & care for survival; most are dependent on technological devices to avoid irreversible organ damage or death.	For example – Multi-complex student w/seizures, feeding tube, requires respirator, catheter, & oral suctioning, etc	Immediate availability of RN/LPN on premises & within audible & visual range of student. Due to the severity of the student's condition, RN/LPN is unable to provide nursing to other students.
