ANNUAL REPORT
2022-2023
LETTER FROM NASN PRESIDENT AND INTERIM CEO

We are pleased to present the annual report of the National Association of School Nurses (NASN) for the fiscal year ending March 31, 2023. Our vision at NASN is to create a world where all students are healthy, safe, and ready to learn. We strive to achieve this through our mission of optimizing student health and learning by advancing the practice of school nursing.

As school nurses, we have the unique insight to educate stakeholders about our role and the impact we make in the lives of children. Our students are at the heart of everything we do, and their success fuels our daily work. To optimize student health, safety and learning, it is the position of NASN that a professional registered school nurse be present in every school all day, every day.

This report highlights our achievements, challenges, and growth over the past year. We are proud to share the progress we have made toward our goals and the impact we have had on our school communities. Our team has worked tirelessly to continue providing high-quality services and support to our members, partners, and stakeholders. We would like to express our gratitude to everyone who has supported us, including our staff, volunteers, board members, supporters, partners, and grantors. The commitment and dedication of our team and stakeholders are the driving force behind our success, and we are deeply thankful for your continued support.

We invite you to review this report and learn more about our accomplishments, and we look forward to continuing our efforts to make a positive impact on our community.

Best regards,

Carol A. Walsh
PMP
Interim CEO

Linda Mendonça
DNP, RN, PHNA-BC, NCSN, FNASN
President

Key Facts About School Nursing

120 Years
The number of years School Nurses have played a part in schools.

In 1902, Henry Street Settlement influenced the New York City Board of Education to pay the salary of Lina L. Rogers, the first public school nurse. Her success prompted the Board of Education to appoint nurses in schools. Henry Street Settlement and NASN collaborated to celebrate this milestone.

The NASN mission is to optimize student health and learning by advancing the practice of school nursing.

Students are the No. 1 reason many of us became school nurses. They are our first priority, and everything NASN does puts students first.

NASN released a new membership guide that communicates the value of professional membership and is available in two formats.

NASN updated and added new Membership Minute videos. These short step-by-step guides help members get the most out of their dues investment.

### NASN’s New Back-to-School Toolkit Released

Whether you are a seasoned school nurse or in your first year on the job, NASN’s Back-to-School Toolkit highlighted the resources needed to promote the health and well-being of students all in one convenient place. The toolkit included NASN’s Framework for 21st Century School Nursing™, advocacy tools, NASN’s School Nurse Evidence-based Clinical Practice Guidelines, a Back-to-School Checklist for School Nurses, and so much more!

### Every Student Counts!

### Data Collection Continues to Grow

NASN’s National School Health Data Set: Every Student Counts! continued to progress, encouraging every state affiliate to be engaged in data collection. The program meets affiliates where they are, with three identified tiers for participation. To support state efforts, NASN developed guidance for individual school nurses, data coordinators and affiliates to participate in the process.

### National School Health Data Set:

Every Student Counts!

School Nurse Day 2022

NASN’s 2022 School Nurse Day was held on Wednesday, May 11, 2022. The theme for 2022 was Bridging Healthcare and Education. NASN honored school nurses throughout May for being the nexus between healthcare and education; sometimes, school nurses are the primary healthcare provider a child may see.

The organization distributed materials that included enhanced graphic presence, a toolkit with resources for school nurses to use to promote School Nurse Day, a poster for schools, a social media badge, and social media images.

### SAVE THE DATE:

NASN’s 2024 School Nurse Day will be held on Wednesday, May 8, 2024.

**IMPACT**

School Nurse Day social media posts and the hashtag #SND2022 were shared by thousands of social media handles.

Impressions reached more than 200,000.

50% open rate on all School Nurse Day emails.
### ADVANCING THE PROFESSION

#### NASN2022

NASN held two conference options in 2022: one in-person in Atlanta and one virtually. More than 800 school nurses attended the in-person NASN2022 and 1,900 school nurses logged on for the virtual conference. Sessions covered topics of interest such as COVID-19, mental health (for school nurses and students), personal branding, and leadership.

#### NASN2024

NASN is looking forward to seeing learners in person for NASN2024, June 28 – July 1, 2024 in Chicago at the Hyatt Regency. The theme for the 2024 annual conference is Stronger Together.

### eLearning

NASN’s eLearning Center now includes over 116 hours of high-quality, evidence-based learning opportunities that help advance the profession of school nursing. More than 23 new hours were added this year.

### New titles added this year include:

#### Learning Center Content

#### NASN2024

NASN is looking forward to seeing learners in person for NASN2024, June 28 – July 1, 2024 in Chicago at the Hyatt Regency.
As NASN2022 was meeting last June, Congress passed the Bipartisan Safer Communities Act. One provision of the law required the Center for Medicare and Medicaid Services (CMS) to issue new school-based Medicaid guidance by 2023, and in fact the Department of Education and CMS just issued that guidance in May 2023. For over a decade, NASN has been advocating, along with our key allies, to ensure that school-based health services for Medicaid-eligible students could be reimbursed by Medicaid. This has been a priority for NASN for many years. Furthermore, NASN has advocated for CMS to simplify the process so that small and rural schools have the same opportunities to bill Medicaid for their students as large and urban schools.

Through the fall, NASN took part in several joint “Listening Sessions” with the Department of Health and Human Services (HHS) and the Department of Education (ED) regarding Medicaid in schools. NASN spoke of the need to strengthen and streamline Medicaid so it would be easier to bill for school nursing services so students are healthy and safe.

For the first time in three years, NASN had an in-person Hill Day! NASN’s 54-member Board took to the Hill to discuss NASN’s three legislative priorities on January 31, 2023, after the Winter Board Meeting in D.C. Board members made appointments with their two senators and their member of Congress to educate them about their role in schools and advocate for school nursing services. Almost 125 appointments were made with members of Congress and senators.

NASN’s President Linda Mendonca presented the Lillian Wald award to Representative Frederica Wilson (D-FL) for her introduction of the One School, One Nurse Act on the morning of Hill Day. Her speech inspired Board members heading to the Hill as she spoke of the influence of a school nurse on her life. The Lillian Wald award recognizes public officials for their contributions to school nursing and school health services as well as those who have supported NASN.

Rounding out this spring’s advocacy and the end of Donna Mazyck’s tenure as Executive Director, Mazyck testified before the Select Subcommittee on Corona Pandemic of the House Oversight and Accountability Committee on March 27, 2023, on “The Consequences of School Closures: Intended and Unintended.” She spoke of all the work that school nurses did through the pandemic to ensure that children had all the supports and school nursing services.

NASN will continue to advocate the federal level for school nursing services so that children are healthy, safe and ready to learn.

NASN’s Virtual Hill Days, June 14, 15, and 16, 2022, created momentum and showed support for crucial legislation to help keep children safe, healthy, and ready to learn.

Members tweeted, emailed, and called members of Congress and Senators using sample messages in the NASN toolkit!

Stakeholders need to know why school nurses are essential. Children’s health and learning are forever linked.
The End of an Era

In January 2023, NASN announced Donna Mazyck, MS, RN, NCSN, CAE, FNASN, Executive Director, will retire after 12 years of advocating for and serving the school nurse profession and the students, staff, and communities school nurses guide and protect. A thoughtful and strategic leader, she has led an expansion of the influence and impact of school nurses in addressing student and school community health and safety.

“This is an exciting new day for Donna and for NASN,” says President Linda Mendonça, DNP, RN, PHNA-BC, NCSN, FNASN. “Donna has left an indelible mark on the organization and the profession and left NASN well positioned as it moves into its next era, expanding and escalating its current programs and services, securing foundational school health evidence, and increasing the voice of school nurses in support of the health and safety of our students and staff.”

Terri Hinkley will be joining NASN as its next CEO, effective August 7.

Connection In the Palm of Your Hand

NASN added an app for members to connect with others in the SchoolNurseNet community more easily. The All Member Forum and other NASN online communities allow for discussion of journal articles and other school nursing topics. You can ask for input from your peers or respond to inquiries that others post. Get instructions to use the community mobile app to stay connected on the go!

NASN in the News

School nurses shared their stories in local, regional, and national media publications, broadcast outlets, social media, and podcasts over the past year. NASN was sought out as an expert in many news stories, social media, and podcasts over the past year. NASN School nurses shared their stories in local, regional, NASN in the News mobile app to stay connected on the go!

Journal Podcasts Reach Thousands

These podcasts, hosted by the journal editors, highlight a specific article from each journal issue, interviewing the author and increasing article access and views. A new podcast is released every month.

The Journal of School Nursing

The Journal of School Nursing (JOSN) is the official research publication of NASN. JOSN provides a bimonthly peer-reviewed forum for improving the health of students from pre-school through high school and the health of the school community. Clinicians, scholars, and community leaders in nursing, medicine, public health, epidemiology, health services research, policy analysis, education, and other disciplines contribute to JOSN.

JOSN is indexed in MEDLINE, the Cumulative Index to Nursing and Allied Health Literature, PsycINFO, and Scopus and is a member of the Committee on Publication Ethics (COPE). JOSN has a 2-year Impact Factor of 1.7 and a five-year Impact Factor of 2.0. The journal averages five submissions per week with an acceptance rate of 11%. The average speed to the first decision is 14 days, and the average number of days to the final decision is 30 days, far below the typical wait for authors in peer-reviewed journals. In 2022, 280 reviewers donated their time and expertise to provide authors feedback on their manuscripts. Meet the Editor live web sessions are held and recorded five times a year to provide guidance for potential authors.

Notable podcasts:
- NASN July 2022 – EP1: School Nursing for the Novice: How Do I Begin?
- NASN July 2022 – EP2: Smoothing the Way Into School Nursing Practice

NASN School Nurse

The NASN School Nurse remains the premier clinical resource journal for school nurses, providing information on emerging issues, innovation in school health, and organizational resources of interest and assistance to our specialty practice. In spring 2023, we debuted a new series titled “Legal Issues 101,” written in a frequently asked question format. In addition, the journal’s publishing editor is now working with select authors to publish blogs highlighting their articles, with the goal of driving more traffic to the journal’s website. The peer-reviewed journal’s average time to first decision is 13 days, well below the industry standard of 35 days. Journal oversight is provided by the Editorial Advisory Board and Editorial Panel.
NASN Annual Report | 2022-2023

PARTNERS, FUNDERS, AND SPONSORS

**Champions for School Health Project**

The National Association of School Nurses (NASN), with generous funding from Kaiser Permanente (KP), and in partnership with the Institute for Educational Leadership (IEL), developed and implemented the Champions for School Health (CSH) grant initiative in January 2022. This project funded SNs, and CBos that are working to increase inclusive vaccine access, and confidence among underserved populations in KP’s footprint: California, Colorado, Georgia, Hawaii, Maryland, Oregon, Virginia, Washington, and the District of Columbia.

NASN gave 55 Implementation Grants in two funding cycles in 2022 in all KP markets of which 30 grants went to SNs. Via the two funding cycles, NASN has worked with twenty-two new CBos based in six KP markets which are small organizations serving mostly immigrant/refugee and ethnically diverse communities in their states. The successful project implementation and the resulting NASN created tools demonstrate NASN’s capacity for future similar projects. Additionally, NASN is co-funding a project in Maryland with IEL which is a collaboration between SNs and Community Schools to address vaccine equity and food insecurity.

The CSH initiative’s objectives included increasing pediatric COVID-19 vaccine and school-required vaccination confidence and rates for children ages 5 to 11 as well as creating sustainable school-community partnerships that increase health equity. During the planning stage, NASN adhered to key guiding principles focusing on the deepening partnerships between SNs and their surrounding communities, elevating/strengthening the role of SNs, and supporting culturally competent strategies for increasing pediatric vaccine access and uptake. It also aimed to demonstrate the SN in the community as trusted advocates and empower SNs to use the knowledge gained from their projects to implement high-quality, culturally competent school-based health services beyond the COVID-19 response.

Key Coalitions

In addition to its advocacy work, NASN engaged in a number of coalitions to support a culture of shared leadership for student health.

**National Alliance of Specialized Instructional Support Personnel (NASISP)** – NASN is a member of this coalition, School Nurses are SISP professionals along with their colleagues including school social workers, school psychologists, school counselors, and others who address barriers to educational success to help students achieve academic excellence. SISP professionals are recognized by the Every Student Succeeds Act (ESSA) as integral members of school teams to improve school and student outcomes.

**Title IV Coalition** – NASN is a principal player in the Title IV Coalition that is comprised of many national organizations working together to advance and advocate for full funding of the new flexible block grant under Every Student Succeeds Act (ESSA). The block grant, known as the Student Support and Academic Enrichment (SSAE) grant program, is designed to ensure that high poverty districts have access to programs that foster safe and healthy students, provide students with a well-rounded education, and increase the effective use of technology in our nation’s schools.

**National Healthy Schools Collaborative (NHSC)** – NASN is a member of this collective impact group working to promote cross-sector collaboration and alignment on the simple but powerful mission to coordinate and accelerate equitable funding, policy, and practices for health in education so that every school succeeds, every educator excels, and every child thrives. The NHSC seeks to transform K-12 education by expanding and innovating policies and practices across all areas of health through the Ten-Year Roadmap for Healthy Schools.

Sources of Funding

**Funding Source:**

- Government Direct Support – $645,224
- Foundation or Nonprofit – $1,851,180
- Industry Sponsorship or Grant – $57,575

**Student Health Advocacy Coalition (SHAC)** – NASN serves as a co-chair of SHAC, an alliance of national organizations dedicated to promoting the health and well-being of approximately 55 million school-age students. SHAC is committed to achieving healthy school environments and services while improving educational, health, and economic outcomes.

**National Coalition on Personnel Shortages in Special Education and Related Services (NCPSSESRs)** – NASN is a co-chair of this national coalition that brings together stakeholders to work collaboratively to address personnel shortages and persistent vacancies in special education, specialized instructional supports, and early intervention services. NCPSSESRs engages in advocacy at the federal, state, and local levels for implementation of strategies to remedy personnel shortages and persistent vacancies.

**NASN**

NASN seeks mission-matched external funding to increase its impact on school nurses and student health through a balanced, strategic approach. In fiscal year 2022-23, NASN received $3.27 million in external funding, an increase of 184% over the previous year.

Nasn gave $57,575 to SNs for their projects. NASN created a dedicated CSH webpage with all project information and reference resources. NASN created an online learning community via its SchoolNurse.net platform and all grantees shared their project pictures and project materials. This has resulted in a rich collection of materials which NASN has shared via a public online library. The learning community connected funded partners to one another for peer learning and curated resources to support culturally appropriate care and patient engagement. NASN staff scheduled individual grantees sessions as well as engaged with grantees via email and telephone which were instrumental in building trust between NASN and grantees. An opportunity to check on the projects’ progress and any challenges, more learn about their work and build strong relationships.

Feedback from the SN grantees resulted in NASN offering a live “Immunization 101” webinar in January 2023 to all SNs which had a SN immunization expert and a pediatrician provide a primer on childhood and adolescent immunizations. NASN collaborated with Frameworks Institute to develop the “Building Family Confidence in the COVID-19 Vaccine” Toolkit (launched in September 2022) which uses a trusted messenger strategy, is based on evidence-based social science research in child vaccination communication, and is free and accessible to any SN and school health services staff and has also been shared with CDC and their partners.

Project data from all the grantees has been submitted and is currently being analyzed.

**Title IV Coalition** – NASN is a principal player in the Title IV Coalition that is comprised of many national organizations working together to advance and advocate for full funding of the new flexible block grant under Every Student Succeeds Act (ESSA). The block grant, known as the Student Support and Academic Enrichment (SSAE) grant program, is designed to ensure that high poverty districts have access to programs that foster safe and healthy students, provide students with a well-rounded education, and increase the effective use of technology in our nation’s schools.

**National Healthy Schools Collaborative (NHSC)** – NASN is a member of this collective impact group working to promote cross-sector collaboration and alignment on the simple but powerful mission to coordinate and accelerate equitable funding, policy, and practices for health in education so that every school succeeds, every educator excels, and every child thrives. The NHSC seeks to transform K-12 education by expanding and innovating policies and practices across all areas of health through the Ten-Year Roadmap for Healthy Schools.
