NASN2023 Presentation Submission Rating Instructions

NASN2023 is a national conference. Abstracts accepted for the In-person and Virtual NASN2023 events must reflect readiness for a national stage. To ensure this, score abstracts using the following rating scale for each criterion:

- 5 = Exceeds expectations and criteria (Exceptional)
- 4 = Meets criteria and exceeds in some categories (Above Average)
- 3 = Meets criteria (Average)
- 2 = Meets some aspects of criteria but missing key criteria (Below Average)
- 1 = Does not meet any criteria at all (Unacceptable)

Abstracts must address the NASN2023 Conference Learning Outcomes:

- Identify two new evidence-based practice or resources from NASN2023, exhibitors, or poster presentations that can be used to promote student health academic success and the health of students and communities.
- Describe three evidence-based nursing interventions for students with chronic health conditions including mental health to address health disparities across all communities.
- Apply new knowledge of the role of the school nurse in the delivery of culturally competent care in schools.
- Devise a plan to implement practice changes to include leadership and interprofessional collaboration for the benefit of student success.
- Justify the necessity for school nurses to participate in assessment, planning, and implementation of crisis prevention in schools.

Evaluation Criteria

1. The overall aspect is timely and relevant to one or more of the NASN2023 learning outcomes.
2. The abstract content matches the category chosen.
3. The author(s) show how this presentation could improve school nursing.
4. The content is organized and has clarity.
5. The author(s) provide evidence-based best practice references.
6. Evidence-based information based on research/data collected by authors will be presented in the educational activity.
7. The teaching methods incorporated learner-centered strategies.
8. The author(s) use grammar, punctuation, and spelling correctly.
