NASN's School Nursing Practice Framework™ must be used in the same format as displayed to include the NASN logo, title (with TM superscript), NASN copyright footer, and NASN tagline (with TM superscript). The full name is italicized in all instances, as is the Framework when referring to it in the second reference.

When the chart is used, the Framework graphic must be used along with the image with no changes to the text. If using the Framework and components in a handout format, the paragraph explanation of the framework must be included. The paragraph does not need to be included if the visuals are used in a PowerPoint Presentation.
