Focus on the Framework: Leadership

A Program for School Nurses

Focus on the Framework: Leadership will provide learners with an overview of the principle of leadership, from the NASN 21st Century School Nursing Practice Framework™. This is not focused on school nurse leaders as a position, but on the mindset of leadership and how the school nurse leads health practices in the school setting. There is a need for school nurses to have increased knowledge about the components of the leadership principle and its application to school nursing practice.

CONTINUING EDUCATION:

6.0 NCPD CNE Contact hours awarded for attending the full program and completing an evaluation:

The National Association of School Nurses is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

(NASN is approved by the California Board of Registered Nursing, Provider Number #CEP 12292)

LEARNING OUTCOMES:

Upon completion of this presentation, school nurses will be able to:

1. Describe 2 ways the *Framework* reflects a mindset for 21st Century School Nursing Practice.
2. Articulate 3 characteristics of leadership.
3. Articulate 3 connecting variables in systems-level leadership thinking.
4. Identify 4 ways professionalism impacts credibility.
5. Develop and articulate a one-minute stairwell speech.
6. Identify at least 3 steps of policy development and implementation.
7. Identify 3 ways to stay current in healthcare and education reform, technology, and practice.

NASN programs are written for registered nurses employed in the specialty of school nursing.

For more information about how to bring this educational offering to your area, including responsibilities and rewards of hosting, contact Stephanye White at swhite@nasn.org.
