

Description & Participation in *Every Student Counts!*

Every Student Counts! is a national data initiative to advance student health through data. The focus of the program is strengthening school nurses' ability to collect and use data to direct personal practice, as well as to advocate for students. All school nurses are invited to participate.

- Uniform data points are collected to better understand student health nationally
- Additional data points will be added
- All 50 states are participating in *Every Student Counts!* at some level (see map)
- Each data point category had a different response rate
- Due to the variance in state participation (n=27) - **data are not generalizable**

Participation in *Every Student Counts!*

School Health Workforce
