

Description & Participation in *Every Student Counts!*

Every Student Counts! is a national data initiative to advance student health through data. The focus of the program is strengthening school nurses' ability to collect and use data to direct personal practice, as well as to advocate for students. All school nurses are invited to participate. Due to the fact that each data point had a different response rate, and the variance in state participation, **data are not generalizable**.

Who Participated? Describe what entities are included in the data below, individual school(s), district(s) or a state.
