

Kyndra V. Middleton

Kyndra V. Middleton is an associate professor and program coordinator of the Educational Psychology doctoral program at Howard University where she has taught courses in statistics and educational measurement since joining the faculty in 2009. She received her BS degree in mathematical sciences from Florida A&M University and her Ph.D. in Educational Measurement and Statistics from The University of Iowa after which time she completed a two-year Sylvia Taylor Johnson postdoctoral fellowship at Educational Testing Service before joining the Howard faculty. Given her educational background in mathematics and having grown up in rural South Carolina, her primary research interests are in the areas of mathematics achievement, comparative studies of issues faced in rural and urban education, increasing the number of underrepresented minorities in STEM fields, and test score validity. Educating the mis-educated and uneducated is Dr. Middleton's passion, and she has dedicated her career to ensuring the voiceless receive voice and the invisible become visible.
