

NETA Accelerates Membership Drive to Support Growing Industry Demand and Expand the Accredited Testing and Certified Technician Network

As grid complexity, electrification, and reliability expectations continue to rise, the industry requires more NETA Accredited Companies and Certified Technicians to ensure safety, consistency, and technical excellence across critical electrical systems. NETA is proud to welcome recently accredited member companies reflecting this urgency, bringing expanded regional coverage, specialized expertise, and a shared commitment to the highest standards of testing, commissioning, and maintenance.

PORTAGE, Mich., May, 13, 2026 -- NETA – the InterNational Electrical Testing Association – is pleased to welcome *High Potential Testing, Infinity Technical Services Division, and U.S. Electrical Testing* NETA Accredited Companies.

NETA Accredited Companies are third-party, independent electrical testing and engineering service businesses providing full-service testing, analysis, and maintenance of electrical power systems. NETA maintains a two-fold accreditation process that accredits the company and certifies its individual field-service technicians. The accreditation standards assure consumers of both the qualifications of the company as well as the credentials of their individual certified field-service technicians. NETA Accredited Companies are a critical part of an independent, third-party electrical testing association dedicated to setting world standards in electrical maintenance and acceptance testing.

“NETA acknowledges the strong commitment of these three companies to technical excellence and reliable performance,” says Dan Hook, VP of GCBS Engineering, CBS Field Services, and current NETA President. “We applaud the important role our NETA Accredited Companies have in advancing the electrical power systems industry and its safety. Achieving NETA accreditation is something *High Potential Testing, Infinity Technical Services Division, and U.S. Electrical Testing* can be proud of, and this recognition is indicative of their respective accomplishments as an organization.

High Potential Testing LLC (HPT) – A proud member of IBEW Local 269 in Central New Jersey and Eastern Pennsylvania, *HPT* is a 24/7 full-service testing company that provides acceptance and preventive maintenance testing of low-, medium-, and high-voltage switchgear, breakers, transformers, and cables. *HPT* has certified thermographers to perform IR scans of electrical equipment; supports 24-hour emergency testing, fault repairs, and temporary power solutions; and offers specialized motor carrier services, hauling electrical components and equipment for remote projects.

“When we started *HPT* [in November 2020], we knew that the most important thing we could do for our business was become NETA accredited,” says co-owner Doug Williams. “We started on that path immediately by doing business to the standards, and after five years in business, we are so proud to be a NETA Accredited Company and join the ranks of our peers in the industry.”

Infinity Technical Services Division, Inc. (Infinity TSD) – Based in North and South Carolina, *Infinity TSD* strives to help its customers get the most from their electrical equipment throughout its entire lifecycle. From installation and commissioning to maintenance, modernization, and end-of-life planning, *Infinity TSD* provides the expertise and support necessary to ensure electrical systems operate safely, efficiently, and reliably. Whether helping clients establish a proactive maintenance program, enhance safety, or upgrade aging assets with modern technology, *Infinity TSD* is a trusted partner at every stage of the journey. The goal is to give their clients the highest level of confidence in the performance, safety, and longevity of their electrical systems.

“When we first started our company, becoming NETA accredited was one of the major goals we set for ourselves,” says President Rich Hicks. “We knew that striving for this achievement would make us better, further develop our service offerings, and help us identify areas for improvement as a company.”

[U.S. Electrical Testing, LLC \(USET\)](#) – Headquartered in the greater Washington D.C. area, *USET* specializes in electrical acceptance testing, maintenance testing, and commissioning services for the nation’s most recognizable mission-critical facilities, secure environments, commercial and industrial clients, and electrical contractors. The company’s capabilities include emergency response, engineering services, and turn-key installation and repair. As a DCSA-cleared facility with cleared technicians, *USET* is eligible to work on classified contracts for the U.S. government. *USET* is uniquely qualified and trusted to operate in the nation’s most secure environments.

“This certification for the company and our NETA-certified electrical test technicians and engineers demonstrates our commitment to providing the highest level of service and quality,” says Chris Myers, President of *USET*. “It sets *USET* apart from competitors by ensuring compliance verification and giving customers greater confidence in our ability to improve the reliability and uptime of their mission-critical facilities.”

Companies interested in joining NETA’s elite group of Accredited Companies can learn more at NETAWorld.org/Accreditation.

ABOUT NETA

NETA, the InterNational Electrical Testing Association, is an ANSI-Accredited Standards Developing Organization that creates and maintains standards for electrical maintenance and acceptance testing for electrical power equipment and systems, as well as a standard that addresses the certification of electrical testing technicians. NETA is an association of leading electrical testing companies comprised of visionaries committed to advancing the industry standards for power system installation and maintenance to ensure the highest level of reliability and safety.
