

## NETA Welcomes New NETA Accredited Companies

PORTAGE, MI, February 2023 | Source: InterNational Electrical Testing Association (NETA)

### NETA accredits two new electrical testing companies:

- C3 Engineering, Chandler Arizona, (Feb 2023) – NETA Accredited Representative, Ben Canfield
- Forefront Electrical Testing, Elk Grove Village, Illinois, (Feb 2023) – NETA Accredited Representative, Sarah Sienkowsk

NETA Accredited Companies are third-party, independent electrical testing and engineering service businesses providing full-service commissioning, acceptance testing, and maintenance testing of electrical power systems.

NETA Members and the NETA network of partner companies are pleased to extend a warm welcome to its newest accredited companies.

**C3 Engineering's** mission is to help customers focus on their missions by taking the mystery out of their latest challenges related to electrical maintenance or testing.

**Forefront Electrical Testing** joins NETA as a certified Women Owned Business dedicated to offering high quality electrical testing. They understand the urgency to keep electrical systems reliable, safe, and efficient.

NETA maintains a comprehensive accreditation process that accredits the company and certifies its individual technicians. The accreditation standards assure customers of both the qualifications of the company as well as the credentials of the individual technician.

"NETA Accredited Companies pass through a rigorous review process which accredits the company only after satisfying all safety, technical, and professional standards. Additionally, each company must certify their field service technicians in accordance with ANSI/NETA ETT *Standard For Certification of Electrical Testing Technicians*," says Ken Bassett, Chair, NETA Membership Committee. "We are pleased to recognize these exceptional organizations as NETA Accredited Companies and know that they will be sought after and held in high regard throughout the power distribution industry."

### ABOUT NETA

The International Electrical Testing Association (NETA) is an ANSI Accredited Standards Developing Organization that creates and maintains standards for electrical commissioning, acceptance testing, and maintenance testing for electrical power equipment and systems, as well as a standard that addresses the

certification of electrical testing technicians. NETA also serves the electrical power industry as an accrediting and certifying body for electrical testing companies and technicians.

NETA members are comprised of electrical testing companies and visionaries committed to advancing the electrical testing industry and the standards for power system installation and maintenance to ensure the highest level of reliability and safety. Governed by an active member Board of Directors and operating out of offices in Portage, MI, NETA hosts PowerTest Electrical Maintenance and Safety Conference, and publishes the NETA World technical journal.
