

Milestone Category	Milestones Addressed (Level)	Relevant ENLS Module
Emergency Stabilization (PC1) Prioritizes critical initial stabilization action and mobilizes hospital support services in the resuscitation of a critically ill or injured patient and reassesses after stabilizing intervention.	Recognizes when a patient is unstable requiring immediate intervention (2) Performs a primary assessment on a critically ill or injured patient (2) Develops policies and protocols for the management and / or transfer of critically ill or injured patients (5)	All
Performance of Focused History and Physical Exam (PC2)	Performs and communicates a reliable, comprehensive history and physical exam (1) Performs and communicates a focused history and physical exam which effectively addresses the chief complaint and urgent patient issues (2) Prioritizes essential components of a physical examination given a limited or dynamic circumstance (3)	All
Diagnostic Studies (PC3)	Determines the necessity of diagnostic studies (1) Orders appropriate diagnostic studies (2) Prioritizes essential testing (3)	All
Diagnosis (PC4)	Constructs a list of potential diagnoses based on chief complaint and initial assessment (1) Constructs a list of potential diagnoses with the greatest potential for morbidity or mortality (2) Correctly identifies "sick versus not sick" patients (3) Revises a differential diagnosis in response to changes in a patient's course over time (3)	All
Pharmacotherapy (PC5)	Applies medical knowledge for selection of appropriate agent for therapeutic intervention (2) Considers and recognizes potential drug to drug interactions (3)	All
Observation and Reassessment (PC6)	Recognizes the need for patient re-evaluation (1)	All
Disposition (PC7)	None	None
Multi-tasking (Task-switching) (PC8)	Manages a single patient amidst distractions (1)	All
General approach to procedures (PC9)	Correctly interprets the results of a diagnostic procedure	All

<b>Milestone Category</b>	<b>Milestones Addressed (Level)</b>	<b>Relevant ENLS Module</b>
Airway Management (PC10)	Describes the elements of airway assessment and indications impacting the airway management (2) Describes the pharmacology of agents used for rapid sequence intubation including specific indications and contraindications (2) Confirms proper endotracheal tube placement using multiple modalities (2) Implements post-intubation management (3) Employs appropriate methods of mechanical ventilation based on specific patient physiology (3)	Airway, Ventilation, and Sedation Intracranial Hypertension and Herniation
Anesthesia and Acute pain Management (PC11)	None	None
Other Diagnostic and Therapeutic Procedures: Goal-directed Focused Ultrasound (PC12)	None	None
Other Diagnostic and Therapeutic Procedures : Wound Management (PC13)	None	None
Other Diagnostic and Therapeutic Procedures : Vascular Access (PC14)	None	None
Medical Knowledge (MK)	None	None
Patient Safety (SBP1)	Employs processes, personal, and technologies that optimize patient safety (3) Identifies situations when the breakdown in teamwork or communication may contribute to medical error (4)	All
Systems-based Management (SBP2)	None	None
Technology (SBP3)	None	None
Practice-based Performance Improvement (PBLI)	Performs self-assessment to identify areas for continued self-improvement and implements learning plans (3) Demonstrates evidence-based clinical practice and information retrieval mastery (4)	All
Professional values (PROF1)	None	None
Accountability (PROF2)	None	None
