PROGRAM OVERVIEW

Emergency Neurological Life Support (ENLS) is designed to help healthcare professionals improve patient care and outcomes during the most crucial time - the critical first hours of the patient's neurological emergency. ENLS covers a collaborative, multi-disciplinary approach that outlines a consistent set of protocols, practical checklists, decision points, and suggested communication to use during patient management.

Completion of this course and online assessment provides 15 hours of Level 1 CME, ANCC, ACPE and CAPCE credit, and two-year ENLS certification.

ENLS OFFERS:

- Protocols that list important steps in managing a patient with a neurological emergency
- Treatment algorithms that can be administered across a spectrum of care environments
- Structured format for concise communication among members of the healthcare team
- Information on current advancements in treatment

EARN 15 CME* CREDITS THROUGH ENLS!

*Also includes ANCC, ACPE, & CAPCE credits

TOPICS

- Acute Non-Traumatic Weakness
- Acute Ischemic Stroke
- Airway, Ventilation and Sedation
- Approach to the Comatose Patient
- Intracerebral Hemorrhage
- Intracranial Hypertension and Herniation
- Meningitis and Encephalitis
- Pharmacotherapy
- Resuscitation Following Cardiac Arrest
- Spinal Cord Compression
- Status Epilepticus
- Subarachnoid Hemorrhage
- Traumatic Brain Injury
- Traumatic Spine Injury

★ RECENT ENLS COURSE REVIEWS

"ENLS was tough and useful. It is an amazing compilation of important and succinct information, with practical implications. Many primary specialty textbooks do not contain the information provided by ENLS, especially up-to-date details that guide fast-paced management decisions from the first encounter with the neurological or neurosurgical patient in the ED to his/her long-term NICU stay. Despite the fact that I am a mid-career neurointensivist with years of experience, I found few module questions quite challenging. I have definitely learned something new."

– Panayiotis Varelas, MD, Henry Ford Hospital

"ENLS offers nurses with or without experience in neurocritical care an opportunity to develop expertise in how to manage neurologic emergencies. Skills learned through ENLS may mean the difference between recognizing time-sensitive patient changes and saving a life or missing subtle hints a patient is in distress. I cannot recommend this training enough; it's mandatory training for those who routinely care for neurocritical care patients and highly recommended to any nurse who may occasionally find themselves caring for a patient with stroke, trauma or other neurologic emergency."

– Sarah Livesay, DNP, RN, ACNP-BC, ACNS-BC, Rush University (Chicago, IL)
