RenalEdge GPO Welcomes United Labs as a New Vendor Partner

RHA Members Gain Access to Green, Bio-Based Solutions for Dialysis Facilities

RenalEdge GPO is pleased to announce a new vendor partnership with United Laboratories, a specialty chemical company dedicated exclusively to environmentally responsible healthcare solutions. Through this partnership, members of the Renal Healthcare Association (RHA) gain access to innovative, bio-based products designed to support safer, cleaner, and more sustainable dialysis operations.

United Laboratories was the first company in the United States to adopt a fully green approach to specialty chemicals, beginning in 1992. Today, its portfolio includes more than 150 bio-based and plant-based products, all of which are 100% nonylphenol ethoxylate (NPE)-free - helping dialysis providers reduce exposure to chemicals linked to endocrine disruption and other health risks.

“Dialysis clinics face unique environmental and operational challenges, particularly when it comes to drainage systems and odor control,” said **Dana Kilmer, EVP, Sales, United Laboratories**. “We’re excited to partner with RenalEdge GPO to bring RHA members proven, green solutions that address these challenges while supporting both patient safety and environmental responsibility.”

Additional information about this partnership, including enrollment details, will be shared on the RenalEdge website. To learn more, visit www.RenalEdge.com.

About the United Laboratories

United Laboratories is a green specialty chemical company focused exclusively on healthcare solutions. A pioneer in environmentally responsible chemistry since 1992, the company offers more than 150 bio-based and plant-based products that are 100% NPE-free. United Laboratories specializes in hemodialysis bioremediation, providing comprehensive solutions for odor control, drain management, and dialysis facility maintenance, along with aromatherapy-based products that support wellness and therapeutic environments.
