RenalEdge GPO Welcomes Vasc-Alert as First Vendor Partner

RHA Members Can Now Access Vascular Access Surveillance Solution at Special GPO Pricing

RenalEdge GPO is pleased to announce its first official vendor partnership with **Vasc-Alert**, giving members of the **Renal Healthcare Association (RHA)** access to an AI-powered, FDA-cleared vascular access surveillance system that supports early detection of stenosis in hemodialysis patients.

Through this partnership, RHA members can take advantage of discounted pricing, along with ongoing training and reporting services included in the Vasc-Alert subscription. The solution integrates seamlessly with existing dialysis workflows, helping reduce complications, streamline care, and improve patient outcomes, without adding to staff burden.

“We are proud to welcome Vasc-Alert as the first partner of RenalEdge GPO,” said **Colin Carthen, RenalEdge GPO Executive Director**. “This technology aligns perfectly with our goal to help independent dialysis providers access tools that drive clinical and operational excellence.”

“We’re honored to be the first vendor partner of RenalEdge GPO and excited to bring our access surveillance technology to RHA members,” said **Douglas Curry, Vice President, Vasc-Alert**. “By providing early detection of access issues with no added burden on staff, we’re helping dialysis centers deliver safer, more efficient care while improving outcomes for patients.”

An informational session will be offered to RHA members to explore how Vasc-Alert works and how to take advantage of the GPO pricing. Details will be shared on the RenalEdge website. For more information and enrollment, visit www.RenalEdge.com.

About Vasc-Alert

Vasc-Alert provides an AI-based, FDA-cleared decision-support system that enables automated, data-driven surveillance of hemodialysis vascular access. By trending intra-access pressures into a validated Access Risk Score, Vasc-Alert identifies early signs of potential stenosis, allowing providers to act proactively. www.vasc-alert.com

About RenalEdge GPO

RenalEdge GPO is a member-exclusive group purchasing organization operated by Renal Services Exchange (RSE), a wholly owned subsidiary of the Renal Healthcare Association (RHA). RHA represents nearly 11% of U.S. dialysis facilities and serves approximately 60,000 patients nationwide. RenalEdge delivers transparent, trusted, and value-driven purchasing solutions to help independent dialysis providers thrive. www.RenalEdge.com
