

## State News for NSPE Members

### Could Solar Work Well for Wyoming? One Influencer Says Yes

Dave Dodson, a former Wyoming candidate for the US Senate, has published an opinion piece for [Wyofile.com](http://Wyofile.com) arguing that constructing solar energy farms is an ideal way for Wyoming to use its expansive land and create jobs as the coal mining industry declines. He writes that the cost of constructing utility-scale projects has decreased by 80% in the past 10 years, citing figures from the National Renewable Energy Laboratory.

Also, Dodson says, the cost of storing electricity has decreased by 70% during the same period. After mines close, he continues, the land where they were located is graded, making it perfect for solar farms.

“With solar projects, teams of skilled electricians and construction workers are required to construct the frames, install the solar panels and build a powerplant to prepare the energy for transmission,” Dodson writes. “Our greatest state asset is not the coal under the ground, but the thousands of skilled workers displaced as mines and operations close down.”

### Volunteer Leaders Make a Difference – Are You Ready?

Do you want to influence the future of the profession? Are you a young professional looking to advance your career? Have your professional achievements created a desire to give back and serve?

Join NSPE leaders Tricia Hatley, Megan Schultz, and Craig Sisco on **November 1** (4:00 p.m. to 5:00 p.m. ET) as they explore the rewards, benefits, and requirements of volunteer service. NSPE President Rick Guerra will serve as the moderator during this **free webinar**.

Attendees will learn about the opportunities available and gain an understanding of the skills and abilities desired for these positions. The panelists will also share real-life stories of how volunteer service with NSPE has improved their careers and provided fulfillment of

their goals and aspirations. [Register now](#) .

## **Delaware Improves Licensure Mobility for PEs**

Legislation designed to expand licensure mobility for professional engineers in Delaware was signed by Governor John Carney on September 17. Members of the Delaware Engineering Society let state legislators know of their support for the bill through the [NSPE Advocacy Center](#) , a critical factor in gaining support for its passage.

The amendments to the state's PE law provide multiple licensing opportunities. Individuals with an NCEES Record or who qualify as a Model Law Engineer will now find it easier to obtain a PE license in Delaware. The law was also amended to recognize applicants who are graduates of an engineering educational program approved by an accrediting agency that is a signatory to the Washington Accord. The accord covers 21 countries, including Australia, Canada, China, India, Ireland, Japan, Korea, New Zealand, Russia, South Africa, the United Kingdom, and the United States.

An applicant with a minimum of five years of continuous and verifiable experience as a professional engineer can also apply for comity licensure. These applicants must also submit five references, three of which must be from professional engineers licensed in the US, Canada, or an International Professional Engineer registrant under the International Engineering Alliance.

The law's new provisions also eliminate the requirement that licensees can use only an embossed seal, making way for use of a digital seal.

## **Challenges Facing the Profession**

NSPE Immediate Past President Tricia Hatley, P.E., F.NSPE, offers her advice on how engineers can get the most satisfaction from their careers in a four-part series featured in *Machine Design*.

In the first article installment, [Challenges Facing the Profession](#) , Hatley discusses the value of professional engineering licensure and the

challenges the profession faces—population growth and urbanization, the recent pandemic and its short and long-term effects on society, the need for diversity to increase the ranks of engineers, and advances in technology.
