

State News for NSPE Members

Utah Division of Water Resources director retires, new appointment

After serving as director of the Utah Division of Water Resources for the past six years, Eric Millis will retire from public service Dec. 16. Millis has spent nearly 32 years with the division working on a variety of projects that support the division's mission to "plan, conserve, develop and protect Utah's water resources."

"We appreciate Eric's years of service to the state. He is widely recognized both within the state and among our neighboring states as an expert on the Colorado River, which is a critical resource that provides water to about 40 million people in seven Western states," said Department of Natural Resources Executive Director Brian Steed. "His leadership and friendship will be missed."

Steed has appointed Todd Adams as the new division director. Adams has been serving as the division's deputy director since 2013. He joined Water Resources in 1990 and holds a master's degree in civil engineering from Utah State University.

Now Available: Commentary on Construction Documents

The Engineers Joint Contract Documents Committee—a joint venture of NSPE, the American Council of Engineering Companies, and the American Society of Civil Engineers—recently released [commentary on its 2018 construction documents](#) . EJCDC documents are the first choice, and most user-friendly, among standard documents for infrastructure and public works construction in the United States.

EJCDC documents are available to NSPE members at a 50% discount.

C-001 Commentary on the 2018 EJCDC Construction Documents , at 184 pages, contains in-depth descriptions of each of the 25 documents in the EJCDC construction series and explains their use. The commentary includes definitions of terms, cross-references and abbreviations, and a detailed discussion of terms and conditions.

The EJCDC construction series of documents assumes the design engineer is involved during construction. C-001 explains how to use each document in the series during the process. There is also a discussion of the *Contractor for Construction of a Small Project* document and its use.
