Utah Mine Will Add to US Tellurium Supply

Rio Tinto's Kennecott mine plans to begin tellurium recovery operations later this year as a byproduct of copper smelting, [reports AP](#). Tellurium is one of the least common elements on Earth and is used in photovoltaic solar cells. The company will invest \$2.9 million to construct a new plant that will produce 20 tons per year. Michael Moats, professor of metallurgical engineering at the Missouri University of Science and Technology, said increasing the domestic supply of the mineral is critical for renewable energy and national defense efforts in the US. He also explained that 20 tons per year is significant, given that global production is about 500 tons per year. Currently, domestic production of tellurium is chiefly carried out at a mine in Amarillo, Texas.

Provo River Delta Project Aims for Restoration

Construction of the 260-acre Provo River Delta project is underway, [reports ABC4](#). The project, says Utah DWR, will restore the interface between the Lower Provo River and Utah Lake and help recover the June sucker, a fish species native to Utah Lake and not found naturally anywhere else in the world. A majority of the lower Provo River's flow will be diverted out of the existing river channel and into a newly constructed system of braided channels and wetlands before eventually making its way into Utah Lake. Prep work began in March 2020 and excavation began in June 2020. The [project](#) has been in planning for more than 10 years.

We Need Your Input on Proposed Changes to Engineers' Creed

The [Engineers' Creed Survey](#) will be open until 9:00 pm EDT on April 23. As

outlined in previous communications, NSPE is collecting feedback on proposed modifications to update outdated language without altering the philosophical underpinnings of the organization. The hope is that the use of broad, inclusive language will help all engineers within our organization incorporate their personal beliefs and experiences to better the profession.

Thank you to members who have already completed the survey. Please note: If you previously completed the survey, you will not be able to take it again.

If you have not had a chance to provide feedback, we encourage you to do so. Your input is important.

Thank you for your assistance, and thank you for being a member of NSPE.

Watch NSPE's New YouTube Vlog on Legislative and Regulatory Issues

Episode 3 of NSPE's new [Committee Corner](#) vlog covers the Senate Environment and Public Works Committee and the March 24 markup of S.914 - the Drinking Water and Wastewater Infrastructure Act of 2021.

Ask Your Senators to Back Drinking and Wastewater Infrastructure

Professional Engineers play an integral role in the development and maintenance of the nation's infrastructure, including infrastructure that provides clean drinking water and safe wastewater treatment.

Every community in the United States needs clean drinking water, and wastewater treatment facilities that keep the community clean and safe. The Senate is expected to vote this week on a bill to fund these vital systems.

[Ask Your Senators to Vote "Yes" on S.914](#)

S. 914, The Drinking and Wastewater Infrastructure Act of 2021, ensures that communities have both, by providing much-needed funding for our drinking and wastewater systems. The bill authorizes funding for the Safe Drinking Water Act programs, and the Federal Water Pollution Control Act. It also establishes programs that direct services and funding to low-income and under-served communities, and allocates money to respond to cyber threats. Share your engineering expertise with your lawmakers, and ask them to support this crucial funding.

S. 914 was voted out of the Senate Environment and Public Works committee with unanimous, bipartisan support. And in a press release dated April 15th, Majority Leader Schumer said the bill could be voted on by the full Senate as early as this week.

[Ask Your Senators to Vote "Yes" on S.914](#)

Please take a moment to contact your Senators, express your support, and ask them to vote "yes" on S. 914.

Society Backs House Bills on Engineering Education and 529 Savings Plans

NSPE supports the WORKER Act ([H.R. 594](#)), which establishes a \$20 million grant program to make specialized engineering programs available in K–12 schools. The bill was introduced by Rep. Tim Ryan (D-OH) and Rep. Susan Wild (D-PA) to improve worker training, retention, and advancement.

The grants will assist with teaching students the overall analytical and experimental approaches used in engineering and engineering technology; and increase participation of under-represented student groups in the engineering and engineering technology pipeline.

NSPE continues to advocate for passage of the Freedom to Invest in Tomorrow's Workforce Act ([H.R. 2171](#)). This legislation was successfully reintroduced by Rep. Abigail Spanberger (D-VA) with support from the Professional Certification Coalition. The bill allows the beneficiaries of tax-advantaged 529 education savings plans to pay the costs associated with obtaining or maintaining postsecondary credentials—including professional licensing and private certification—with funds from their plan. As introduced, the legislation supports both new and existing PE licenses and NICET certifications. A companion bill, [S. 905](#) , was introduced by Sen. Amy Klobuchar (D-MN).

NSPE will work with the Professional Certification Coalition leadership to help move these bills through the legislative process.

Scammers Target Licensed Professionals

Scammers typically pose as someone from your bank, the IRS, or tech-support services to steal sensitive information and money, but these bad actors have

added a twist to their schemes. Now, authorities are warning professional licensees that they are becoming prime targets for fraud.

In March, Arkansas Attorney General Leslie Rutledge issued a fraud alert to licensees and state licensing boards. Scammers are calling license holders with claims that their licenses are under investigation and at risk of being suspended if they don't make an immediate payment. The license holder's caller ID may even display the legitimate licensing office's phone number that has been spoofed by the scam callers.

These latest scams have increased for nurses and other licensed medical professionals, but they aren't limited to a particular state, region, or profession. In February, the Maryland Department of Labor issued an alert about phishing emails targeting licensees. The Hawaii Department of Commerce and Consumer Affairs warned licensees in July 2020 about individuals posing as state officials or law enforcement agents to intimidate potential victims into divulging personal information. And as early as 2019, the California Department of Consumer Affairs issued a fraud scheme alert to licensees of the agency's boards and bureaus, including the board that licenses design professionals.

Take Advantage of NSPE's Spring Webinars

Throughout April and May, NSPE will host a webinar every Wednesday starting at 2 p.m. EST. The webinars are available to members for \$99 (\$129 for nonmembers) and will include an online discussion and a 10-question quiz for the sessions to qualify for continuing education credit.
