

State News for NSPE Members

Massive Plant Coming to Concord, Securing Jobs

Last month, the Concord Planning Board approved construction of a 356,000-square-foot manufacturing facility, in which Bow-based commercial fryer manufacturer Pitco Frialator will combine all of its operations, [New Hampshire Business Review reports](#). This will allow the company to merge its three existing locations in various parts of the Concord area.

About 300 individuals will work at the facility. The company plans to install a solar array on the roof of the facility. “This project is a win not only for Concord, but also keeps a growing manufacturing business in New Hampshire safeguarding hundreds of local jobs,” Mayor Jim Bouley was quoted.

Gas Appliances Can't Be Blocked in New Hampshire

New Hampshire has become one of 20 states with laws on the books that prevent local lawmakers from putting restrictions on natural gas hookups, according to [Energy News Network](#). With positive implications for the natural gas industry, the trend has drawn criticism from environmental groups that believe the move hurts efforts to combat climate change. Others, including those with gas interests, advocate for consumers' freedom of choice.

In a growing trend, cities nationwide are considering measures that require new construction to use electric heating and stoves to cut back on fossil fuel emissions.

Delaware Improves Licensure Mobility for PEs

Legislation designed to expand licensure mobility for professional engineers in Delaware was signed by Governor John Carney on September 17. Members of the Delaware Engineering Society let state legislators know of their support for the bill through the [NSPE Advocacy Center](#), a critical factor in gaining support for its passage.

The amendments to the state's PE law provide multiple licensing opportunities. Individuals with an NCEES Record or who qualify as a Model Law Engineer will now find it easier to obtain a PE license in Delaware. The law was also amended to recognize applicants who are graduates of an engineering educational program approved by an accrediting agency that is a signatory to the Washington Accord. The accord covers 21 countries, including Australia, Canada, China, India, Ireland, Japan, Korea, New Zealand, Russia, South Africa, the United Kingdom, and the United States.

An applicant with a minimum of five years of continuous and verifiable experience as a professional engineer can also apply for comity licensure. These applicants must also submit five references, three of which must be from professional engineers licensed in the US, Canada, or an International Professional Engineer registrant under the International Engineering Alliance.

The law's new provisions also eliminate the requirement that licensees can use only an embossed seal, making way for use of a digital seal.

Challenges Facing the Profession

NSPE Immediate Past President Tricia Hatley, P.E., F.NSPE, offers her advice on how engineers can get the most satisfaction from their careers in a four-part series featured in *Machine Design*.

In the first article installment, [Challenges Facing the Profession](#), Hatley discusses the value of professional engineering licensure and the challenges the profession faces—population growth and urbanization, the recent pandemic and its short and long-term effects on society, the need for diversity to increase the ranks of engineers, and advances in technology.

Member Benefit: Build Your Financial Future with BHG

Did you know that NSPE has a member-benefit partner to support your financial needs? BHG offers members a variety of financial solutions including:

- Business loans to cover expenses such as debt consolidation, working capital, technology or equipment, business acquisition, or startup costs;
- Personal loan solutions to cover expenses such as debt consolidation, investments, life events, or major purchases;
- SBA 7(a) loans for business debt consolidation, or costs associated with startup or acquisition, real estate, renovation, or expansion; and
- Credit cards that offer low rates, cash back, and elite rewards, designed for professionals.

For more information or to get started, visit the [BHG website](#).

Not sure what financial solution is right for you but trying to improve your credit health? Learn four great ways to improve your credit health in BHG's recent webinar, [The Credit Gambit](#).
