UOG Civil Engineering Program Launches This Fall

The University of Guam will offer a new four-year Bachelor of Science in Civil-Engineering degree program starting in Fall 2019, UOG announced Thursday. The new degree was approved by the Board of Regents on Wednesday and stems from the two-year pre-engineering program currently offered by the university.

"The availability of an engineering degree here in Guam will meet growing demand among prospective students as well as a chronic need for engineers in the workforce in Guam and the Western Pacific," said Shahram Khosrowpanah, dean of the School of Engineering.

Enrollment in the program has grown with an almost 20-percent increase since the last semester. As of December 2018, the program has 159 declared pre-engineering majors, stated the release.

Advance Your Engineering Career at PECON19

The ability to manage projects and lead teams is crucial to advancing your career as a professional engineer. Even if you have years of experience in the field, there are still opportunities to enhance your knowledge. The PE Conference includes an entire track of leadership and risk management sessions to give
you the tools, resources, and best practices to further your career.

PE Conference sessions include

- Engineering Ethics and the Law;
- How to be an Effective Witness;
- How to Lead Without Authority;
- Managing Project Risk;
- How Not to Fail as a Leader;
- Passing Down Institutional Knowledge.

Visit the PE Conference website for a full listing, including descriptions, of these and other sessions designed exclusively for PEs. Register today!

Providing Feedback at Work: The STEER Methodology
May 22 at 2 p.m. Eastern

What if you could find better ways to get your staff to act with more proficiency? The results for your business would be significant. Happier customers. More satisfied co-workers. And, you would be relieved of some sources of stress.

This presentation on providing feedback in the workplace suggests tools that you can use to give more effective feedback to your colleagues and other personnel. STEER is an acronym that represents five main elements of feedback: specificity, timing, explanation, emotion, and reinforcement.

NICET: Developing a Qualified Workforce
May 29 at 2 p.m. Eastern

Through credentialing with the National Institute for Certification in Engineering Technologies (NICET), professionals in engineering technologies can set themselves apart as the most exceptional technicians in their field.
Join NICET's Chip Hollis as he discusses the ways in which credentialed technicians earn certifications to further their careers, earn the respect and confidence of employers, and continue to safeguard the public.
