Guam Power Authority Seeks Engineer III Applicants

The Guam Power Authority seeks to hire a qualified individual for an Engineer III level position. Access more information about the position details and requirements [here](#).

The Engineer III position involves professional and supervisory civil, mechanical, electrical, telephone, traffic, environmental, or architectural engineering work. Employees in this class perform the full range of complex duties in the professional specialty and supervises an engineering unit or section; or supervises and coordinates a major engineering support program.

Interested applicants may call or visit the Human Resources Division at the Gloria B. Nelson Public Service Building at Route 15 Fadian, Mangilao, (671) 648-3130, between 8 a.m. and 5 p.m. (Monday through Friday) for additional information and to receive an application for employment-Form A or visit the [agency website](#). Applicants can submit an application in person, through facsimile (671) 648-3160, or e-mail to gpahr@gpagwa.com.

Licensing Board Meeting

The Guam Board of Registration for Professional Engineers, Architects & Land Surveyors will hold its next meeting on **Thursday, October 14** at 3 p.m.

Access the [board website](#) for more information.

Guam Company Awarded \$14 Million Navy Grant for Pipeline Construction Project

Core Tech-HDCC-Kajima LLC, of Tamuning, Guam, has been awarded a \$13.95 million contract to construct a reinforced concrete blast surface over an existing fuel manifold at a military fuel pipeline facility, according to an article on

postguam.com.

The project will facilitate the demolition and removal of a subterranean valve vault containing petroleum lubricant pipelines and the construction of a new hardened concrete building structure and hose connection vault.

Solar Farm Operator Fined \$25 Million for Erosion Negligence

The Guam Contractors License Board has fined Samsung E&C America Inc. about \$25.5 million for failing to implement erosion mitigation measures at the site of the controversial solar farm project in Mangilao owned by KEPCO Mangilao Solar LLC, according to [The Guam Daily Post](#).

The fine was levied in response to environmental damage caused by runoff from the site that affected nearby properties and the historic Marbo Cave, which were covered with silt and muck after heavy rains, the *Post* reports. Investigators found that erosion control measures had been part of the original plans for the project, but they hadn't been carried out. Samsung admitted fault.

Anti-Licensing Forces Miss the Point

Extreme anti-licensing bills have popped up in numerous states and are posing a threat to the rigorous and established professional standards followed by PEs, architects, and others who design and construct the built environment, [according to an op-ed in The Hill](#).

Lawmakers calling for these extreme measures don't differentiate between barbers and manicurists, for example, and PEs and architects, say Tom Smith, executive director of ASCE, and Michael Armstrong, CEO of NCARB. "In their absolutist free-market view, reflected in the language of their model legislation, a visit to a barbershop or beauty salon should be treated the same as designing a bridge or water treatment plant."

The legislative proposals range from measures that [would eliminate licensing entirely](#) to so-called "Universal Licensing" bills that would require states to accept licenses from any state regardless of whether the out-of-state license had the same level of qualifications behind it.

NSPE Calls for PE Role in AI Risk Management

To protect the public from the potential dangers of artificial intelligence applications, NSPE is calling for the involvement of licensed professional engineers in the AI development process.

NSPE's [recommendations were submitted](#) to the National Institute of Standards and Technology in response to NIST's request for input on an artificial intelligence risk management framework. The recommendations advocate for professional engineers or certain certified individuals to be included within the risk management framework, which covers all levels of development and implementation.

"This individual would be responsible for making decisions related to protecting the public, including those who would use or potentially be affected by an AI application," wrote NSPE President Rick Guerra, P.E., F.NSPE. "Oversight responsibility should include having the authority to approve or reject the process, methodology, or other characteristics of the specific AI project. Having a credentialed individual to ensure these considerations are made can reduce risk that an artificial intelligence application will fail."

Meet the 2021 Scholarship Winners

The [NSPE Education Foundation](#) recently awarded several scholarships to support talented students pursuing engineering. Meet the 2021 winners:

Markie Ash, of Waupaca, Wisconsin, is winner of the [Auxiliary Legacy Scholarship](#) and the [George B. Hightower, P.E. Fellowship](#). Ash is studying civil engineering with a structural emphasis at University of Wisconsin-Platteville. The \$2,500 auxiliary scholarship is awarded annually to a female undergraduate entering, or continuing, her junior year of a four-year ABET-accredited engineering program. The \$3,000 Hightower Fellowship is awarded annually to an engineering undergraduate or graduate student who is enrolled in, or graduated from, an ABET-accredited engineering program.

Justin Sivasothy is this year's recipient of the [Maureen L. and Howard N. Blitman, P.E., Scholarship to Promote Diversity in Engineering](#). The \$5,000 scholarship is awarded to a high school senior from an ethnic minority going into an ABET-accredited engineering degree program at a four-year college or university. Sivasothy, of Sugar Land, Texas, is attending the University of Texas at Austin.

The \$5,000 [Steinman Scholarship](#) has been awarded to five students studying in ABET-accredited programs this academic year. **Michael Kadus** (Chicago, Illinois) is studying industrial engineering at Purdue University. **Robert Schneider** (West

Coxsackie, New York) is studying civil engineering at Clarkson University. **Annabel Sharnowski** (Novi, Michigan) is studying mechanical engineering with a minor in electrical engineering at the University of Michigan. **Noah Struck** (Alexandria, Minnesota) is studying civil engineering at the University of Minnesota-Twin Cities. **Jacob Witlin** (Ellicott City, Maryland) is studying fire protection at the University of Maryland.

Nominations Open for Federal Engineer of the Year Award

Honoring the commitment of federal engineers to innovation and service is the hallmark of the [Federal Engineer of the Year Award](#). Nominations for the award, which attracts participation from more than a dozen federal agencies, are open until **October 31**.

The FEYA ceremony is scheduled for February 24, 2022, at the National Press Club in Washington, DC. Tickets will be available for sale in January. [Apply or nominate a worthy engineer](#).

The 2021 Federal Engineer of the Year

Major Monica Pickenpaugh, Ph.D., P.E., of the US Air Force, was named NSPE's 2021 Federal Engineer of the Year Award winner during a [virtual awards event](#) in February. As US Forces Korea's chief of construction, she directed \$5.7 billion of funded construction in the Republic of Korea. As part of a sharing agreement with the US, the construction program supports USFK commanders' defense efforts through critical projects.
