Professional Licensure Renewals Due in April

The annual registration for professional engineers, architects, and land surveyors licensed in Guam will expire on April 30, and will become invalid after that date unless the renewal fees are paid. Access a Guam licensing board memo for guidance on the renewal process.

Until Cabras Generator is Repaired, Guam Vulnerable to Outages

Guam Power Authority’s damaged Cabras 1 generator could be repaired early as next month, the company’s general manager John Benavente told reporters recently. The generator's boiler exploded in early February. The island is more vulnerable to outages until the 55-megawatt oil-burning generator is repaired, according to guampdn.com.

Benavente said most of the damage was due to "lagging" and that the boiler still had water in it after the explosion, which occurred at the boiler's air preheater.

The Cabras 1 and 2 generators are scheduled to be retired in 2024, but they will be needed until the new 198-megawatt Ukkudu power plant starts to operate in April 2024.

Starbase Guam Created to Interest Young People in STEM Careers

A program that gives youngsters hands-on STEM experience has been created by the Department of Defense as a way to address labor shortages in science, technology, engineering, and math career-related fields. Starbase Guam provides 25 hours of stimulating experience in a week-long program for underrepresented students across the island.
Dr. Leah Beth Naholowaa, the program’s director, told KUAM News, "Starbase is a STEM-based curriculum program. It's a hands-on and minds-on program, it's a very engaging curriculum, really attracts students to learn more about science, technology, engineering, and math."

Meet the 2022 Federal Engineer of the Year

Robert Zueck, Ph.D., P.E., was named NSPE's Federal Engineer of the Year during a virtual awards event on February 24 for his discoveries and contributions in the engineering field. The Federal Engineer of the Year Award, sponsored by the Professional Engineers in Government, honors engineers employed by a federal agency that employs at least 50 engineers worldwide.

Zueck works in the US Department of the Navy's Naval Facilities Engineering Systems Command (NAVFAC), Expeditionary Warfare Center at Port Hueneme, California. He is heralded for applying his vibration research to military defense projects for which engineers can now design beyond the speed, agility, and stealth limitations of many military sensors, weapons, and platforms.

“Every success for me has come out of the hard teamwork of many fellow engineers and scientists,” Zueck stated. “I thank them all—particularly those who provided valuable constructive criticism of my rather unique research results.”

In a basic research project conducted several years ago, Zueck discovered how geometrically complex vibrations initiate, grow, and sustain themselves, often limiting higher performance for many combat systems. He used this new vibration knowledge to improve the Expeditionary Warfare Center’s modeling capability for designing, analyzing, and deploying towed sensors, ship moorings, sub-sea arrays, and other slender naval structures.

“This basic science discovery could be very useful for modeling, simulating, and testing in many other fields of engineering and science,” he said.

Mark Your Calendars: 2022 Professional Engineers Conference
The 2022 NSPE Professional Engineers Conference will bring together professional engineers across disciplines from August 1–3, in Philadelphia at the Sheraton Philadelphia Downtown. Registration for the conference opens in April.

PECON attendees can access specialized content from experts as they discuss issues and trends impacting the profession, develop power skills and life skills not taught in school, and advance their careers by expanding their expertise and preparing for future developments in the industry.

The seventh annual PE Day will coincide with the conference’s culmination on August 3. These two events allow PEs to join their peers in celebration of the profession and advocacy for licensure.

NSPE will continue to monitor health and safety guidelines while we proceed toward hosting this in-person event.

**2022 NSPE Student Scholarships Available**

Students can apply for the 2022 NSPE Education Foundation scholarships through a new online submission platform. The following scholarships have an April 1 application deadline:

- The **Maureen L. and Howard N. Blitman, P.E., Scholarship to Promote Diversity in Engineering** is awarded annually to a high school senior from an ethnic minority who has been accepted into an ABET-accredited engineering program at a four-year college or university.

- The **Auxiliary Legacy Scholarship** is awarded annually to a female undergraduate entering or continuing their junior year of a four-year ABET-accredited engineering program.

- The **Steinman Scholarship** is awarded annually to undergraduates entering or continuing their junior year in a four-year ABET-accredited engineering program.

- The **George B. Hightower, P.E. Fellowship** is awarded annually to a current engineering undergraduate or graduate student who is enrolled in, or graduated from, an ABET-accredited engineering program.
Coming soon! The Swadesh and Om P. Popli, P.E., P.L.S. Scholarship will be a multi-year scholarship, providing $5,000 each year for the recipient’s four-year education. Applicants must be a female high school senior from an ethnic minority pursuing a degree in engineering at an ABET-accredited program.
