

## State News for NSPE Members

### Hawaii Gets Share of \$1.2 Billion in Airport Infrastructure Grants

US Secretary of Transportation Elaine L. Chao recently announced that more than \$1.2 billion in airport safety and infrastructure grants will be awarded through the Federal Aviation Administration to 405 airports in 50 states, Puerto Rico, the US Virgin Islands, and other territories.

The Daniel K Inouye International airport in Honolulu will receive \$43.5 million for a runway widening project.

The total includes over \$1 billion from the Airport Improvement Program and \$152 million in Coronavirus Aid, Relief, and Economic Security Act grants to equal a 100% federal share. The grants will be used for a variety of critical infrastructure and safety projects. The projects include purchasing aircraft rescue and firefighting equipment, constructing runways and taxiways, repairing runways and taxiways, installing aircraft lighting and signage, conducting airport master plan studies and installing airport perimeter fencing.

### Firms Partner to Distribute Roadway Sensors

Iteris Inc., a global leader in smart mobility infrastructure management has partnered with Phoenix Pacific Inc. to expand the distribution of its roadway sensors technology in Guam and Hawaii.

The deal will see Iteris' full range of advanced vehicle, bicycle and pedestrian detection solutions, as well as its cloud-based performance analytics software, sold through Phoenix Pacific's extensive distribution network, in support of Hawaii and Guam's transportation improvement program goals to reduce congestion, and improve safety and efficiency.

The partnership will help transportation agencies in the region address traffic congestion and aging infrastructure issues.

## **NASA Awards Grant to U of Hawaii–Honolulu to Improve Diversity in Engineering**

NASA has awarded a planning grants to programs at the University of Hawaii–Honolulu and 13 other minority serving institutions through its Minority University Research and Education Project (part of the agency’s Office of STEM Engagement).

The grant will support the university’s project to develop a strategic plan for the Hawaii’s Aspiring Engineers Academy which is designed to provide engineering opportunities for the state’s underrepresented and underserved demographic.

The grants, totaling more than \$587,000, are part of a phased partnership effort with the National Science Foundation. The grants will encourage the development of coalitions aimed at broadening participation in engineering, in alignment with the goals of the NSF Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science initiative.

## **NCEES Monitors Pandemic as October Exams Near**

The National Council of Examiners for Engineering and Surveying is closely monitoring the impact of COVID-19 on the October 2020 pencil-paper exam administration. All exam site locations are currently proceeding with reduced capacity restrictions in place. Changes to state and local requirements that further reduce capacities for groups and events may impact the number of examinees that are able to test at a specific site. NCEES will continue to monitor these changes between now and exam day.

NCEES is aware that capacity restrictions are preventing many examinees from being able to register for the October exam administration. In order to accommodate as many examinees as safely as possible, NCEES has moved up the transition to computer-based testing for the PE Electrical and Computer: Power exam (registration is open with appointments starting on December 1) and will offer a regional pencil-paper exam administration in January for PE Civil examinees.

### **Regional Pencil-Paper PE Civil Exams Slated for January**

To accommodate as many pencil-paper examinees as safely as possible, NCEES

has added a regional exam administration in several locations on January 26, 2021, exclusively for PE Civil examinees. Registration for the regional PE Civil exam administration will open November 1, 2020, and close December 13, 2020, at 3 p.m. (EST).

The exam will be administered in the following cities: Phoenix, Arizona; Pomona, California; Denver, Colorado; Hartford, Connecticut; Orlando, Florida; Topeka, Kansas; Minneapolis, Minnesota; Raleigh, North Carolina; Cleveland, Ohio; Houston, TX; and Seattle, Washington. Additional cities may be added before registration opens.

Examinees who are located outside of these states should check with their state licensing board prior to registering to determine their eligibility to test outside of their jurisdiction.

[Access ncees.org](https://www.ncees.org) for exam updates.

## Society Releases Policy Guide on Emerging Tech, Public Safety

A new NSPE policy guide has added the professional engineer's voice to the growing conversation around the safe development and deployment of emerging technologies. The guide's safety recommendations begin with the premise that the public's interests are best served when licensed professional engineers oversee the design, development, and/or deployment of emerging technologies.

NSPE's Emerging Technologies Task Force crafted the recommendations as a starting point for adopting standards that protect public safety and to provide guidelines to measure the safety readiness of technologies before they are deployed. The guide is intended for public policy decisionmakers, regulators, manufacturers, and others.

The Society strongly encourages the adoption of these recommendations and is available as a resource for information and drafting of regulations.

## Nominations Open for Federal Engineer of the Year Award

Honoring the commitment of federal engineers to innovation and service is the hallmark of the [Federal Engineer of the Year Award](#). Nominations for the award, which attracts participation from more than a dozen federal agencies, are open until **October 31**.

The FEYA ceremony is scheduled for February 18, 2021, at the National Press Club in Washington, D.C. Tickets will be available for sale in January and [sponsorship opportunities](#) are available.

Timothy Sullivan, P.E., who has brought mechanical, civil, and environmental engineering expertise to the Air Force Civil Engineer Center in San Antonio, Texas, was named the 2020 FEYA winner. Sullivan developed the first-ever comprehensive execution guidebook to support \$604 million in nationwide construction, and as part of that three-year project, he crafted a project risk management process to identify vulnerabilities of construction projects greater than \$5 million.

## Upcoming Webinars: Traffic Signals, Forensic Engineering, Communications Skills, Vintage Trolley Cars, Design Safety

NSPE's **PE Institute** helps members stay current in the profession, earn PDHs, and advance in their careers through webinars on important topics. The webinars are held at 2:00 p.m. – 3:00 p.m. EST at a member price of \$99 (\$129 for nonmembers).

**September 23**

[The Physics of the Yellow Traffic Signal: ITE's First Recommended Practice](#)

The webinar will focus on the Institute of Transportation Engineers' first recommended practice for calculating the duration of the yellow traffic signal.

*Presenter: Brian Ceccarelli, P.E.*

### **September 30**

#### [So, You Want to Launch a Forensic Engineering Consulting Practice](#)

Forensic engineers can operate as sole proprietorship, partnerships, professional corporations or be part of a multifaceted forensic engineering company or one of the many national forensic engineering investigation firms. This session addresses the opportunities for engineers interested in performing forensic engineering services as well as the issues they will need to address.

*Presenters: John Certuse, P.E., Michael Leshner, P.E., James Petersen, P.E., and Samuel Sudler P.E., F.NSPE*

### **October 7**

#### [The Four Languages of Influence](#)

Improve your influence by customizing your interactions to four distinct communication styles that will help make better connections.

*Presenter: Roger Grannis*

### **October 14**

#### [Vintage/Heritage Trolley Cars in Transit Use: Past, Present, and Future](#)

The presentation will help attendees better understand the unique nature, challenges, and opportunities of vintage and heritage trolley cars in actual public transit use in the modern age, including vehicle engineering support and technical assistance, for these vehicles.

*Presenter: Matthew Nawn, P.E., PMP*

### **October 21**

#### [Too Many Crashes at Your Roundabout? Learn Design Techniques to Optimize Safety](#)

This presentation will discuss how design safety principles affect how drivers receive and process information. For optimal safety and operations, the roundabout design must simplify decision-making and provide clear, concise information as to the correct way to drive the roundabout.

*Presenter: Mark T. Johnson, P.E.*
