

## State News for NSPE Members

### NSPE-DC Member Speaks on Education in the Time of COVID-19

NSPE-DC member Nadir Yilmaz, P.E., F.NSPE, was featured in a May/June *PE* magazine article that focuses on how engineering education has undergone profound change during the COVID-19 pandemic. NSPE member faculty are among those adapting to the new reality.

For Nadir Yilmaz that has meant an exponential increase in work. According to the professor and chair of the mechanical engineering department at Howard University in Washington, D.C., spring “break” was spent preparing for the transition to online learning. Since then, what was previously several in-person meetings a week has turned into five or more online ones, plus virtual student office hours.

In addition, Yilmaz points out, he and other faculty “are having to accomplish... online teaching, preparation, and advising around dealing with the education of young children.” The department chair has prioritized keeping school operations functioning as close to normal as possible while pushing aside his own research and professional development.

## Get Ready for *Virtual* PE Conference 2020 (#NSPEVirtual)

To protect the health, safety, and welfare of our members, while continuing to provide meaningful and valuable education and engagement opportunities, NSPE leadership has decided to postpone this year's Professional Engineers Conference (PECon) in Philadelphia until summer 2021. In its place, the Society will host an online Virtual PE Conference in August. Events will be centered around the annual celebration of PE Day, August 5.

The new virtual program will make it easier for attendees to participate according to their schedules. Sessions can be experienced in a live virtual environment or by accessing recordings at a more convenient time. Virtual PECon will be easily accessible and affordable due to the elimination of travel costs and reduction in registration fees. PDH credits will be available for education sessions comparable to the amount you could earn at a regular PECon. The virtual conference will also provide networking and social connection with colleagues in addition to professional development opportunities.

Current plans include:

- Education tracks and sessions, featuring many of the sessions already planned for **PECon 2020**;
- Tracks spread throughout the week at various times of day, empowering attendees to take in more of the content they desire;
- Recording all sessions to make them available for on-demand viewing;
- Hosting keynote speakers and senior leaders allowing for interactive Q&A with attendees; and
- Networking/roundtable topic discussions with peers by region and areas of practice, geared to increase dialogue and member engagement.

Stay tuned for more information on content and registration to come.

## Pandemic Forces Profession to Adjust

NSPE and its certification division [NICET](#), as well as state societies and individual members, are all adapting to a changed world.

Our latest [PE cover story](#) highlights how organizations and individual PEs are meeting the challenges with courage, compassion, and innovation. NSPE and its state societies are continuing to provide information, advocacy, and continuing education as staffers are sheltering at home. PEs are running companies from their bedrooms or dining rooms and working to ensure employee well-being while keeping businesses afloat.

No one knows what the future holds. But professional engineers will be among those helping to create that future—as always, prioritizing the public health, safety, and welfare.

[Read more from May/June PE magazine.](#)

*Update: NICET's certification testing for engineering technicians has started to return but on a reduced schedule. Pearson VUE, the company that manages testing centers for NICET exams as well as NCEES exams and those in many other professions, began reopening on May 1. Centers will be operating at 50% capacity and for limited hours. The reopening of testing centers in Pennsylvania and Alaska has not been scheduled, due to locally imposed restrictions. For the latest information, visit [NICET's COVID-19 response web page](#).*

Read the latest on NCEES's FE and PE exams.
