

## State News for NSPE Members

### PE Wins Reelection to House Seat

Longtime NSPE/WVSPE member David McKinley, P.E., won reelection to the House of Representatives, defeating Democrat Natalie Cline. He has represented District 1 in northern West Virginia since 2011. Born in Wheeling in 1947, McKinley graduated from Purdue University with a degree in civil engineering and spent 12 years in the construction industry before establishing his own firm. Today, McKinley Architecture and Engineering has offices in Wheeling, Charleston, and Pittsburgh.

### WVU's Engineering Expertise Helped Attract Hyperloop Center

"A unique blend of expertise in multiple areas of engineering at West Virginia University, and a shared purpose have culminated in an integrated solution to meet the unique challenges of the Virgin Hyperloop Certification Center, slated to be located in the West Virginia highlands," reports [MyBuckhannon.com](#). The university's selling points include expertise in the integration of high strength polymer composites into various types of infrastructure, electromagnetic systems, vacuum systems, mining, autonomous systems, and advanced manufacturing. The area terrain and soil conditions were also optimal for the six-mile test track.

### PEs, Technicians, and Teamwork

Construction projects come with numerous roles and responsibilities that must be carried out with skill and efficiency to achieve success. For professional engineers, perhaps the most critical relationship is with the project's engineering technicians.

In a recent [NSPE webinar](#) on PEs, technicians, and the engineering team, Shannon Looney, P.E., F.NSPE, called the contributions of skilled technicians

“invaluable.” As the senior project manager for the Glenn E. Mitchell and Company Inc. in Knoxville, Tennessee, Looney specializes in concrete construction. He relies heavily on the data collected by technicians—“the technicians with their hands on the ground that work directly with the labor force and is able to tell us the data we need...to make real-time decisions on important aspects of production.”

The webinar covers many aspects of the PE-technician dynamic and the factors that make a strong team. In addition to Looney, the webinar panel included Kent Dvorak, P.E., of Terracon’s Salt Lake City office; John Quidley, SET, president and senior quality consultant with Caliber Consulting Services LLC; and Kenny Johnson Jr., P.G., with expertise in the geotechnical and materials testing industry.

The webinar, “Put Me in, Coach! The Engineering Team from Concept to Completion,” can be [accessed online for free](#).

## **Georgia Adopts Structural PE Requirement**

Beginning January 1, a professional engineer who designs, signs, and seals plans for “designated structures” in Georgia must be licensed as a structural engineer. Legislation signed into law in August, creates a professional structural engineer licensing process, which includes a requirement that a licensure applicant take the 16-hour PE Structural exam.

The process [establishes several paths](#) for current licensees to be grandfathered into obtaining an SE license, which is supplemental to the PE license. An individual licensed in Georgia will have to submit an affidavit form and pay fees to the [State Board of Registration for Professional Engineers and Land Surveyors](#) from November 1 to December 31, 2020 to participate in this grandfather process.

In June, NSPE and the Georgia Society of Professional Engineers expressed concerns that a SE license requirement would create an additional layer of bureaucracy, requiring an engineer who is qualified to practice in more than one area to obtain multiple licenses.

NSPE believes that fragmenting the professional engineering license into discipline-specific title or practice acts weakens rather than strengthens the integrity of the license. The Society advocates for an alternative structural engineering certification that could be obtained after earning a PE license to offer more flexibility and without drawing a hard line between structural and other engineering disciplines.

## **Officer Nominations Open**

Nominations are now open for the positions of NSPE 2021–22 vice president and 2021–23 treasurer. The individual nominated for vice president will advance to president-elect in 2022–23 and president in 2023–24. The deadline for submitting nomination packages for either position is **January 11, 2021**.

Please share this information with those you believe should be considered for the next leaders in our Society. Additional details can be found in the [Leadership Toolbox](#). If you have any questions, email the NSPE Executive Office at [executive@nspe.org](mailto:executive@nspe.org).
