Blind Student Fundraising for an Accessible Engineering Device

Haylee Mota, a young woman from East Providence who is visually impaired, has been accepted into college to study mechanical engineering. She set up a GoFundMe site to raise money for a graphic device she needs since she cannot use CAD programs traditionally used by other students. A touch interface device called the Graphiti tactile graphics display by Orbit Research would allow her to feel images on the device’s screen.

Through an array of moving pins, the Graphiti displays charts, drawings, flowcharts, floorplans, images, and photographs on a tactile display. The device uses a touch interface to enable the user to draw on the display and create their own drawings with a finger. The touch display allows for gestures such as scrolling, zooming, rotation of an image, and the ability to move the image by physically nudging the picture on the display. The Graphiti plugs into multiple other devices, including computers, a talking graphing calculator, telescopes, and microscopes.

Donors have already given more than enough to cover the cost of the device, which will also be useful to Mota outside of the classroom for navigation and in her career as a mechanical engineer, she wrote on the fundraising page.

URI Gift Supports Underrepresented Engineering Students

Anonymous donors have contributed $2.5 million that will endow a URI fast-track degree program that will give preference to populations who are traditionally underrepresented in engineering, including women and people of color. The funding will pay for one year of full tuition and fees for students enrolled in the final year of the program, which offers an accelerated timeline to complete a bachelor’s and master’s degree in five years. The donations were made to honor College of Engineering Dean Raymond Wright, who plans to retire at the end of the academic year.

Green Energy Collaboration to Help RIPTA Save on Energy

The Rhode Island Public Transit is collaborating on a green energy project that allows it to save on electric costs with energy credits from a solar installation located on a waterfront site in East Providence. Under a remote net energy agreement with Kearsarge Energy, RIPTA will receive credit for power generated by a 6,000-plus panel solar installation that Kearsarge constructed on the site of a former tank farm. The transit authority estimates this will save it at least $250,000 a year in electricity costs.

We Need Your Input on Proposed Changes to Engineers’ Creed

The Engineers’ Creed Survey will be open until 9:00 pm EDT on April 23. As outlined in previous communications, NSPE is collecting feedback on proposed modifications to update outdated language without altering the philosophical underpinnings of the organization. The hope is that the use of broad, inclusive language will help all engineers within our organization incorporate their personal beliefs and experiences to better the profession.

Thank you to members who have already completed the survey. Please note: If you previously completed the survey, you will not be able to take it again.

If you have not had a chance to provide feedback, we encourage you to do so. Your input is important.

Thank you for your assistance, and thank you for being a member of NSPE.

Watch NSPE’s New YouTube Vlog on Legislative and Regulatory Issues

Episode 3 of NSPE’s new Committee Corner vlog covers the Senate Environment and Public Works Committee and the March 24 markup of S.914 - the Drinking Water and Wastewater Infrastructure Act of 2021.

Ask Your Senators to Back Drinking and Wastewater
**Infrastructure**

Professional Engineers play an integral role in the development and maintenance of the nation's infrastructure, including infrastructure that provides clean drinking water and safe wastewater treatment.

Every community in the United States needs clean drinking water, and wastewater treatment facilities that keep the community clean and safe. The Senate is expected to vote this week on a bill to fund these vital systems.

**Ask Your Senators to Vote "Yes" on S.914**

S. 914, The Drinking and Wastewater Infrastructure Act of 2021, ensures that communities have both, by providing much-needed funding for our drinking and wastewater systems. The bill authorizes funding for the Safe Drinking Water Act programs, and the Federal Water Pollution Control Act. It also establishes programs that direct services and funding to low-income and under-served communities, and allocates money to respond to cyber threats. Share your engineering expertise with your lawmakers, and ask them to support this crucial funding.

S. 914 was voted out of the Senate Environment and Public Works committee with unanimous, bipartisan support. And in a press release dated April 15th, Majority Leader Schumer said the bill could be voted on by the full Senate as early as this week.

**Ask Your Senators to Vote "Yes" on S.914**

Please take a moment to contact your Senators, express your support, and ask them to vote "yes" on S. 914.

**Society Backs House Bills on Engineering Education and 529 Savings Plans**

NSPE supports the WORKER Act (H.R. 594), which establishes a $20 million grant program to make specialized engineering programs available in K–12 schools. The bill was introduced by Rep. Tim Ryan (D-OH) and Rep. Susan Wild (D-PA) to improve worker training, retention, and advancement.

The grants will assist with teaching students the overall analytical and experimental approaches used in engineering and engineering technology; and increase participation of under-represented student groups in the engineering and engineering technology pipeline.

NSPE continues to advocate for passage of the Freedom to Invest in Tomorrow’s
Workforce Act (H.R. 2171). This legislation was successfully reintroduced by Rep. Abigail Spanberger (D-VA) with support from the Professional Certification Coalition. The bill allows the beneficiaries of tax-advantaged 529 education savings plans to pay the costs associated with obtaining or maintaining postsecondary credentials—including professional licensing and private certification—with funds from their plan. As introduced, the legislation supports both new and existing PE licenses and NICET certifications. A companion bill, S. 905, was introduced by Sen. Amy Klobuchar (D-MN).

NSPE will work with the Professional Certification Coalition leadership to help move these bills through the legislative process.

Members can view and participate in advocacy campaigns at the NSPE Advocacy Center.

**Scammers Target Licensed Professionals**

Scammers typically pose as someone from your bank, the IRS, or tech-support services to steal sensitive information and money, but these bad actors have added a twist to their schemes. Now, authorities are warning professional licensees that they are becoming prime targets for fraud.

In March, Arkansas Attorney General Leslie Rutledge issued a fraud alert to licensees and state licensing boards. Scammers are calling license holders with claims that their licenses are under investigation and at risk of being suspended if they don’t make an immediate payment. The license holder’s caller ID may even display the legitimate licensing office’s phone number that has been spoofed by the scam callers.

These latest scams have increased for nurses and other licensed medical professionals, but they aren’t limited to a particular state, region, or profession. In February, the Maryland Department of Labor issued an alert about phishing emails targeting licensees. The Hawaii Department of Commerce and Consumer Affairs warned licensees in July 2020 about individuals posing as state officials or law enforcement agents to intimidate potential victims into divulging personal information. And as early as 2019, the California Department of Consumer Affairs issued a fraud scheme alert to licensees of the agency’s boards and bureaus, including the board that licenses design professionals.
