

Personalized Genomics in Oncology:

Presented by Foundation Medicine with Special Speaker

Enjoy an evening of engaging conversation, curated cuisine, and insights from thought leaders in the field as we discuss how NGS is unraveling the complexities of the genome and powering breakthroughs in healthcare, research, and diagnostics.

Event Details

Date: Tuesday, June 16th

Location: Brannigan's

Kalispell, MT

Time: 5:00pm – 8:00pm

Learning Objectives

1. Summarize recent advances in DNA- and RNA-based NGS assays, including **FoundationOne® CDx** and **FoundationOne® Heme**.
 2. Evaluate real-world case studies demonstrating integration of NGS and IHC results to guide targeted and immuno-oncology therapies.
 3. Identify practical workflow solutions for incorporating NGS into both community and academic oncology settings.
-

We look forward to an engaging discussion and an enjoyable evening.
