Personalized Care and Tailored Treatment Plans for Gynecologic Cancers

Practical Nurse Guidance on Utilizing Modern Therapeutic Approaches

 **Wednesday, July 16, 2025**

 **Kimberly Halla, MSN, FNP-C**

 **6:30 PM - 8:30 PM ET**

Family Nurse Practitioner
Arizona Center for Cancer Care
Scottsdale, Arizona

 **Stonewood Grill & Tavern**
100 S Atlantic Ave
Ormond Beach, FL 32176

Activity Description

The treatment landscape for gynecologic cancers—such as ovarian, endometrial, and cervical cancers—is advancing rapidly. Antibody-drug conjugates (ADCs), immunotherapy, PARP inhibitors, combination approaches, and other innovative strategies have become integral parts of standard care, with ongoing research exploring numerous combination options. These innovations require precise molecular classification to help personalize treatment decisions. In light of these advancements, how can oncology nurses effectively translate the extensive clinical evidence for established and emerging therapies into practical, real-world care for patients with gynecologic cancers?

In these PeerView Live Chapter workshops, presented during Oncology Nursing Society (ONS) meetings and developed in collaboration with the National Ovarian Cancer Coalition (NOCC) and the Foundation for Women's Cancer (FWC), an oncology nurse expert will empower nurses with essential insights into modern therapeutic approaches for managing gynecologic cancers, including insight on the essentials of diagnostic testing and patient support throughout treatment, with a focus on managing adverse events. Through case studies, the expert faculty will provide actionable guidance on patient education and support.

Educational Objectives

Upon completion of this activity, participants should be better able to:

- Summarize the safety and efficacy data for the use of personalized approaches (eg, immunotherapy, ADCs, PARP inhibitors, other emerging options) for the treatment of gynecologic cancers
- Incorporate nurse-led approaches to integrate individualized management and education plans for patients with endometrial, cervical, and ovarian cancers, including diagnostic testing, safety considerations, and ongoing clinical trial opportunities
- Utilize efficient team-based safety techniques to promptly recognize, manage, and advise patients on a range of adverse events associated with therapies for endometrial, cervical, and ovarian cancers

Accreditation, Support, and Credit

 In support of improving patient care, this activity has been planned and implemented by PVI, PeerView Institute for Medical Education, the Foundation for Women's Cancer, and the National Ovarian Cancer Coalition. PVI, PeerView Institute for Medical Education, is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Support

This activity is supported by independent educational grants from AbbVie, AstraZeneca, Daiichi Sankyo, and Pfizer Inc. and Genmab.

Nurses

Successful completion of this nursing continuing professional education activity will be awarded 1.0 contact hour(s) and 0.75 contact hour(s) in the area of pharmacology.
