ASSOCIATION OF POPULATION CENTERS

2021 Resource Guide

Greetings –

On behalf of the Association of Population Centers (APC), I am proud to share with you the 2021 edition of the **APC Resource Guide**, a compendium of individual profiles of the nation's premier independent population research organizations. In these pages, you will find a comprehensive overview of the current state of population science including research subject matter, interdisciplinary and cross-institutional collaborations, and applications to real-world decision-making and policy development.

Founded in 1991, the Association of Population Centers is an independent group of university-based centers and private sector research organizations whose mission is to:

- Foster collaborative demographic research and data-sharing
- Translate basic population research for public policy decision-makers
- Provide educational and training opportunities in population studies

Approximately 40 distinct entities comprise the APC, including broad-based population centers as well as several centers focused specifically on aging populations. All the centers are by design interdisciplinary, drawing faculty and research staff from diverse fields such as demography, economics, geography, medicine, public health, anthropology, biology, public policy, statistics, and sociology. Scholars at APC centers conduct research on the individual, societal, and environmental implications of population change and vice versa. Their diverse interests include topics such as aging and retirement, minority health, adolescent health, childcare, immigration and migration, family formation and dissolution, fertility, morbidity and mortality, post-disaster resilience, housing and homelessness, rural and urban populations, and population forecasting. This research, in turn, serves to inform planning, policy formulation, and decision-making at the local, regional, national, and even international levels.

APC centers rely on an array of public and private funding sources to support their scientists' research. *The National Institute on Aging* and the *Eunice Kennedy Shriver National Institute of Child Health and Human Development* at the *National Institutes of Health* provide most of the competitive federal funding for demographic research. *The National Science Foundation* and the *Agency for International Development* are two other important sources of federal support. Population researchers also rely on accessible data produced by the *Census Bureau*, the *National Center for Health Statistics*, the *National Center for Education Statistics*, and the *Bureau of Labor Statistics* to conduct their research. For more information about the Association of Population Centers, please visit www.popcenters.org.

Sincerely,

Sara R. Curran
Association of Population Centers

Mission Statement

Berkeley CEDA promotes the discovery and dissemination of knowledge on the economics and demography of aging. We support the infrastructure and pilot studies necessary for larger research projects; the expansion of national and international networks of researchers; and the development of methods for the analysis of state-of-the art, often-longitudinal, social science data. Through publications, conferences, and public appearances, Berkeley CEDA's affiliates share their findings with policy makers, other academics, and the general public. Berkeley CEDA is one of eleven centers on the economics and demography of aging nationwide supported by the National Institute on Aging.

Mission Statement

The Berkeley Population Center facilitates interdisciplinary collaboration and innovation in population research, while providing essential and cost-effective resources in support of the development, conduct, and dissemination of our work. Our center enhances the quality and quantity of population research conducted at Berkeley; and develops new research capabilities to advance population research through innovative approaches.

Mission Statement

The California Center for Population Research at UCLA (CCPR) is an interdisciplinary research organization. CCPR supports and fosters innovative and ambitious research and training in population science. We provide research resources, services, and environment to enhance research quality. CCPR trains the next generation of population scientists to carry out informed research in social, economic, and public health. CCPR seeks deeper understanding of the demographic and social determinants of health and the effects of health on population dynamics and socioeconomic well-being.

University of California, Irvine
3151 Social Science Plaza B
Irvine, CA 92697
cpip.uci.edu
(P): 949.824.8851

Mission Statement

The Center for Population, Inequality, and Policy at UCI is focused on advancing research on socioeconomic factors that directly impact inequality. Faculty in the center investigate the causes and consequences of this inequality as well as policies and other strategies designed to improve well-being of the less advantaged – including employment, education, health, housing and income. UCI researchers across the social sciences, public health, education, social ecology, and natural sciences have a track record of high-quality population research on inequality – research that spans disciplinary boundaries and important areas of public policy.

CENTER ON GENDER EQUITY AND HEALTH

Anita Raj, *Director*

University of California, San Diego

9500 Gilman Drive, #0507
Central Research Services
Facility, La Jolla, CA 92093
<http://geh.ucsd.edu/>
(P): (858) 246-0066
GEH@ucsd.edu

Mission Statement

GEH conducts innovative multidisciplinary research on gender inequities in population health and development, and provides academic training toward elimination of health disparities related to gender and other social determinants of health for California, the United States, and low resource contexts worldwide.

Departmental Affiliations

- Medicine
- Public Health
- Economics

Bixby Center for Global Reproductive Health

Jody Steinauer, *Director*

University of California,
San Francisco
1001 Potrero Avenue
Ward 6D-12, Box 0842
San Francisco, CA 94110
bixbycenter.ucsf.edu
bixbycenter@ucsf.edu
(P) 628-206-5110

Mission Statement

The UCSF Bixby Center for Global Reproductive Health integrates research, training, clinical care, and advocacy to advance reproductive autonomy, equitable and compassionate care, and reproductive and sexual health worldwide. We are a multidisciplinary group of over 200 people based in the Zuckerberg San Francisco General Hospital Division of Obstetrics and Gynecology at the University of California, San Francisco (UCSF). Our members are physicians, nurses, advanced practice clinicians, social scientists, clinical researchers, and staff that span UCSF schools and departments.

Departmental Affiliations

School of Medicine:

- Obstetrics, Gynecology & Reproductive Sciences
- Family & Community Medicine
- Epidemiology & Biostatistics
- Psychiatry
- Pediatrics

School of Nursing:

- Institute for Health & Aging
- Family Health Care Nursing (SON)
- Institute for Global Health Sciences
- Institute for Health Policy Studies
- Osher Center for Integrative Medicine

Number of Faculty Affiliates: 90

Key Areas of Research

- **Abortion**
- **Adolescent sexual health**
- **Contraceptive research and services**
- **HIV and sexually transmitted infections**
- **Fertility, Pregnancy and childbirth**
- **Health equity**

Domestic Research Projects

- Access to pre-exposure prophylaxis (PrEP) for women
- Advanced training for providers and scholars (ACTIONS Fellowship, Kenneth J. Ryan Residency Program, TEACH)
- Advancing New Standards in Reproductive Health
- Beyond the Pill
- California Prevention Training Center
- Desire to Avoid Pregnancy scale
- Innovating Education in Reproductive Health
- Person-Centered Reproductive Health Program
- Sexual and reproductive empowerment scale for adolescents and young adults

International Research Projects

- Community reintegration after fistula repair
- Family AIDS Care & Education Services (FACES)
- Population mobility and its impact on HIV/AIDS
- Preterm Birth Initiative's East Africa Program
- Safe Motherhood Program
- Shama Maisha
- Strengthening People-centered Accessibility, Respect, and Quality
- Sexually transmitted infections in Pacific Island communities
- Trans communities in the Middle East
- UCSF-University of Zimbabwe Collaborative Research Programme

Regional Research

- Earned income credits for low-income pregnant people in the Bay Area
- Group prenatal care and produce prescriptions for pregnant people in the East Bay
- Motivating Interdisciplinary Lactation Knowledge (MILK) Research Lab

Research to Policy

- Health Workforce Pilot Project made it possible for advanced practice clinicians in California to offer early abortion care
- Research on contraceptive dispensing led multiple states to require insurance plans to prescribe a one-year supply
- Research on emergency contraception supported a switch to over-the-counter
- Social science amicus brief prepared by ANSIRH researchers cited in the Supreme Court's majority opinion *Whole Woman's Health vs. Hellerstedt*
- Research on integration of family planning and HIV services supported Kenyan Ministry of Health to adopt this approach

In the News

- Monica McLemore discussed year 2 of the pandemic and building trust in historically wronged communities in *The Atlantic*
- Ina Park discussed challenges to STD testing during the COVID-19 pandemic in the *New York Times*
- Cynthia Harper talked to *Science Friday* about advances in birth control and how we can do better
- Deborah Cohan talked to the *San Francisco Chronicle* about a Bay Area blood bank turning away gay and bisexual men because of an outdated, discriminatory policy
- Diana Greene Foster published a new book, *The Turnaway Study*, which was featured in outlets including *Fresh Air*, *Vogue*, and *The New Yorker*
- Carole Joffe wrote about conversations with providers and how they contradict the stereotypes put forward by the state of Louisiana in *June Medical Services v. Gee* in the *Washington Post*
- Monica Hahn talked about the effort to lift the FDA ban on blood donation from men who have sex with men on *Good Morning America* and in the *New York Times*
- Katrina Kimport talked to *The Atlantic* about how couples share the cost and burden of birth control
- Kelsey Holt warned about viewing fertility control as a solution to climate change in the *Los Angeles Times*

mcharles@soc.ucsb.edu
(P): 805-893-7281
(F): 805-893-8830

Mission Statement

The Leonard and Gretchan Broom Center for Demography facilitates research and training in social demography and population studies, with particular emphasis on social and economic inequalities and health disparities. Key issues explored by Center Associates include inequalities across social groups defined by gender, sexuality, race, ethnicity, and immigration status; population-environment interactions; the determinants of population health; migration flows; spatial demography; and the allocation of resources within and across families, workplaces, schools, and other social institutions.

Number of Graduate

Affiliates: 53

Key Areas of Research

- **Family**
- **Biodemography and Evolution**
- **Population Health and Environment**
- **Sex and Gender**
- **Education and Health**
- **Immigration, Race and Ethnicity**

Domestic Research Projects

- Social distancing responses to COVID-19 emergency declarations
- Time, population mobility, and HIV transmission
- Race/ethnicity and early childhood education
- Gender differences in the impacts of adolescent disadvantage
- Racial disparities in exiting and entering poor neighborhoods
- Women in the economics profession
- Health consequences of prejudice and discrimination
- Health incentives and food choice
- Gender and housework norms
- Trends in support for stay-at-home mothering
- Health costs of upward mobility among Latino/a American young adults
- Opinion dynamics in social networks
- Weight stigma, BMI and psychological and physical health

International Research Projects

- The effect of air pollution on body weight in China
- Early childhood education of Mexican-origin children
- Microbiota traits among Tsimane horticulturalists of the Bolivian Amazon
- Gender attitudes in Africa
- Farmers' use of mobile phone services in central Kenya
- Immune function during pregnancy across ecologically distinct populations
- Pregnancy, hookworm infection, and anemia among tropical horticulturalists
- Prepaid electricity metering in South Africa
- Gender-targeted job ads in China
- Gender segregation of computing occupations around the world
- Improving cancer drug discovery by studying cancer across the tree of life
- Sex-biased parental care in north-western Tanzania
- Improving fisheries management through innovative technology
- Urban food security in Accra, Ghana
- Spatial variability in adolescent childbearing in rural Honduras
- Feminism in contemporary China

International Research Projects cont'd

- Gender relations and gender ideologies in Middle Eastern and North African countries
- Assessing the costs and benefits of cultural practices
- Differences in Tsimane children's growth outcomes and associated determinants
- Varieties of indigeneity in Latin America
- Racial intermarriage in the Americas
- Health and healthcare for migrants and migrant families in the United States

Regional Research Projects

- Spatial variability in retail gasoline markets
- Immigrant generation and sexual risk behaviors in Seattle
- Respiratory infections in a contemporary mortality sample from New Mexico
- Fire and flood vulnerability, and implications for evacuation
- Agricultural productivity and worker health: The hidden costs of extreme heat
- Health, health care, and health research of migrants
- Spatial analytics for enhancing street light coverage of public spaces
- When incentives backfire: Spillover effects in food choice
- Human geo-social interaction patterns and vaccination strategies in an urbanized area

Population Research Center

Margaret Weden, *Acting Director*

RAND Corporation

1776 Main Street
Santa Monica, CA 90407-2138
www.rand.org/well-being.html
Contact: mweden@rand.org
(P): 310.393.0411, ext. 7966
(F): 310.260.8155

Mission Statement

The RAND Population Research Center (PRC) is dedicated to the scientific advancement of research to inform public policy and decision making about frontier issues in population science. Its four key areas of research promote multidisciplinary innovations in theory, primary data collection, statistical and demographic methods and analysis. PRC draws its members from across the social and physical sciences, as well as medicine and public health. The RAND PRC provides a supportive setting for its scholars to pursue policy-driven population research aimed at improving social and economic well-being in the U.S. and around the world.

Affiliates: 40

Key Areas of Research

- **Child and Family Policy**
- **Fertility and Reproductive Health**
- **Health and Human Capital Across the Life Course**
- **Population Health**
- **Populations, Climate Change and Environmental Hazards**

Domestic Research Projects

- Active Duty Women's Health Survey
- Adult Social Networks and Well-being
- American Life Panel Survey
- State Policies and Neonatal Abstinence Syndrome
- Army Spouse Panel
- Individual, Community Factors in Birth Outcomes
- Culture of Health Measures
- Developing Innovative Teen Pregnancy Prevention
- Estimating the Future Availability of Family Care for Alzheimer's Disease in the U.S.
- Federal School Nutrition Policies, Student Food Insecurity and BMI
- Food Choice and Childhood Health
- Health and Outcomes of Divorced Individuals
- Impact of Marijuana Policies on Alcohol Use and Alcohol-Related Mortality
- Social Security Disability Insurance and the Health of Non-disabled Spouses
- Linking Health Outcomes to Community Resilience
- Modeling the Coupled Dynamics of Influenza Transmission
- Microsimulation of Obesity Policies
- Natural Experiment of Neighborhood Revitalization and Cardiometabolic Health
- Neighborhood Change: Impact on Sleep and Obesity-Related Health Disparities
- Park Rx, Physical Activity and Other Health Benefits for Low Income Children
- Population Reproduction of Poverty at Birth from Surveys, Censuses, and Birth Registries
- Surveillance Systems to Monitor Mental and Behavioral Health after an Emergency
- State Policies and Neonatal Abstinence Syndrome
- The Sweet Life: The Long-term Effects of Excess Sugar Consumption in Early Childhood

International Research Projects

- Impact of Conflict on Mental Health and Risk Behaviors of Palestinian Youth
- Impact of Over-the-Counter Availability of Emergency Contraception on Uptake, Pregnancy, and Births
- Improving PrEP Availability and Access for Populations at High Risk for HIV

International Research Projects Con't

- Integrating Counseling to Transform HIV Family Planning Services
- Mopati: A Pilot HIV Treatment Partner Intervention in Botswana
- Pathways and Mediators of Change in Early Childhood Development
- Young Rural African American Families, Economic Hardship, and Fatherhood

Regional Research Projects

- Estimating the Effect of 24/7 Sobriety on Morbidity and Mortality in North Dakota
- Healthy Futures: Improving the Health and Wellbeing of Children in Greater Rochester
- Housing Initiative Evaluation for the CA Inland Empire
- Integrating Geoscience, Data Science, and Social Science in Landslide Risk Management
- Long-term Mobility and Well-being of New Orleans Residents after Hurricane Katrina
- RISE UP Study: Social Networks and Drug Use among Low-income Students in High Performing Schools
- Rural Alaskans Attitude and Behavior Study about the Threat of COVID-19
- Schools, Neighborhoods, & the Transition to Adulthood: A Policy Lab with Wake County Public Schools
- Urban Revitalization and Long-term Effects on Diet, Economic and Health Outcomes

CUPC@colorado.edu
(P): 303.492.5548
(F): 303.492.2151

Mission Statement

CUPC brings together an interdisciplinary community of scholars, across three University of Colorado campuses, dedicated to research and training in population science with broad focus on health, migration and environmental demography. By providing administrative, technical and development support, CUPC facilitates collegial interaction and nourishes collaboration across several departments, institutes, and universities. An important aspect of the Center is a high level of collaboration between faculty and graduate students. Center affiliates explore demographic processes in the US and a variety of international settings while applying their expertise to yield high quality, policy-relevant research and training. Current initiatives focus on large-scale research initiatives, complex data collection efforts, and new methodological and statistical approaches.

- Pritzker School of Medicine
- School of Social Service Administration

Number of Research Faculty:

71 (+10 Research Affiliates)

Key Areas of Research

Signature Theme: Human and Social

Capital in Urban Context

- Sex and reproductive health
- Economics, education, and labor market outcomes
- Health and disease across the lifespan
- Measurement and methods

Domestic Research Projects

- Variable Selection Model for Studying the Predictive Validity of Measures of Classroom Quality
- Enhancing Sleep and Physical Activity in the HRS Family of Studies
- Advancing Spatial Evaluation Methods to Improve Healthcare Efficiency and Quality
- Disparities in Reproductive Health
- Developing Tools to Engage Adolescent Men who have Sex with Men
- Getting on Track Early for School Success: Formative Assessment and Instruction of Mathematics in Preschool Classrooms
- Models of Infectious Disease Agent Study (MIDAS) Research Network
- Determinants of Subsidy Stability and Continuity of Child Care in Illinois and New York

Mission Statement

The Hopkins Population Center (HPC) stimulates and facilitates original research that combines the core strengths in social science, public health, and biostatistics in emerging areas of population dynamics research. The HPC promotes cutting-edge methodology that integrates demography, population health and data science. The HPC has a priority in nurturing early-career Faculty Associates.

Departmental Affiliations

HPC comprises faculty associates from 16 departments in seven schools: Krieger School of Arts and Sciences, Bloomberg School of Public Health, School of Medicine, School of Nursing, Whiting School of Engineering, School of Education, and Carey School of Business

Number of Faculty

Affiliates: 63

Key Areas of Research

- **Poverty and Inequality**
- **Sexual and Reproductive Health**
- **Family, Maternal and Child Health**

Domestic Research Projects

- Housing affordability and child health Integrating data on Low Income Housing Tax Credit with measures of child health from the National Interview Survey (Pollack)
- Virtual Population Obesity Prevention VPOP Labs Computational Multiscale Models for Obesity Solutions (Igusa)
- Breaking the cycle: The intergenerational transmission of parenting and self-regulation following a universal preventive intervention in childhood (Johnson)
- Preterm Birth Maternal and Cord Blood Metabolome and Child Metabolic Risk (Wang)

In the News

- “We can use this pandemic as a galvanising force for change. [I would like to see a universal healthcare act in the U.S.] to prevent a lot of the worst healthcare outcomes that come from inequality but also to minimise the economic, social and health inequality in the first place. The conditions of possibility are there.” The Guardian, December 13, 2020: How the pandemic may change the previous status quo (White)
- “They were pillars of their communities and families, and they are not replaceable. To understand why COVID-19 killed so many young Black men, you need to know the legend of John Henry.” ProPublica, December 22, 2020: How COVID-19 Hollowed Out a Generation of Young Black Men (Thorpe)
- “As the end of 2020 approaches, so, too, does the expiration of a national ban on evictions, prompting proponents to warn that leaving people without such a safety net will only exacerbate the rise in coronavirus infections, particularly among low-income people and communities of color.” U.S. News & World Report, December 16, 2020: A ‘Dangerous Moment’ as End of Eviction Ban Looms (Pollack)
- “Arresting sex workers as a mean of stopping sex trafficking does not create a trusting relationship where people who are trafficked feel safe to come forward. Rather, it further destabilizes their lives and could place them in harm’s way.” The Baltimore Sun, October 29, 2020: Arresting Sex Workers Help No One (Sherman)
- “How does isolation affect mental health? What are some strategies we can use to find community during a lockdown?” Reuters, September 18, 2020: Tips for managing mental health during COVID-19 (Stuart)
- “Coronavirus and the attendant uncertainty has made family planning more fraught than ever.” InsideHook, July 1, 2020 (Gemmell)
- “Exercising more after being diagnosed with breast cancer could lower your risk of dying, a study suggests. Women who bumped up their activity to 150 minutes per week, the recommended amount, halved their risk of death.” The Guardian, January 7, 2020: Breast cancer patients who exercise 150 minutes weekly halve their risk of dying (Crainiceanu)

- Burden of Disease and Deprivation in India across Micro and Macro Public Policy Units

Research to Policy

- Researchers at the Harvard Center for Population and Development Studies, in collaboration with scientists from other research centers and Microsoft AI for Health, launched a COVID-19 live tracking website that monitors the current status of COVID-19 cases and deaths, as well as the reduction of new cases, in U.S. congressional districts. This important data could be key for elected officials and their constituents to monitor and develop testing strategies, vaccine deployment strategies, and other measures to enable their districts to open safely.
- Harvard Bell Fellow Anna Grummon and her colleague published a meta-analysis in *PLOS Medicine* examining the impacts of sugary beverage warning labels on effecting behavioral change. The researchers found that sugary drink warnings not only reduced purchases of sugary drinks, but also impacted other key indicators. These results provide evidence that requiring warnings for sugary drinks could be an effective policy strategy for informing consumers and reducing consumption of sugary drinks.

www.nber.org

Mission Statement

The mission of the NBER Center is to develop, coordinate and advance research by economists on health and aging issues. Center research considers the health and wellbeing of people as they age, how health and wellbeing are affected by the changing environment in which people live, and what interventions might be effective in improving health and wellbeing.

Departmental Affiliations

The NBER is a consortium of economists from research universities around the country. The Center's researchers are drawn largely from the NBER's aging and health care program areas.

Mission Statement

The Office of Population Research (OPR) at Princeton University has fostered research and training in population since it was founded in 1936 as the world's first population research center. Our mission is to provide the resources and environment that will result in the creation and dissemination of fundamental demographic knowledge and the highest quality learning opportunities for doctoral and postdoctoral trainees.

Mission Statement

CPRC's mission is to increase the scientific impact, innovation, and productivity of population researchers at Columbia, increase their competitiveness for peer-reviewed external funding in population dynamics research, help junior population scientists achieve research independence, and maximize the efficiency of funding for population dynamics

Organizational Collaborations

- Brookings Institution
- Massachusetts Health Connector
- NYC Department of Health and Mental Hygiene
- NYC Department of Housing Preservation and Development
- NYC Office of the Mayor
- South Carolina Department of Health and Human Services
- The National Bureau of Economic Research

Number of Faculty

Affiliates: 123

Key Areas of Research

- **Children, youth, and families**
- **Reproductive health and HIV/AIDS**
- **Immigration/Migration**
- **Urbanism**
- **Cross-Cutting Theme: Inequalities and Policies to Address Inequalities**

Domestic Research Projects

- A Neurobehavioral Investigation of The Relationship Between Early Adverse Experiences and Learning Mindsets
- Assessing the Impact of State-Level Policies on Drug Use and HIV Risk for Young Men Who Have Sex with Men
- Assisted Reproductive Technologies and Risk of Autism and Other Developmental Disabilities
- BUDDY: Bringing Understanding to Developmental Differences Across Years

Research to Policy

- Daniel Giovenco's research in collaboration with the NYC Department of Health found that cigarette advertising is associated with smoking for adults with depression. Findings suggest a need for policies beyond ban in sales.
- Melissa Stockwell's research on the use of text messaging for community surveillance for acute respiratory infections has been used by the CDC in their pandemic influenza planning.
- Research conducted by Andrew Rundle's Built Environment and Health Research group contributed to the International WELL Building Institute's "WELL Community Standard".
- Sandra Black's research provides evidence that an investment in the Children's Health Insurance Program can improve public safety outcomes, such as reduced incarceration, in a cost-effective manner.
- Poverty research by Irwin Garfinkel, Jane Waldfogel, Christopher Wimer, and others has been used to evaluate or affect policy changes at the local and national level. In collaboration with the NYC Department of Health, they utilized the Poverty Tracker study to understand the effects of NYC's paid sick leave law. The team is evaluating the immediate impacts of COVID-19 on poverty, hardship, and well-being among New Yorkers. Results to date indicate the challenges New Yorkers are facing, in particular worries about children's progress in school and greatly increased use of food pantries. Notably, Wimer and colleagues produced poverty estimates that analyze the monthly impact of the CARES Act on national poverty.

CORNELL POPULATION CENTER

Matt Hall, *Director* • Parfait M. Eloundou-Enyegue, *Associate Director*

Cornell University

MVR Hall
Ithaca, NY 14853
www.cpc.cornell.edu
population@cornell.edu

(P): 607.255.1960
(F): 607.255.4071

Mission Statement

CPC coordinates and promotes national and international population research, encourages cross-disciplinary innovation, supports grant-getting, provides cutting-edge demographic training to students and postdocs, and disseminates research findings to policy practitioners and the public.

Grant Development Program

CPC's Grant Development Program supports grant submissions to population-related external funding agencies through mentorship, training, seed funding, and administration.

Seminar Series and Events

CPC hosts a seminar series that expands networks of population scientists and brings innovations in population research to campus. Other regular events include methods mini-courses, conferences, and an annual workshop for population scholars from Upstate New York

Undergraduate and Graduate Demography Minors

CPC's multidisciplinary training program provides students with opportunities to develop fundamental demographic tools and insights from a range of perspectives. In addition to coursework, the training core offers professional development, research support, and guided mentorship.

Frank H. T. Rhodes Fellowship Program

CPC runs a postdoctoral training program with support from the Atlantic Philanthropies' endowment in honor of former Cornell president, Frank H.T. Rhodes

Key Areas of Research

- Families and Children
- Health Behaviors and Disparities
- Poverty and Inequality
- Immigration and Diversity
- Population and Policy

Domestic Research Projects

- COVID-19 vulnerability and implications
- Changing family patterns, fatherhood, and child well-being
- Health inequalities and healthcare reform
- Race/ethnicity and intergenerational economic mobility
- Gender inequality at home and at work
- Economic and social well-being of immigrants
- Aging and state policies affecting care-giving strategies
- Impact of obesity on medical costs and labor market outcomes
- Incarceration and its effects on children and families
- Urban older adults and health inequalities

International Research Projects

- International food security and agri-food systems
- Sub-Saharan African social mobility
- Family and gender dynamics in developing countries
- Family policy in Europe
- Immigration in the technology economy
- Global asylum and deportation policy
- Impacts of the coronavirus pandemic in developing countries

Regional Research Projects

- COVID-19 vulnerability, data collection, health and economic effects
- Unmet caregiving need across state policy contexts
- Criminal justice, immigration enforcement, and child welfare systems
- Vulnerable families and intergenerational poverty
- Health behaviors, implications for inequality, and interventions
- Opioid abuse and impact on families
- New York tobacco tax revenues and regulations
- Medicaid and the U.S. health care safety net

Research to Policy

- S Alvarado researched the complexities of childhood neighborhood disadvantage and adult incarceration for whites, blacks and Latinos.
- F Blau explored the coronavirus vaccine distribution timing to elderly individuals versus essential workers.
- E York Cornwell examined how COVID-19 affects the daily mobility patterns and health outcomes of urban older adults.
- P Enns studied increased social bias during the COVID-19 crisis.
- S Gleeson advocated for pathways to citizenship for all undocumented immigrants, not just essential workers.
- K Musick analyzed the impact of COVID-19 on children’s economic vulnerability, telecommuting, work-family conflict and gender equality.
- A Ong studied loneliness, social isolation, and prosociality during COVID-19.
- A Reyes advanced research on how different state policies affect family caregiving strategies for adults with cognitive decline.
- Q Wang researched social distancing during COVID-19 and its relation to psychological well-being.
- K Weeden and B Cornwell studied the network of college classes and implications for epidemic spread on university campuses.
- N Ziebarth examined paid sick leave and its relationship to COVID-19 cases.

Guttmacher Center for Population Research Innovation and Dissemination

Kathryn Kost, *Director* • Ann Moore, *Associate Director*

Guttmacher Institute

125 Maiden Lane, 7th Floor
New York, NY 10038
guttmacher.org/population-center
popcenter@guttmacher.org
(P): 212.248.1111
(F): 212.248.1951

Mission Statement

The Guttmacher Institute is a leading research and policy organization committed to advancing sexual and reproductive health and rights (SRHR) in the United States and globally in ways that help create more just and equitable societies. We do this through positioning SRHR as essential to the achievement of health and development goals; examining the social determinants of health that underlie SRHR inequities to continue to make disparities seen; and elevating the centrality of legitimate science and evidence in the public discourse.

The Guttmacher Center for Population Research Innovation and Dissemination enhances the quality of research carried out at the Institute by providing opportunities for interdisciplinary idea generation, building the skills of a new generation of scientists, and encouraging collaboration and partnerships with external colleagues. It also ensures that the Institute's work and data are made available to a wide range of audiences.

Number of Affiliates

- 23 doctoral-level
- 37 total

Key Areas of Research

- **Fertility preferences, pregnancy intentions and pregnancy outcomes**
- **Sexual behavior, contraceptive use and reproductive health services**
- **Large scale data collection and surveillance of key reproductive health indicators (census of providers of reproductive health services, abortion providers, nationally representative surveys)**
- **Adolescent sexual and reproductive health**
- **Policy impacts on reproductive health outcomes**
- **Measurement of fertility-related behavior and pregnancy outcomes**

Domestic Research Projects

- Monitoring the incidence of unintended pregnancy at the national and state levels
- Calculating new estimates of contraceptive failure for a variety of methods and population groups, investigating contraceptive failure with qualitative data
- Monitoring trends in the use of contraception, including long-acting methods and use of more than one method
- Measuring key reproductive health indicators among immigrant women
- Calculating trends in the provision of mifepristone in the U.S.
- Conducting a national census of the nation's network of publicly funded family planning service providers
- Documenting the need for family planning and other reproductive health services in the United States, the adequacy of services to meet those needs, and the benefits from such services
- Studying publicly funded family planning clinics and clients to document the impact of policy changes
- Developing new survey questions for tracking contraceptive use at the state level
- Tracking the impact of Covid-19 on fertility attitudes and behaviors
- Conducting a census of all known abortion providers in the United States to assess the number of abortions and abortion rates at both the national level
- Developing and testing new survey questions for measuring the completeness of abortion reporting in a nationally representative survey
- Conducting a nationally representative survey of abortion patients in the United States
- Institutionalizing reproducibility and transparency processes across quantitative and qualitative projects

International Research Projects

- Estimating and analyzing the incidence and trends of unintended pregnancy and abortion worldwide
- Quantifying the impact on sexual and reproductive health services of the Global Gag Rule
- Documenting cost of unsafe abortion in countries with highly restrictive abortion laws and leveraging that evidence for policy and program impact

International Research Projects Cont'd

- Exploring women's use of misoprostol for induced abortion when they acquire it through the informal sector
- Advancing methods for measuring abortion and the health system capacity for providing care
- Using the platform of the Guttmacher-Lancet Commission to help develop a broader and evidence-based vision for SRHR worldwide over the next 15 years
- Identifying sexual and reproductive health research needs in fragile states
- Estimating the incidence of post-abortion complications and trends in contraceptive use and abortion in India
- Estimating the need for and coverage, costs and impact of providing comprehensive contraception, pregnancy-related and newborn health care in low- and middle-income countries, including for adolescents
- Covid-19 pandemic: estimates of and data on impact on sexual and reproductive health
- Scientific training on sexual and reproductive health methodologies and reproducible science

- "Rep. Rosa DeLauro, other Democrats seek to repeal the Hyde Amendment, allowing federal funds to pay for abortions", Daniela Altimari, The Hartford Courant, December 8, 2020

Research to Policy

- Monitored reproductive health policy developments nationally and in each state
- Using several channels, including the Guttmacher Institute's policy journal, the Guttmacher Policy Review, brought data and research to public policy debates on sexual and reproductive health issues
- Used data and analysis by Guttmacher researchers to assess the impact of the evolving COVID-19 pandemic on sexual and reproductive health and rights at multiple levels

Regional Research Projects

- National and state level pregnancy statistics, including unintended pregnancy rates, adolescent pregnancy and childbearing trends
- Abortion incidence and services in states and metropolitan areas
- State and county-level tracking of contraceptive needs and services
- Investigating the impact of federal and state policy changes on the provision of family planning services and on individuals' access to contraception within and across U.S. states
- Documenting current contraceptive use patterns across states

POPULATION COUNCIL

Ideas. Evidence. Impact.

Julia Bunting, OBE, *President*

Population Council

One Dag Hammarskjöld Plaza
New York, NY 10017
Tel: +1 212 339 0500
Fax: +1 212 755 6052
pubinfo@popcouncil.org
www.popcouncil.org

Mission Statement

The Population Council, an international, nonprofit, nongovernmental organization, seeks to improve the well-being and reproductive health of current and future generations around the world and to help achieve a humane, equitable, and sustainable balance between people and resources. This mission is accomplished through three program areas: Reproductive Health; HIV and AIDS; and Poverty, Gender and Youth.

Number of Faculty

Affiliates: 80 PhD-level staff

Key Areas of Research

- **The well-being of vulnerable populations, especially girls and women (girls' education, child marriage, FGM)**
- **Sexual and reproductive health and rights (contraception, abortion, STIs, HIV, maternal mortality)**
- **Demographic trends and their consequences (including the environment and climate change)**
- **Development of sexual and reproductive health technologies**

International Research Projects

- **Evidence to End FGM/C:** generates quality evidence to accelerate abandonment of female genital mutilation/cutting (FGM/C) within one generation
- **Breakthrough Research:** data and evidence to integrate social and behavior change approaches into health-related government and NGO programming
- **Project SOAR:** generates critical evidence to improve HIV prevention, care, and treatment policies and programs around the world
- **The Evidence Project:** implementation science to strengthen, scale up, and sustain family planning services to reduce unintended pregnancies worldwide
- **Powering Progress in Girls' Education:** mapping the ecosystem of policymakers, practitioners, researchers and advocates working in global girls' education, synthesizing what works, and identifying opportunities to scale up successful interventions and investments
- **Frontline Health:** supporting the strengthening of frontline health worker programs in seven countries to improve health services for underserved populations

Research to Policy

- A Project SOAR (Supporting Operational AIDS Research) study evaluated community-based delivery of antiretroviral treatment to female sex workers (FSWs), in Tanzania, demonstrating the value of this approach to improve HIV care. Informed by these findings, the Government of Tanzania changed national guidance to allow for community-based HIV treatment to better meet the needs of marginalized populations, including FSWs.
- For over 15 years, Abriendo Oportunidades has partnered with national and local authorities to improve educational prospects for Indigenous girls. In Guatemala, evidence and ongoing technical assistance have helped to strengthen and expand the Ministry of Education’s programs supporting Indigenous adolescents, including development of curricula for the Ministry’s Modalidades Flexibles alternative education program and a joint teacher training module for all continuing education teachers in the country.
- The Evidence to End FGM/C program has filled critical data gaps, bolstered local capacity, and strengthened stakeholder relationships over the past five years. Through a collaborative, African-led approach, the program informed high-level national policy dialogue in several countries, including Kenya and Nigeria, and influenced global strategic planning efforts of the United Nations’ Joint Programme on FGM/C.

Center for Aging and Policy Studies

Syracuse University
314 Lyman Hall
Syracuse, NY 13244
<https://asi.syr.edu/caps/>
(P): 315-443-2703

Mission Statement

The Center for Aging and Policy Studies is a collaboration between Syracuse University, Cornell University, and University at Albany. It aims to improve the health, well-being, and independence of older adults by conducting innovative and rigorous research, providing state-of-the-art training to scientists, and disseminating research findings to scientists, decision makers, and the public.

Key Areas of Research

- **Population Health and Well-Being**
- **Family and Intergenerational Supports**
- **Cross-cutting themes:**
 - **Policy**
 - **Place**
 - **Specific Populations**

Domestic Research Projects

Population Health and Well-Being

- Trends and disparities in health
- Mortality among adults with developmental disability
- Personality traits and age trajectories of health
- Health and economic well-being of older LGBT adults
- Long term health effects of military service
- U.S. state policy polarization and life expectancy
- Race-ethnic disparities in cognitive function
- Rural-urban disparities in health care access and outcomes
- Vascular aging in African American adults
- Geographic disparities in substance misuse and mortality
- Hearing loss, technology, and cognitive function
- Life course influences on cardiovascular and metabolic health
- Climatic conditions and mortality
- Pay-for-Performance and long-term care
- Food insecurity, food policies, and disability

Family and Intergenerational Supports

- Grandparenting, grandparent care work, and family well-being
- Cognitive function and housing transitions
- Older adults' activity spaces, social networks, and health
- Union formation among elderly couples
- Reciprocity in parent-child relations over the adult life course
- Parental health decline and adult children migration
- Social disconnectedness and isolation among older adults
- Kin support and mortality among older adults
- Technology and intergenerational communications
- Intergenerational time and money transfers
- Social Security, pensions, and retirement well-being
- Paid family leave and nursing home use
- Medicaid expansion and older mothers' birth outcomes

International Research Projects

- Cross-national differences in provision of care and support to older parents
- Cross-national differences in experiences of LGBT breast cancer survivors
- Social determinants of health among older adults in Sweden
- Family relationships and living arrangements of older adults in China
- Stress and health problems among older workers in the Netherlands
- U.S.-Finland comparison of women's mortality

Regional Research Projects

- Cognitive screening tools for the Onondaga County Office for Aging
- Geographic variation in veteran mortality
- U.S. state policy influences on coding of causes of death
- Aging and well-being in rural America
- Geographic variation in drug, alcohol, and suicide mortality
- Racial segregation and health in Philadelphia

Research to Policy

- Research by Brooks Gump on the effects of low-level environmental toxicants helped justify the CDC's decision to lower the "threshold of concern" for blood lead levels in children.
- Research by Scott Landes used by Senators Murray, Hassan, and Warren to require the Center for Medicare and Medicaid services to collect and report state-level data on COVID-19 outcomes in group homes for people with intellectual and developmental disabilities.
- Shannon Monnat participated in the White House Office of National Drug Control Policy Opioid Roundtable.
- Adriana Reyes is advancing research on how different state policies affect family caregiving strategies for adults with cognitive decline.
- CAPS created a research and policy brief series in collaboration with the SU Lerner Center for Public Health Promotion

Mission Statement

The Duke University Population Research Institute (DUPRI) is an interdisciplinary research organization bringing together researchers from biological, statistical, behavioral, social and policy sciences at Duke. The Institute seeks to advance knowledge in the areas of demography and population science, to expand the current boundaries of demographic investigation through highly innovative interdisciplinary research, and to foster the development of the next generation of researchers.

Departmental Affiliations

- Duke Social Science Research Institute

Key Areas of Research

- **Foundations of Lifelong Health**
- **Interconnected Social Systems and Population Health**
- **The Durham Population Lab**
- **Biodemography of Human & Nonhuman Primates across the Lifespan**
- **Life Course Processes of Aging**
- **Intergenerational Studies, including the Transmission of Health**

Domestic Research Projects

- Add Health Parent Study
- National Data Archive on Child Abuse and Neglect
- Generational Structure of U.S. Families & Their Intergenerational Transfers
- Social Determinants of Health and Survival in Humans and Other Animals
- Models and Tools for Dynamic Health-Relevant Diffusion over Complex Networks
- Work Conditions and the Health of Working Parents and their Children
- Disparities in Vulnerability to Complications from COVID-19
- The Triple C Project (Children, COVID-19, and its Consequences)

International Research Projects

- Aging in the Natural World: Similarity in Mortality Patterns across Primates
- Amboseli Baboon Research Project in Kenya
- The Chinese Longitudinal Healthy Longevity Survey (CLHLS)
- The Dunedin Multidisciplinary Health and Development Study in New Zealand
- The Environmental Risk Longitudinal Twin Study (E-RISK) in England and Wales
- Parenting Across Culture Study
- Population-environment Dynamics in the Northern Peruvian Amazon
- Prevalence of COVID-19 in Karnataka, India
- Social Networks and Health in Uttar Pradesh, India
- Stress, Aging and Health in Russia (SAHR)

Regional Research Projects

- Chinese Immigrants in the Raleigh Durham Area (ChIRDU)
- Duke RDS2 (Respondent-Driven Sampling, Respiratory Disease Surveillance) the SNOWBALL Sampling Study
- Evictions and Child Outcomes: Evidence from North Carolina
- Great Smoky Mountain Study of the Risk of Mental and Physical Disorders
- Using Duke University Health System Electronic Health Records to Study Population Health

Mission Statement

At the Carolina Population Center (CPC) we believe that understanding how and why populations change over time is key to advancing the well-being of all people. Our faculty, staff, and students conduct research on population, health, aging, and the environment, and share data and findings that push the field forward and train the next generation of population scholars.

Mission Statement

IPR nurtures population and health research at Ohio State University in four broad areas: Sexual and Reproductive Health; Family Demography; Mortality and Health over the Life Course; Migration. IPR furthers research in these areas by:

- Technical assistance and didactic workshops that advance the research skills of IPR affiliates: contemporary analytical approaches (including spatial analysis, blending diverse types of data, and data science); conducting transparent and reproducible research;
- Serving as a bridge between the behavioral and biomedical departments at OSU;
- Cultivating faculty strength in population and health in Anthropology, Economics, Geography, Psychology, Sociology, Public Policy, Human Sciences, Statistics, Public Health, Nursing, and Agricultural, Environmental, and Development Economics;
- Fostering new large-scale collaborative multidisciplinary research projects that can compete successfully for external funding;
- Involving and mentoring junior faculty and nurturing their interests and skills;
- Providing demographic training for students across diverse but allied disciplines.

Number of Faculty

Affiliates: 55

Key Areas of Research

- **Sexual and Reproductive Health**
- **Family Demography**
- **Mortality and Health over the Life Course**
- **Migration**

Domestic Research Projects

- Consequences of marriage and cohabitation on health and well-being
- Neighborhood and social context effects on adult health and adolescent risk behavior
- Geographic analysis of health
- Immigration to the U.S. and health outcomes
- Consequences of student debt for young adult transitions
- Environmental exposures and health
- Contraception and the prevention of STIs and unintended pregnancy
- Bayesian methods for socio-spatial point patterns and networks
- Family contexts, physiological stress and health in children
- Effects of violence exposure on neural development, risk behavior, and health
- Activity space and social networks in later life: Dynamics of changing health
- Mechanisms underlying sexual minority health disparities in the United States
- Effects of state-level policy implementation on opiate abuse and mortality
- Postpartum family planning
- Establishment of the national couples health and time use study
- The all or nothing marriage? Marital functioning and health among individuals in same and different-gender marriages
- Exploring the intersection of food insecurity, food sourcing and family demography
- The role of motherhood biographies in midlife women's health
- Reproductive health and contraception in Ohio
- Family networks and maternal health
- Longitudinal trends and risk factors for adolescent reproductive health
- Digital dating abuse among sexual minority youth
- Intergenerational transmission of adverse childhood experiences: pathways to resilience
- Constructing and testing the predictive power of life-course health histories
- Precarious work & mental well-being in new spaces: A transformative mixed methods study among Bhutanese refugees in Central Ohio
- Intergenerational transmission of adverse childhood experiences: Identifying pathways to resilience
- An innovative clinical prediction model for postpartum hemorrhage in low-and-middle-income countries
- The effect of natural disasters on drug overdoses; Development and testing of digital dating abuse measure for sexual minority youth; Determining longitudinal trends and risk factors for adolescent reproductive health
- Family migration and early life outcomes

International Research Projects

- Fertility decline in Africa and the Arab region
- Promoting condom use in established unions
- New methods for ascertaining cause of death in Africa
- Demand for modern contraception in sub-Saharan Africa: New methods, new evidence
- Food security in Nicaragua
- Social contexts, stress and non-communicable disease risk factors across the life course
- Unintended fertility: new methods for global estimates

Regional Research Projects

- Adolescent health & development in context: Franklin County
- Demographic impact of COVID19 in Ohio
- Spatial analysis of infant mortality in Ohio
- Ohio Policy Evaluation Network (OPEN)

Mission Statement

The Population Research Institute is a multidisciplinary center that delivers resources that support innovative population research. PRI promotes a dynamic, talented, and collaborative research community with over 100 faculty researchers. Established over four decades ago at the Pennsylvania State University (PSU) and funded by the National Institutes of Health (NIH) since 1992 with generous supplemental support from PSU, this vibrant, multidisciplinary center provides strategic resources to support innovative, high impact population research.

 (F): 215.898.2124

Mission Statement

The PSC's mission is to remain a national and world leader in research and training. Our goal is to link core research in the social and behavioral sciences to issues on the growth and structure of human populations and the role of socioeconomic stratification and human/social diversity in population health. The PSC is characterized by continuity, innovative and high-quality population-related research and maintains a flexible research infrastructure that enhances interaction, builds collaborations and encourages understanding of evolving issues. The training program is a leader in the preparation and mentoring of Ph.D.'s and Post-Doctoral fellows and reflects a vision of the population sciences and health in which a strong background logic of demographic process is the gateway to an array of topics of public/scientific interest.

Departmental Affiliations

Anthropology, Criminology, Economics, Public Health/Policy, Psychology, Sociology, Pediatrics, Internal Medicine

School Affiliations: Education, Law, Medicine, Nursing, Social Policy, Wharton

Affiliated Centers: Boettner Center for Pensions and Retirement Research, Center for Health Outcomes & Policy Research, Leonard Davis Institute, Perry World House, Population Aging Research Center

Number of Faculty

Affiliates: 59

Key Areas of Research

- **New Dynamics of Population Diversity**
- **Demography**
- **Human Resources and Endowments**
- **International Population Research**
- **Population and the Environment**
- **Big Data and Population Science**

Domestic Research Projects

- Migration and US Fertility Patterns
- Social Determinants of Population Health Inequality
- Labor Markets and Productivity
- Stagnation in US Mortality Decline
- Effectiveness of Behavioral Economics and Environmental/Structural Strategies/Interventions
- Built Environment Effects Well-Being
- STD transmission and intervention

International Research Projects

- **South America:** Healthcare Workforce and Quality Outcomes; Impact of Early Life Undernutrition
- **Asia:** Prenatal Ambient Air Pollution (China); Population-Level Educational Innovations and Reforms Reducing Social Inequality and Increase Well-Being of Korean Youth; Poverty, Productivity and Cognitive Function; Sanitation and Social Norms (India)
- **Africa:** Malawi Longitudinal Study of Families and Health

Regional Research Projects

- Smarter Big Data for a Healthy Pennsylvania
- Spatial Analysis of Census Tracts in Philadelphia to Assess Supply of Primary Care Providers to Determine Population Characteristics and Disparities Associated with Variations in Geographic Access
- Urban Ecological Intervention: Stabilize Abandoned Properties to Reduce Stress, Sexually Transmitted Diseases, Violence and Premature Mortality
- Elimination of Nonmedical Vaccine Exemptions
- Estimate the Population Prevalence of NJ Youth with a Developmental Disability Using Sample Survey Data

Research to Policy

- Advancing the Science of Data Integration to Support Social Policy Reform
- Health Risks, Technology, Insurance and Public Policy
- Homelessness Research: Policy and Practice
- ROI in Housing and Early Intervention

In the News

- Alison M. Buttenheim was interviewed on BBC's The Real Story podcast about how COVID-19 vaccines provide an opportunity for scientists to gain insight into vaccine hesitancy. Also see *NPR's The Pulse* (5/1/20), *WHYY* (3/6/20), *NPR News* article (3/3/20), and *Connecticut Public Radio* (4/13/20).
- Angela Duckworth participated in the CNN Town Hall (5/22/20) about the lasting effects the COVID-19 pandemic may have on children, see *USA Today* (6/5), *Yahoo News* (11/16/20) and the *New York Times* (5/27/20).
- Atheendar Venkataramani discussed how to increase the length of life for the poorest among us in the *Los Angeles Times* (1/24/20), *NBC News* (4/15/20), and *Newsweek* (6/3/20).
- Courtney Boen and co-authors published in *The Hill* (4/23/20) about the racial, ethnic and class disparities among COVID-19 and was quoted in *The Atlantic* (5/20/20) about non-medical solutions and in the *Washington Post* (9/9/20).
- Damon Centola, in *Forbes* (4/3/20), shows that the tipping point for the spread of social norms can be as low as just 25% adoption to reshape society.
- Daniel Aldana Cohen and the Socio-Spatial Climate Collaborative won a grant from Penn's Kleinman Center for Energy Policy, for the project "Wartime Speed During Peacetime? How New York State Built an Unprecedented Coalition for Breakneck Renewables Deployment." (10/12/20)
- Dennis Culhane was quoted in the *Seattle Times* (5/3/20) about housing solutions in the midst of a pandemic.
- Dorothy Roberts appeared on *MSNBC* (3/28/20) to discuss how to address economic inequality during the coronavirus pandemic.
- Hanming Fang investigated the importance of social distancing measures, and the consequences of not doing so in *The Philadelphia Inquirer* (3/24/20).
- Irma T. Elo was featured in an *NBC* (1/2/20) investigative report about the massive effort to involve thousands of temporary workers and experts in the 2020 U.S. Census.
- John M. MacDonald was quoted in *Newsweek* about stop and frisk and police presence in New York City (2/11/20) and about COVID in *Mother Jones* (4/6/20).
- Michel Guillot co-authored a study published in *Nature Medicine* that explored the death rates in industrialized countries as a result of the COVID-19 pandemic. See *Yahoo News*, *Reuters*, *New Scientist*, *Evening Standard*, *The Sun*, *Herald Scotland*, *The Guardian*, *Mirror*, *iNews*, *Mail Online*, *Belfast Telegraph*, *The Conversation*, and *Politico*.
- Samuel H. Preston and co-authors released a *PLOS One* paper that suggests that U.S. Drug Deaths Might Be Twice as High as Thought which has been cited on (1/15/20) in *U.S. News & World Reports*, *VICE*, a Penn News Press Release, *Health Medicine Network* (1/16/20).
- Wendy Roth was featured in a *Slate* (7/16/20) discussing how DNA tests change our understanding of genetics and identity.

Mission Statement

The Population Studies and Training Center promotes and supports innovative research on the causes and consequences of population size, composition, distribution, and wellbeing in the U.S. and globally. The Center carries out this mission by providing state-of-the-art facilities and research support to associates; maintaining a forum for intra- and interdisciplinary exchange on population science; supporting a high-quality graduate and postdoctoral training program; mentoring a diverse and inclusive community of population scholars at Brown; engineering and seeding promising new areas of population research; and developing cross-unit collaborations on campus and with partners in Rhode Island (RI) and around the world.

Mission Statement

The mission of the Population Research Center (PRC) is to provide the resources and culture that are necessary to facilitate the highest level of population-related research through the submission of federal and foundation grants, the training of graduate students and postdoctoral scholars, the production and publication of population-related knowledge, and the dissemination of this work through scholarly meetings, presentations, workshops, teaching, media outlets, and the web. The PRC is an NICHD-funded center.

San Antonio, Texas 78207-4415
idser.utsa.edu

Mission Statement

IDSER stimulates and supports transdisciplinary research that extends knowledge on five key areas and informs both policies and practices at the local, state, and national levels. Several of our affiliates teach and mentor MS and PhD students from UTSA's Department of Demography. Housed within IDSER is the Texas Demographic Center, a state entity, which distributes demographic, economic, and related data and information to private and public sector clients in Texas and other parts of the nation. Faculty associated with IDSER are leaders in population science through a variety of positions, including the State Demographer of Texas, the President of the Southern Demographic Association, and the Editors of *Population Research and Policy Review*.

sojung.lim@usu.edu

(P): 435-797-8458 (F): 435-797-1240

Mission Statement

Since its inception in 1968, The Yun Kim Population Research Laboratory (PRL) has served as a center for demographic research and training at Utah State University. Today, the primary mission of the PRL is to stimulate and support quality scientific research on a range of population issues affecting our state, nation and world. Research productivity among our faculty facilitates another key mission of the PRL – to train and mentor the next generation of applied demographers and population scholars through the M.S. and Ph.D. programs in Sociology. Through seminars and research support, the PRL serves to create a vibrant community of population scholars at Utah State University.

Departmental Affiliations

Key Areas of Research

- U.S. and international migration
- Population health and quality of life
- Mortality determinants and longevity forecasts
- Social inequality and health disparities
- Social determinants of obesity
- Family challenges facing the U.S. and Southeast Asia
- The demographic consequences of labor market disruptions
- Maternal and child health
- Neighborhood effects on population health
- The demography of aging
- The demography of disability
- The demography of LGBTQ+ populations

Domestic Research Projects

- Migration and spatial patterns of disability
- The impact of obesity on mortality among U.S. adults
- Associations between job quality and divorce risks
- Aging, ethnicity and land use change in rural communities
- Gendered immigration patterns in new U.S. destinations
- Mother's nonstandard employment and children's health
- Sleep deprivation and dietary choices among U.S. adolescents
- The impact of "bad jobs" on marriage
- Ethnic variation in associations between short sleep duration and obesity among U.S. adolescents
- Food insecurity, functional limitation and mental health among U.S. adults
- Racial health disparities among Mexican Americans and other Latinx subgroups
- Physical and mental health outcomes of LGBTQ+ individuals
- Black immigrant's health outcomes by country of origin
- Goal striving stress and mental health among people with disabilities
- Disability stigma and health outcomes among older couples
- Multidimensional disparity indices using the County Health Rankings & Roadmaps

International Research Projects cont'd

- Gender differences in the association between marriage and health in South Korea
- Health consequences of nonstandard employment in East Asia
- Nonstandard employment and a shift from breadwinner families to dual-earner families in Japan
- Family status and children's well-being in South Korea
- Age, period and cohort effects on suicide mortality in Japan and South Korea
- Bride kidnapping and labor migration in Kyrgyzstan
- Educational differences in early childbearing: a cross-national comparative study
- Demographic and social determinants of natural decrease in Mexico and Brazil
- Critical understanding of rural aging nationally and internationally

Regional Research Projects

- Social, economic and environmental causes and consequences of demographic change in rural America
- Ethnic disparities in influenza vaccination rates
- Early family building behaviors and subsequent well-being
- The impact of educational attainment on type-2 diabetes
- Determinants of overweight and obesity among adolescents
- Transgenerational impacts of maternal characteristics on child growth trajectories
- Health and wellness needs and challenges with the Extension system in Utah
- Food insecurity among people with disabilities in the Intermountain West
- Predictors and mechanisms of gender inequality in higher education in Utah

The Center for Studies in Demography and Ecology

Sara Curran, *Director*

University of Washington
206 Raitt Hall – Box 353412
Seattle, WA 98195
csde.washington.edu
csde@uw.edu
(P): 206.616.7743

Mission Statement

The Center for Studies in Demography and Ecology (CSDE) supports the advancement of population science through research and training. As a federally funded research center with over 70 years of experience, the CSDE scientists develop new demographic measures and methods, advance knowledge about population dynamics, generate new data and evidence to support population science, and train the next generation of demographers.

Center for Public Information on Population Research

Linda A. Jacobsen, *Director* • Mark Mather, *Associate Director*

Population Reference Bureau

1875 Connecticut Avenue, NW
Suite 520
Washington, DC 20009
www.prb.org/cpipr
ljacobsen@prb.org
(P): 202.483.1100
(F): 202.328.3937

Mission Statement

The Center for Public Information on Population Research (CPIPR) at the Population Reference Bureau (PRB) serves as the Coordinating Center for the National Institute of Child Health and Human Development (NICHD) Population Dynamics Centers Research Infrastructure Program to improve the translation and dissemination of major findings from population dynamics research, and to improve communication and cooperation across the Centers.

Key Activities

As a Coordinating Center, our activities include:

- Facilitating coordination and cooperation across the NICHD-funded Population Dynamics Research Centers to enhance the productivity and scientific impact of the Centers and of population dynamics research overall.
- Translating and disseminating major peer-reviewed findings, methods, and perspectives from population dynamics research to other scientists, and to nontechnical audiences including policymakers, program directors, practitioners, educators, journalists, and students.
- Developing and maintaining a Population Dynamics Research Centers website that includes nontechnical summaries of recent research from the Population Dynamics Centers.
- Promoting Population Dynamics Centers research through Twitter, Facebook, and other social media platforms.
- Organizing workshops at professional meetings and providing training materials that empower Population Dynamics Centers researchers to effectively communicate their own research results to policy, media, and nontechnical audiences.
- Collaborating with Population Dynamics Research Centers and other organizations to organize and host symposia, Congressional Briefings, or other events to raise the visibility of population dynamics research and link major findings to important policies and programs.

Mission Statement

The Center for Demography and Ecology (CDE) is a multi-disciplinary cooperative for social scientific demographic research and graduate training at the University of Wisconsin–Madison. CDE affiliates produce demographic research and data in the center's five research areas: fertility, families, and households; health and the life course; the demography of inequality; biodemography; and spatial and environmental demography.

Center for Demography of Health and Aging

Jason Fletcher, *Director*

University of Wisconsin–Madison

4412 Sewell Social Sciences
1180 Observatory Drive
Madison, WI 53706
cdha.wisc.edu
cdha@ssc.wisc.edu
(P): 608.262.9836

Mission Statement

The Center for Demography of Health and Aging (CDHA) at the University of Wisconsin–Madison aims to increase the understanding of behavioral processes related to health and aging. CDHA's interdisciplinary research program creates links between social demography, biomedical, and epidemiological research on health and aging. Research at the center focuses on five major themes: aging and the life course; biodemography; determinants of disparities of aging trajectories; health economics and health services research; and impacts of place on aging processes.
