Resolution: Urge Federal Support for Population Sciences

Whereas the population sciences have made significant contributions towards improving the public's health and wellbeing;

Whereas the population sciences have developed large-scale longitudinal surveys covering the lifespan as well as novel data sharing and archiving innovations;

Whereas the population sciences have prioritized training the next generation of scientists to sustain and strengthen the nation's scientific enterprise;

Whereas the federal scientific research and statistical agencies, including the National Institutes of Health, National Science Foundation, and U.S. Census Bureau, have been essential sources of direct and indirect support for the field;

We urge Congress and the Administration to:

Support robust funding for the National Institutes of Health, National Science Foundation, U.S. Census Bureau, and all federal statistical agencies.

Restore funding for rescinded federal research grants and contracts and respect agencies' rigorous vetting and peer-review processes.

Protect the integrity of federal data by restoring missing data and data products and taking steps to prevent future removal of taxpayer funded data, data products, documentation, and websites.

Reconstitute terminated federal agency advisory committees.

Reestablish the public's ability to comment on proposed federal policies, rules, agency reorganization proposals, and regulations.

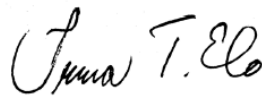

Strengthen federal scientific and statistical agencies' workforces and restore agency staffing levels.

Reinstate federal agencies that were terminated without appropriate congressional input and oversight.
