

## Risk and Insurance Management Society

### MEETING NOTICE

Thursday, February 15<sup>th</sup>, 2018, 11:30 am - 1:00 pm  
Plaza Club 20<sup>th</sup> Floor, 900 Fort St. Mall

## “Swipe Right on Insurance: Risks and Coverage Implications for Mobile Apps and Social Media Platforms”

Dennis J. Nolan, a shareholder in Anderson Kill's New York office, concentrates his practice in commercial litigation with an emphasis on insurance recovery. He also has extensive experience representing debtors, creditors' committees and unsecured creditors in complex chapter 11 reorganizations and co-chairs the firm's bankruptcy group.

Mr. Nolan's insurance recovery work includes arbitrations in London and litigation of coverage disputes involving Directors and Officers, Errors and Omissions, Employment Practices Liability, Marine Cargo, and long-tail asbestos claims, among others. His clients in insurance recovery cases include companies in the financial services, technology, manufacturing, fitness, and commodity trading industries.

Mr. Nolan has represented clients including a major financial services institution in an Errors and Omissions and Directors' & Officers' insurance dispute in connection with a bankrupt subsidiary; a leading technology company in a London arbitration of an insurance coverage dispute hinging on policy periods; and "feeder fund" defendants in the Madoff bankruptcy.

He has also handled diverse matters in commercial litigation, including employment and partnership disputes, copyright infringement, fraud and breach of fiduciary duty claims against officers and directors, and antitrust. In the wake of Superstorm Sandy, Mr. Nolan provided pro bono counsel to homeowners who suffered property damage in the storm.

Mr. Nolan is co-chair of Anderson Kill's Marine Cargo Industry Group and a member of the firm's Cyber Insurance Recovery Group.

Dennis will address: (1) risks for businesses that conduct financial transactions and/or interact with customers via these platforms; (2) potential coverage under traditional commercial and cyber policies; (3) what can be learned from past coverage disputes over web-based businesses; and (4) whether policyholders need to consider new insurance options tailored to liabilities arising from their use of mobile apps and social media.
