

As the Manager of Customer Security & Guidance at Atlantic, Tomorrow's Office, Harry brings over 35 years of experience in the IT services and security industry, with 30 years of owning a successful

Managed IT Services and security company prior to merging with Atlantic, Tomorrow's Office. In his current role, Harry provides organizations with strategic insight and guidance for emerging technologies and IT security, assisting with developing, aligning, and maintaining a security vision for their systems, data, and workforce to drive continued growth and success.

Throughout his career, Harry has provided networking, infrastructure, security solutions, and support services to a diverse range of clients including financial institutions, insurance companies, defense contractors, healthcare providers, and small businesses in the South Jersey/Philadelphia region. He has developed a keen understanding of current evolving (and disruptive) technologies, IT/cyber security solutions, working closely with organization stakeholders and board of directors to explore opportunities and to align security solutions with internal directives, regulatory compliance requirements, and strategic vision.

In summary, Harry's extensive experience and expertise in business, IT services and cybersecurity make him a valuable asset to Atlantic, and his strategic guidance will be instrumental in ensuring the ongoing success and growth of our client organizations.
