How Digitalization and Technology are Changing the Way We Connect

By: Maria Marks and Brian Donovan

[View full PDF here](#)

Digitalization and technology are changing how we connect and the environment in which we live. It has become a part of our lives in ways we may not realize. Our world continues to change from using QR codes to access a building to using our phones for digital driver's licenses. The foundation of fire safety is to protect lives and assets and to maintain business continuity. However, with the advent of smart buildings and the increasing role of IoT-enabled fire safety solutions, the method to achieve this goal is changing. According to Peter Nebiker with Siemens Smart Infrastructure, "From detection and evacuation to extinguishing and danger management, the potential afforded by ever-increasing digitalization and cloud connectivity has never been greater." What does the future of building systems, specifically fire alarm systems look like with the advent of technological changes?
