

SFPE JOURNAL OF FIRE PROTECTION ENGINEERING GOES ONLINE!

Look For a New Format in 2001.

This year, SFPE celebrates 10 years of publishing the Journal of Fire Protection Engineering. In celebration of that event and to better serve our members and subscribers, we are pleased to announce that the Society of Fire Protection Engineers has entered into a publishing relationship with Technomic Publishing Company to bring the Journal up to tomorrow's standards for quality and electronic availability. Beginning in 2001, the paper version of the Journal will use a new 6" by 9" size, to permit a one-column format to make the Journal easier to read and use. Four issues of the Journal in this new format will be delivered to you in 2001 as part of your subscription.

Also beginning in January, new issues of the Journal will be available online! All articles will be fully searchable by proximity, Boolean, keyword, and browsing. Among the other features is an optional, e-mail alerting service, which will provide users with the table of contents of a newly published issue or let a user know when an article is published on a topic of special interest. Issues will be available online several weeks before the print version is delivered. Current subscribers may choose print or online or obtain both for a special price. **The online Journal will be available to SFPE members, along with the print version, at no additional charge.** Look for more information in SFPE's newsletter and in the first 2001 issue.

Please join us in celebrating the 10th anniversary of the Journal by encouraging your employer to subscribe or resubscribe and your colleagues to become members of SFPE. Contact SFPE at www.SFPE.org for more information. We also encourage you and your colleagues to submit papers to the Journal to assist practicing fire protection engineers in providing better fire protection design and services. Refer to the inside cover for more information or contact the editor at david.yung@nrc.ca.
