

Thanks to reviewers

The *Journal of Fire Protection Engineering* would like to acknowledge the efforts of the following people in reviewing articles for Volume 23. The peer review is an important process that allows the Journal to provide high-quality articles that are of interest to the fire protection community. We thank these reviewers for the valuable time they have given to provide constructive suggestions to authors, thereby insuring that refereed articles are available for publication. Both SAGE and the Editorial Office particularly thank those reviewers that are in the group mentioned below who regularly review papers submitted to the journal. Thanks also to the readers of this journal for their many compliments and support throughout 2013 and during the years since I became editor in January of 2003. I have deeply enjoyed the experience of interacting with so many interesting people throughout the world. Best wishes to you all. Ron Alpert
