

Shaydon Bodemar

"This scholarship for me means two main things to me. Firstly, that my consistent hard work can be and has been recognized, which is enormously motivating. Secondly, it will mean much for financial stability in a time that has been very challenging in that regard, which is something I am indescribably appreciative of. This scholarship is amazing for the way it can improve people's lives, and I truly feel it firsthand. My plans after graduation are to go directly into industry as a Software Engineer, likely right here in the San Diego area."
