

Vittorio Schiaffino

"I am incredibly grateful to be selected to receive the SIM San Diego Special Achievement Award for 2020. When I first learned of your chapter, it was shortly after I became a student leader with the MIS Society at Cal State San Marcos. I saw the community and opportunity that SIM provides and knew I wanted to help foster a strong connection between our student organization and your chapter. By receiving this award, I am proud to say I have accomplished that goal. Over my three terms as president of the MIS Society, we worked together and brought SIM San Diego to the CSUSM campus for a variety of events. MIS students got to connect with your membership and really develop their knowledge of the industry. Looking to the future, I am eager to embark on my path towards becoming an IT project manager, and am excited to begin my journey working for one of SIM San Diego's member companies!"
