

# Metabolism at the Hub of Cancer and Immunity

MARCH 10-12, 2024 | MIAMI, FL & VIRTUAL  
INTERCONTINENTAL MIAMI

Join the Society for Immunotherapy of Cancer (SITC) and colleagues from around the world to explore the 2024 Spring Scientific: Metabolism at the Hub of Cancer and Immunity.

## 2024 Spring Scientific Topics

The two and a half-day program will include the following topics, which will be addressed by expert speakers and through abstract presentations:

- Cancer Metabolism and Metastasis
- Cancer Metabolism and the Tumor Microenvironment (TME)
- Interactions Between Systemic Metabolism and Cancer Metabolism
- Metabolism of Adaptive Anti-Tumor Immunity
- Myeloid Cell Metabolism in the Context of Cancer
- Metabolic Stress in Anti-Tumor Immunity
- Microbiome and Tumor Microenvironment
- Microbiome Interaction with Immunity in Cancer
- Targeting Cancer Metabolism in the Clinic

## Abstracts Featuring the Latest Research

The SITC Spring Scientific will feature abstracts with the latest, cutting-edge data on immunometabolism from leading experts in the field.

## Learning Objectives

- Describe the roles of immune, microbiome, and metabolism in the treatment of cancer with immunotherapy
- Outline methods to investigate how metabolism impacts cancer and immune cell differentiation and function
- Analyze therapeutic approaches to reprogram metabolic processes to improve cancer immunotherapies

## Keynote Speaker

Hongbo Chi, PhD  
St. Jude Children's Research Hospital

### KEYNOTE ADDRESS:

Functional Genomics and Systems Immunology in Mapping the Metabolic Basis of Cancer Immunity

## Organizers

Greg M. Delgoffe, PhD  
University of Pittsburgh

Jennifer Guerriero, PhD  
Brigham and Women's Hospital

Jennifer Wargo, MD, MMSc  
The University of Texas MD Anderson Cancer Center

## IMPORTANT DATES

Feb. 12, 2024 - Early Registration & Housing Deadline
