In partnership with the National Cancer Institute (NCI) Cancer Moonshot℠, the Society for Immunotherapy of Cancer (SITC) and the Big Data and Data Sharing Committee are excited to announce our second “SITC-NCI Computational Immuno-Oncology Webinar Series” occurring throughout 2022.

Meant for scientists early in their career or those who want to remain abreast of the latest technologies, the goal of this series is to help foster better communication concerning data science technologies and analyses between cancer immunotherapy researchers and clinicians in order to fuel translational immunotherapy research.

Learn more and register for the entire series at sitcancer.org/ComplIO
