About the 2024 Series
The Society for Immunotherapy of Cancer (SITC) is pleased to announce our fourth Targets for Cancer IO: A Deep Dive live webinar series.
This new series will include seven live webinars addressing hot topics in immuno-oncology. Key leaders in the field will provide an overview of the current state of the science and address questions about its future.

An interactive Q&A session will follow the topic overview, providing participants with the opportunity to ask in-depth questions of the faculty as well as offering a forum for networking and the initiation of collaborations with others working in a similar field.
