

Primer on Tumor Immunology and Cancer Immunotherapy™

A SITC 2025 Pre-Conference Program
Thursday, Nov. 6, 2025 | 8 a.m.–5:30 p.m. ET

LEARN MORE & REGISTER AT [SITCANCER.ORG/2025](https://sitcancer.org/2025)

About the Primer

The field of cancer immunology and immunotherapy has driven novel therapeutic options for cancer patients.

However, the complexity of the field continues to grow, thus, the SITC Primer on Tumor Immunology and Cancer Immunotherapy™ is designed to provide a foundation for understanding core immunology principles as they relate to basic and clinical research in immunotherapy of cancer.

Access the latest research in IO including sessions on:

- The Cancer Immunity Cycle
- Tumor Microenvironment
- Effector Cell Redirection Therapy
- Modulating Endogenous T cell Responses

This program will also touch on emerging therapies and technologies!

Organizers

Andrea Schietinger, PhD
Memorial Sloan Kettering Cancer Center

Eric L. Smith, MD, PhD
Dana-Farber Cancer Institute

Consider Joining Today

Members receive a discount on registration rates and early access to housing for SITC 2025, our 40th Anniversary Annual Meeting and Pre-Conference Programs.
