Digitization and Preservation Projects-
Opportunity to discover and share what Army libraries are digitizing, how to begin or manage a digitization project, education opportunities for scanning/digitizing and anything else on the topic you would like to discuss.

The Liberty Memorial opened on November 11, 1926 – eight years after the end of the War. President Calvin Coolidge delivered the dedication speech, in which he spoke of how “the magnitude of this memorial, and the broad base of popular support on which it rests, can scarcely fail to excite national wonder and admiration.” The museum has remained faithful to the initial objective: to collect, preserve and interpret the physical objects of World War One. The Liberty Memorial Museum is acknowledged as the only public museum in the United States dedicated solely to the history of World War One.
