Leading library technology with a constantly shifting floor: Managing systems, process, and people to deliver quality consistent resources to users and partners.
Today’s Talk

• Brief overview of Library and Library Technology at the University of Florida
• Our Partnerships
• The Shifting Floor
• Benefits and Challenges
Welcome to NCSA Mosaic, an Internet information browser and World Wide Web client. NCSA Mosaic was developed at the National Center for Supercomputing Applications at the University of Illinois in Urbana-Champaign. NCSA Mosaic software is copyrighted by The Board of Trustees of the University of Illinois (UI), and ownership remains with the UI.

Jan '97
The Software Development Group at NCSA has worked on NCSA Mosaic for nearly four years and we've learned a lot in the process. We are honored that we were able to help bring this technology to the masses and appreciated all the support and feedback we have received in return. However, the time has come for us to concentrate our limited resources in other areas of interest and development on Mosaic is complete.

All information about the Mosaic project is available from the homepages.

NCSA Mosaic Platforms:
- NCSA Mosaic for the X Window System
- NCSA Mosaic for the Apple Macintosh
- NCSA Mosaic for Microsoft Windows

World Wide Web Resources The following resources are available to help introduce you to cyberspace and keep track of its growth:
- A glossary of World Wide Web terms and acronyms
- An INDEX to Mosaic related documents
- NCSA Mosaic Access Page for persons with disabilities
- Mosaic and WWW related Tutorials
- Internet Resources Meta-Index at NCSA
USD and Vermillion Libraries

- I.D. Weeks Library
- Lomax Health Sciences Library
- McKusick Law Library
- Vermillion Public Library

The University of South Dakota Libraries together contain approximately 673,000 volumes, 5,721 serial subscriptions, extensive AV and microform holdings, and are a depository for both federal and state government documents. The general collection of over 450,000 volumes is housed in the I.D. Weeks Library; this building has seats for over 800 readers in individual study carrels, group study tables, and comfortable leisure chairs. The I.D. Weeks Library contains non print media in many formats, listening and viewing facilities, an electronic classroom, and microforms. The Special Collections Department houses an extensive collection of Northern Great Plains material with particular emphasis on Native Americans.

The I.D. Weeks Library is customarily open nearly 100 hours per week for study and research. The faculty of ten librarians provide assistance in locating materials and instruction in using the resources of the library. An active document delivery service provides patrons with materials not housed in I.D. Weeks Library.

Special collections in the Schools of Law and Medicine are available to all students. These libraries have their own hours and circulation policies.

Our Partnerships

The Digital Library of the Caribbean (dLOC) is a cooperative digital library for resources from and about the Caribbean and circum-Caribbean. The dLOC partner institutions are the core of dLOC. dLOC partners retain all rights to their materials and provide access to digitized versions of Caribbean cultural, historical and research materials currently held in archives, libraries, and private collections. (Information on how to become a dLOC partner).

Read the dLOC Fact Sheet (and more about dLOC), register for a free mydLOC user account, or please contact us with any questions.

dLOC also supports collaborative project development and funding initiatives for partners, including the Protecting Haitian Patrimony Initiative and a collaborative funding model with institutional members and personal members to contribute funding. These activities complement the work by the dLOC partners, who contribute content, and time and expertise in shared governance.

Florida Digital Archive

The mission of the Florida Digital Archive (FDA) is to provide a cost-effective, long-term preservation repository for digital materials in support of teaching and learning, scholarship, and research in the state of Florida. The services of the FDA are available to the libraries in the Florida state university system and their partners.
The University of Florida Digital Collections (UFDC) hosts more than 360 outstanding digital collections, containing over 14 million pages, covering over 75 thousand subjects in rare books, manuscripts, maps, children's literature, newspapers, theses and dissertations, data sets, photographs, oral histories, and more for permanent access and preservation. Through UFDC, users have free and Open Access to full unique and rare materials held by the University of Florida and partner institutions.

The UF Libraries encourage and support faculty collaboration on digital collections and digital scholarship.

UFDC is constantly growing with new resources, new scholarship, and system enhancements thanks to the Open Source Solr/JCM Software. The search box above searches across all the digital resources in all the collections. By clicking on the icons below, you can view and search various collections.
