

To sign up for a free SME login, go to www.smenet.org and click the Login link in the top right area of the page.

When the pop-up window appears, select the Become an SME Guest option and complete the sign-up form.

Once you have a login, go to the [Ventilation Discussion](#) group and select the Request to Join.

Send the email to the group Admins.

Underground Ventilation (UVC)

The purpose of the Underground Ventilation Committee is to promote engineering interest and technological progress in the ventilation of mines, tunnels, and other subsurface openings. The UVC accomplishes its purpose by conducting technical sessions at SME-AIME meetings, sponsoring the U.S. Mine Ventilation Symposium with host universities and other organizations, and soliciting papers for publication in *Mining Engineering* and *SME Transactions* and proceedings. The UVC offers an affiliation home for SME members engaged in the practice of underground ventilation. In these ways, the UVC seeks to encourage research, education, publications, and technology transfer in the field of underground mine ventilation.

This group is open to all industry and SME members. If you already have an SME account or are a non-member with a login, please contact the group [Admin](#) to request to join. Need to create a free login account? [Start here!](#) Then click request to join.

REQUEST TO JOIN

Within 24 hours, the group Admins will grant you access to the [Ventilation Discussion](#) and you may begin to participate with the group.
