

2019 Boat Design Competition

Presented By:

The Apprentice School
Student Section of
The Society of Naval
Architects and Marine
Engineers (SNAME)

12th Annual

The Boat Design Competition focuses on increasing awareness of the naval architecture profession and shipbuilding industry. The competition will engage high school students' math, science, and creative abilities, and introduce them to engineering, drafting, project planning, and leadership principles.

Participating high schools will form one or more student teams and work independently to design a boat. Four designs will be selected as finalists and will be constructed by The Apprentice School. A head-to-head competition between the boats will take place at The Mariners' Museum in Newport News, Virginia.

Key Dates

Registration Opens: September 1, 2018

Registration Deadline: October 31, 2018

Final Design Deadline: December 17, 2018
