There will be no General Section Meeting in July.

SPE SJV Continuing Education Courses

Coming Up

August 20-21, Improved and EOR in Offshore Environments in Pasadena

Courses in Bakersfield:

September 16, Data Driven Analytics, Andrei Popa

October 6-8, Introduction to Petrophysics, Gary Batcheller.

October 9-10, Cement Evaluation, Gary Batcheller.

November 4-6, Introduction to API Storage Tank Standards

Annual SPE events that are coming up:

August 25-27, 2014 - Unconventional Resources Technology Conference (URTeC) in Denver

October 27-29, 2014 - ATCE in Amsterdam

March 24-25, 2015 - Coiled Tubing and Well Intervention Conference and Exhibition in the Woodlands TX
Dear Members

As we start our new board year, I would like to thank our previous chair Jesse Frederick and a special thanks to Max Solanki who completes his assignments with the board. Max provided outstanding support and service to the board throughout his years of service and he will be greatly missed. I hope we continue to provide the level of service he brought to the board in the future years.

Please welcome our newest board members — Craig Pauley (Chevron), Matthew Minemier (Chevron), and Indar Singh (Aera) and wish our outgoing members Neil Malpiede, Tarang Lal and Terry Kloth the very best. It is my great pleasure and honor to introduce your 2014-2015 board members.

This year we aim to be the best SPE section in the world by increasing our involvement in the community, membership activities, and educational activities. More than ever, we need the support and participation of our members if we want to achieve this goal. We are continually looking for ways to improve all of our activities and events and would appreciate all types of feedback.

I would also like to encourage our members to continue their involvement in SPE events and activities. I would like to encourage our members to volunteer for our events throughout the year such as Engineering Day in February and the Golf Tournament in April. It is our volunteers and members that make our events successful.

I would like to remind all members of some of the Annual SPE events that are coming up:

- August 25-27, 2014 - Unconventional Resources Technology Conference (URTeC) in Denver
- October 27-29, 2014 - ATCE in Amsterdam
- March 24-25, 2015 - Coiled Tubing and Well Intervention Conference and Exhibition in the Woodlands TX

Sincerely
Your SJV SPE 2014-2014 Chair,
Blythe Johnson

Knowledge Transfer

Thank you to all those that came to our YP event in June. Special thanks to Aera Energy for hosting the event. It was a great success and all attendees said they took some valuable information from the talk. If you are interested in a copy of the presentation, please let me know.

Thanks,

Tarang Lal  
Facilities Engineer  
Aera Energy LLC  
Office: 1-661-665-4442  
Cell: 1-661-979-4697  
TLal@aeraenergy.com
There will not be SPE SJV Section Monthly Networking Bash

In July

SPE Networking bashes are held monthly as a service to our members. This is a great opportunity to come out and meet people from all areas of our industry in a social setting.

Our sponsor generously provides appetizers for your enjoyment while you are meeting new people or visiting with a long time colleague.

Non-member guests are always welcome to attend.
The SPE SJV Section would like to thank B & L Services for sponsoring the June Networking Bash!

We are always looking for companies or individuals that would like to sponsor this event. For additional information please contact Matthew Merrimer @ ??@chevron.com or 661 -??????.

SPE Workshop

Improved and Enhanced Oil Recovery in Offshore Environments
20-21 August 2014
The Langham Huntington Hotel
Pasadena, California, USA

Limited Slots Available! Register Now!
Early Registration Deadline: 23 July 2014

In the drive to reduce unit development costs and maximize estimated ultimate recovery (EUR) in offshore assets, some operators are trialing improved oil recovery/enhanced oil recovery (IOR/EOR) techniques with varying success. If this technology application is successful, it could change the game for offshore development and more specifically for deepwater assets. It could potentially enable radically new development concepts.

Challenges to successful application of EOR concepts in offshore environments are many and diverse. Primary concerns include:
- weight and space constraints
- well count
- availability and cost of injectants
- completions
- need for high reliability

Don’t miss this opportunity to exchange ideas and network with other professionals. This event will sell out so act fast!

For more information or to register for this event: Click Here
Data Driven Analytics for Reservoir and Production Optimization

Instructor: Andrei S. Popa, Ph.D.

Date: Tuesday, September 16th, 2014  (8:00 am to 5:00 pm)

Location: University of Phoenix, 4900 California Ave, Bakersfield, California.

Announcement:
SJVSPE is proudly offering Data Driven Analytics for Reservoir and Production Optimization. This one day short course is intended to cover the fundamentals of Data Mining (DM) and Artificial Intelligence (AI) techniques as applied to the oil and gas industry. This course is designed for engineers, geoscientists, technical managers, and engineering technologists who are interested in learning how to apply Data Mining and Artificial Intelligence techniques to solve complex optimization problems.

In this course you will learn:
- History and fundamentals of the Artificial Intelligence in the oil & gas industry
- Basics of Data Mining techniques and tools
- How to identify problems suitable for application of Data Mining
- How to define workflows and apply the appropriate tools

Questions:
Please call Craig Pauley @ 661-391-4360 (office); 661-496-0707 (mobile) or e-mail CraigPauley@chevron.com if you have questions or need additional information.

Payment & Cost:
Payment can be made by check at the door on the first day of class (RSVP in advance by e-mail) or register & pay with a credit card via the PayPal Website (below). The price of this course is $950. Lunch and beverages are included.

RSVP & Paypal Payment Link:

Data Driven analytics for Production and Reservoir Optimization

Target Audience:
Engineers, geoscientists, technical managers, engineering technologists who are interested in learning how to apply Data Mining and Artificial Intelligent techniques to solve complex optimization problems, for day to day production operations as well as reservoir optimization and development.

Continued on next page......
Description:
This one day short course is intended to cover the fundamentals of Data Mining (DM) and Artificial Intelligence (AI) techniques as applied to the oil and gas industry. This course is designed to provide a solid foundation to those interested in learning how to use both basic and advanced intelligent tools in solving complex optimization problems. The attendees will first learn the theoretical background of AI&DM tools including clustering techniques, neural networks, genetic algorithms, fuzzy logic and case-based reasoning. Then, they will be introduced to a suite of real world production and reservoir optimization cases and the solutions developed using single or hybrid Artificial Intelligence tools. The course wraps-up with a demonstration of a problem set-up, methodology workflow and proposed solution.

Course Content:
- Data Mining and Artificial Intelligence overview
- Clustering Techniques (Hard C-mean, Fuzzy C-mean, ACO, etc)
- Neural Networks, Genetic Algorithms, Fuzzy Logic, Case-Based Reasoning
- Hybrid Intelligent Systems
- Review of practical industry applications (optimization, pattern recognition, forecasting)

Instructor:
Dr. Andrei Popa has over 14 years of experience applying Artificial Intelligence technologies to complex optimization problems in the energy industry. He has published more than two dozen papers on the subject, and most recently co-author the book “Artificial Intelligence & Data Mining (AI&DM) Applications in the Exploration and Production Industry”, part of SPE's "Get Up To Speed" Series. Andrei’s service within industry organizations has earned him several awards including the 2011 SPE “Management and Information Award” for Western North America Region, and the international SPE version of the same award, in 2013. He is a Technology Advisor for the Applied Reservoir Management team at Chevron’s San Joaquin Valley Business Unit. Since joining Chevron in 2002, Andrei has had multiple assignments including production and reservoir engineer, special projects lead engineer, and subsurface team lead. Since 2009 he has taught “Applied Reservoir Engineering” and “Natural Gas Engineering” at University at Southern California, and served as a guest lecturer for several course within the “Smart Oilfield” program.

Dr. Popa earned his Ph. D. and M.S. degree in Petroleum and Natural Gas Engineering from the West Virginia University and he holds a B.S. degree in Petroleum and Natural Gas Engineering from the University of Ploiesti.
Understanding and Applying Logs – Intro to Petrophysics

Instructor:  Mr. Gary Batcheller, GWB Consultants
Date:       October 6th-8th, 2014  (8:00 am to 5:00 pm)
Location:  University of Phoenix, 4900 California Ave, Bakersfield, California.

Description:

The first two days of this 3-Day workshop will illustrate log responses to rocks and their fluids. Once these simple relationships (common throughout the world) are understood, you will be able to easily recognize permeability, hydrocarbons, and rock and fluid types. The workshop will include:

- Finding permeability and salt water from resistivity logs
- Fluid and rock type identification from “porosity” logs
- Hydrocarbon identification and net pay estimations
- “Interpretation at a glance” techniques
- Gas and clay/shale effects on logs
- Uses and the limitations of open hole logs
- Heavy oil examples
- Steam injection temperature surveys

The third day illustrates techniques for recognizing log validity and provides additional information on log limitations. These easy-to-use procedures will help participants determine the reliability of log data. This data is often used in making important and costly decisions. This day has been updated to include an introduction for the evaluation of rocks with organically rich materials and with extremely low permeability. These potential reservoirs are often referred to as a resource plays or “shales”. The overall production for these reservoirs depends upon the success of fracture treatments and a section has been included for the introduction to rock mechanics in both vertical and horizontal wells. In addition, current completion techniques for fracturing horizontal wells will be discussed. Professional staff and managers will find this workshop essential to decision making.

The third day will include:

- Using various techniques including offsets to validate logs
- Individual log checks and limitations
- Source rock/reservoir or resource play interpretation – aka “Shales"
- The “Shale” revolution and introduction to rock mechanics
- Introduction to horizontal completion techniques – How successful are they?

Comments from previous workshops include: “Excellent overall descriptive review of open hole logs – Done in a concise practical manner”, “It’s practical applications – Good job on being concise and to the point”.

Target Audience:  All professionals involved in the application of logs in the oil and gas industry can benefit from this workshop. Techniques will be presented to ensure students that they will be able to make professional decisions using logs. Both technical and non-technical personnel have benefited from these techniques. For those involved in completions, this will help them gain more understanding into how those work, in conjunction with rock properties. A complete workbook and actual log examples will help the student to interpret and understand the uses of logs. Practical exercise will enable you to learn these techniques easily and make better decisions immediately. Over 3,000 personnel in the industry have made better decisions and saved money using techniques from this program.

Questions:  Please call Craig Pauley @ 661- 391-4360 (office); 661- 496 -0707 (mobile) or e-mail CraigPauley@chevron.com if you have questions or need additional information.

Payment & Cost:  Payment can be made by check at the door on the first day of class (RSVP in advance by e-mail), or register & pay with a credit card via the PayPal Website (below). The price of this course is $2,250. Lunch and beverages are included.
Evaluating Cement Integrity – Using today’s Logs

Instructor: Mr. Gary Batcheller, GWB Consultants

Date: October 9th & 10th, 2014 (8:00 am to 5:00 pm)

Location: University of Phoenix, 4900 California Ave, Bakersfield, California.

Description:
This 2-Day workshop will illustrate the application of cement logs for cement evaluation which is essential to consistently successful decisions. Highly deviated to horizontal logs are part of the focus. Actual log examples are utilized to illustrate and practice with different type of logs and allow a comparison for log quality. Evaluation using easy applied interpretation techniques and making squeeze or no squeeze decisions. Included are practical guidesless for the successful evaluation of cement integrity. The workshop will include:

- Effects of quality control and the CBL’s undoing
- Reliable interpretation techniques
- High angle and horizontal unique problems
- Mud removal techniques discussed
- Radial acoustic logs with 8 to 16 measurements
- New Technology – its value and limitations
- Identifying Potential problems with cement integrity
- The use of open hole logs to enhance CBL/VDL interpretation
- Understand new interpretation techniques available for light weight, or complex cements

Questions: Please call Craig Pauley @ 661- 391-4360 (office); 661- 496 -0707 (mobile) or e-mail CraigPauley@chevron.com if you have questions or need additional information.

Payment & Cost: Payment can be made by check at the door on the first day of class (RSVP in advance by e-mail), or register & pay with a credit card via the PayPal Website (below). The price of this course is $1,630. Lunch and beverages are included.

RSVP & Paypal Payment Link: PayPal link for Evaluating Cement Integrity

Target Audience:
This workshop will apply to those professional involved in cementing, completions and work-over operations. California has more foam or light weight cements pumped than in any other part of North America, and its unique evaluation problems are detailed. Many examples are used to help students evaluate log quality and practice evaluation techniques. Over 2,200 personnel in the oil and gas industry have made better decisions and saved money, employing techniques from this workshop.

Instructor:
Mr. Gary Batcheller has operated GWB Consultants, a technical training and services firm in Oklahoma City since 1989. He was employed for 18 years at Schlumberger Well Services, and held various positions including a training coordinator. Mr. Batcheller has held log workshops for over 275 companies worldwide and authored three papers including “Cement Evaluation Challenges in Horizontal Wells – Guidelines for Providing Meaningful Data” SPE 164513 on 23-26 March 2013 and two on the evaluation of light-weight cement. He has developed simplified and practical techniques to enable industry professionals to better understand logs and their applications. He holds BS degree in Physics from Texas Technological University. He received two SPE service awards including - Award for Distinguished Contribution to Petroleum Engineering in the Area of Formation Evaluation 2011.
“Introduction to API Storage Tank Standards”

Instructor: Mr. John Cornell

Date: November 4-6th, 2014 (8:00 am to 5:00 pm)

Location: University of Phoenix, 4900 California, Ave, Bakersfield, California.

Announcement:

SJVSP is proudly sponsoring the – “Introduction to API Storage Tank Standards”. This is an intensive three day course which is designed for petroleum industry personnel, Facility Engineers, Project Engineers and Managers, suppliers, engineering firms, and operating personnel and contractors responsible for the design, construction, inspection, maintenance, regulatory, compliance, or operation of both large and small above ground storage tanks. A complete set of course materials are provided in a binder for each student.

Questions:

Please call Craig Pauley @ 661-391-4360 (office); 661-496-0707 (mobile) or e-mail CraigPauley@chevron.com if you have questions or need additional information.

Payment & Cost:

Payment can be made by check at the door on the first day of class (RSVP in advance by e-mail) or register & pay with a credit card via PayPal (below). The price of this course for SPE members and non - members is $1,510 per person. Morning and afternoon snacks, cold and hot drinks, and a light lunch is included.

PayPal Link: API Tank Class November 2014

RSVP: Please RSVP to CraigPauley@chevron.com

Target Audience:

Facility Engineers, Facility Engineering Supervisors, Construction Engineers, Operational personnel, Supervision, Piping engineers, Contractors, Suppliers, designers, Project Engineers, Project managers, and anyone whom would like a better understanding Refining and Production Tanks.

Course Outline:

**Day One:** Large Atmospheric Tanks (API-650) - Tank introduction, Materials, Design, Fabrication, Construction, External/ Internal floating roofs, Marking, and additional design and construction details.

**Day two:** Existing Tank Evaluation (API-653) – Introduction to tank failures, Brittle fracture, Inspection drivers and considerations, Inspection types and schedules, Safety concerns around tanks, Failure (corrosion) types, etc.

**Day three:** Production Tanks (API-12F-12B) Tank Materials, Design, Fabrication. Also, (API-12R1), Inspection of field production tanks.

Instructors Biography:

Mr. John Cornell is a Senior Tank Specialist for and owner of H.I.R. Technical Services which is a well-recognized tank consulting firm for storage tank design, fabrication, construction, inspection, and repair. He is currently an Official contracted training provider for The American Petroleum Institute worldwide and has been offering tank training courses on standards such as but not limited to API-620, API-650, and API-653 for many years. Mr. Cornell has worked for several suppliers of both internal and external floating roofs and is now considered to be an expert on floating roof systems of all design. Mr. Cornell discovered a gap in the training that was currently available to tank owners so he has assembled and now offers “The Advanced Tank Training” course which is intended to increase the knowledge of tank owners. Mr. Cornell is The Senior Training Provider for The USDOT for PHSMA as relating to Large Breakout tanks. Mr. Cornell is also an API-653 Certified Tank Inspector.

Special Requirements: Lap Tops are “not required” and the students are discouraged from using lap tops or smart phones during class.
We match up the latest innovations with breakthrough thinkers to expand what's possible. In Bakersfield, you'll collaborate with the best in the industry on leading-edge projects like cogeneration, enhanced oil recovery, and digital iFields. At Chevron, you'll join a team with the technology to take on big challenges, the integrity to do it responsibly, and the drive to keep the world moving forward.

Are you up to the job? Learn more about Bakersfield engineering opportunities at chevron.com/BakersfieldJobs

Freeport-McMoRan Oil & Gas

Freeport-McMoRan Oil & Gas, formerly Plains Exploration & Production Company, is a wholly owned subsidiary of Freeport-McMoRan Copper & Gold Inc., a premier U.S. based natural resources producer. Freeport-McMoRan has oil and natural gas assets primarily in North America, including the Deepwater Gulf of Mexico, onshore and offshore California, the Rocky Mountain region, the Eagle Ford and Haynesville shale plays and the emerging ultra-deep gas trend onshore in South Louisiana and on the Shelf of the GOM.

CAREER OPPORTUNITY

SENIOR DRILLING ENGINEER

Plan and implement all phases of well drilling activities. Responsible for drilling engineering and operations for all wells in assigned areas. Responsible for designing vertical, directional & horizontal oil & gas wells. Responsibilities include not only planning, designing & executing the well construction program, but also administering day-to-day drilling operations in the assigned area. Some field work is necessary. Provides technical data, well research and cost estimates to drill to proposed total depth through running cementing the production casing in the most efficient and prudent manner. May be involved in completion and workover operations. Administers various plans, policies and programs related to drilling activities; work closely with contract crews to insure efficient, safe operations; while keeping Drilling Manager advised on progress of drilling activities.

ESSENTIAL DUTIES AND RESPONSIBILITIES:
- Plan and implement all phases of planning and operations for wells drilled in assigned areas.
- Prepare cost estimates and AFE’s for the drilling of wells.
- Evaluate offset drilling data to build correlation packages for estimating well costs.
- Develop the well program for drilling.
- Assist in providing 24 hour supervision on well sites and direct the operations through appropriate field personnel.
- Actively participate in Operational Team consisting of Drilling, Land, Geology, Reservoir, Production, and EHS Personnel.
- Coordinate all necessary permitting requirements. Stay abreast of state and federal laws and regulations as applicable.
- Prepare work scope and evaluate the bidding of goods and services for drilling operations.
- Enforce E&P safety and environmental policies and procedures.
- Represent the Company’s Drilling Department at departmental and joint interest meetings.
- Process and route for correct filing field generated paperwork. Review, code and approve vendor invoices on a timely basis. Organize and maintain files on drilling operations.
- Interact daily with contract personnel, and time to time with federal, and state regulatory agencies.

POSITION SPECIFICATIONS:
- Must have a B.S. degree in Petroleum Engineering or related field
- 10+ years California experience in the oil and gas industry as a drilling engineer employed by major or Independent oil company required.
- Expertise in thermal drilling operations and directional & horizontal drilling is necessary.
- Field operations/rig supervision experience is an advantage.
- Experience with onshore drilling rigs. Deep water, barge, platform, jack-ups and floating drilling experience will be considered a plus.
- Previous field drilling experience is desirable.
- Must have a working knowledge of state and federal regulatory laws and regulations.
- Must be proficient with personal computers and spreadsheet software. Working knowledge of Windows, Excel, e-mail, database management and local area networks.
- Must be able to deal logically and effectively with all levels of management.
- Must be proficient with staff work including oral and written communications.

HOW TO APPLY

Successful candidates will enjoy a generous compensation and benefits package. Qualified applicants must have authorization to live and work in the United States. Sponsorship is not available. Visit our website to apply: www.fcx.com or to mail: Attn: Human Resources, 1200 Discovery Dr., Suite 100, Bakersfield, CA 93309 or Fax 661-395-5283 EOE, M/F/D/V
ZEECO: smokeless, reliable well site flaring

At Zeeco, we understand the everyday realities of environmental compliance in the oil and gas production fields. Our enclosed flare systems achieve greater than 98% VOC destruction efficiency, meeting EPA Quad O regulations and keeping you in compliance. They operate safely, smokelessly, and with fewer service issues. From well site and tank vent flares to compressor and central gathering site flares, Zeeco delivers exactly what you need. Choose the combustion experts with the field experience to back you up and with the engineered, standardized flares and thermal oxidizers you need in inventory right now. Choose a company where humans answer the phone and where deadlines mean something.

Choose Zeeco.

open / enclosed flares • high / low pressure flares • thermal oxidizers • rentals

Our team just got 450 times better

With our 450 new team members from Processes Unlimited, we're expanding our oil & gas EPCM services in the United States. Together, our team of 1,800 is exploring new opportunities, and finding more creative ways to meet your needs.

Design with community in mind
300% Increase in Downhole Pump Run Life

A recent Six Sigma Study shows 300% increase in downhole pump run life.

Watch this 2 minute video comparing a downhole pump with a conventional plunger vs. a FARR plunger, [Click here](#). You will be amazed.

By making one small change in your downhole pumps, you will experience:

1. Reduce rig count on lease.
2. Reduce personnel and vehicles on lease.
3. **Reduce Health & Safety incidents.**
4. Reduce Exposure to Environmental Spill Incidents.
5. Reduce Operating Expenses and Save your company Money.

You don’t even have to change your pump shop or pump supplier, just request a FARR Plunger in your next pump.

Muth Pump has been in business for more than 15 years and we have more than 15,000 FARR Plungers in wells in 17 states in the USA and in 10 different countries. It is proven technology that works.

Please visit our website [www.muthpump.com](http://www.muthpump.com) or give us a call for more information.

"By FARR, We Make Your Rod Pumps The Best In The Industry!"
