

Laurent Jammes
Actys

Laurent Jammes is a co-founder of **Actys** and YBL Consulting, and the associate director of ENEA Consulting. Laurent is an expert in New Energy Technologies for energy transition (Marine Renewable Energy; Hydrogen; CO2 Capture and Storage; Energy storage; Geothermal, etc.), and is conducting research on the social acceptability of these technologies. Laurent is a member of the strategic steering committee of the ANR (French research agency) on “safe, clean and efficient energy” and member of the scientific committee of the BRGM (french geological survey). He worked for 23 years at Schlumberger, a multinational service company in the Oil & Gas sector, in various R&D positions in France and China.

Laurent has delivered many short training courses and lectures to utilities, Oil & Gas companies and governmental agencies. He lectures at the University of Caen Basse-Normandy (Energy & Society). He has a PhD in physics, an Engineering degree from Ecole Centrale de Paris and a Master’s degree in Psychology. Laurent is a member of SPE and of Evolen.
