12/1/2019

Dear SPE Member and Partner,

Greetings! Hope you have had a wonderful 2019 and that this year has been fruitful, lucrative, and full of opportunity as 2020 soon approaches in our industry. It is that time of year again, when the Wyoming Petroleum Section (our local SPE Chapter) begins seeking the support of stakeholders across our state of Wyoming who would be willing to take the role of sponsor for our scholarship fund. In the spring of 2019, our local Chapter awarded over \$9000 in scholarship funding to thirteen (13) students across three (3) schools. These students were enrolled in accredited Petroleum Engineering programs at the University of Wyoming, Colorado School of Mines, and Montana Tech. Our next scholarships being awarded will be awarded in April of 2020.

Given the changing and dynamic nature of the oil and gas industry that we all work in, operate in, and hold varying interests in, I feel it crucial to support the next generation of petroleum engineers coming into the industry. We should give them every chance of success possible, therefore I implore you to please consider being a sponsor this year. Your company's name will be included within our monthly newsletter and on our website.

The three levels of sponsorship are as follows:

- **Bronze level will be for a contribution of \$0 to \$249.00**
- **Silver level will be for a contribution of \$250.00 to \$499.00**
- **Gold level will be for a contribution of \$500.00**

Please mail your contribution to the physical address above. We will send you a thank-you letter as receipt of your contribution. Remember that these are tax deductible.

Please do not hesitate to reach me with questions at 307-251-6321 or 307-234-7147. Let's make this year our most lucrative in funding student's education in the petroleum engineering programs local to our region!

Regards,

Sabrina Hamner
