

SPE's Mission, Vision, and Core Values

Mission

To collect, disseminate, and exchange technical knowledge concerning the exploration, development and production of oil and gas resources, and related technologies for the public benefit; and to provide opportunities for professionals to enhance their technical and professional competence.

Vision

Advance the oil and gas community's ability to meet the world's energy demands in a safe, environmentally responsible, and sustainable manner.

Core Values

- Technical excellence
- Thinking globally (OneSPE)
- Providing value to members
- Volunteerism
- Stewardship for the long term

SPE's Strategic Priorities

Life-Long Learning

SPE provides a robust selection of cross-disciplinary, life-long learning opportunities that are well respected and sought after by oil and gas industry technical professionals.

Knowledge Transfer

SPE content and community are seamlessly accessible online.

Membership

SPE membership and engagement is valued by oil and gas industry professionals from diverse technical specialties.

Professional Pride

SPE members understand and are inspired by our industry's contributions to society and represent the industry positively to the public.
